Finding Documentation

Provide the following URL to your users:

www.cisco.com/en/US/products/ps12732/tsd_products_support_series_home.html

New and Changed Features

For information about all available features and benefits, see the data sheet for Cisco WebEx Meetings Server at http://www.cisco.com/en/US/prod/collateral/ps10352/ps10362/ps12732/data_sheet_c78-717754.html.

New and Changed Features in Release 1.1 MR4

This Maintenance Release is the latest 1.1 release. It contains critical fixes. There are no new features in this release.

Chrome and Firefox Browser Alert

Because of Google and Mozilla policy changes, starting with Chrome 32* and Firefox 27*, users may need to manually enable the WebEx plug-in when using these browsers to join a WebEx meeting or play back a WebEx meeting recording. More information and instructions can be found in our [Joining a WebEx Meeting on Chrome and Firefox FAQ](#).

*The exact versions of Chrome and Firefox that are impacted by this policy have not been finalized as of the publishing of this document.

WebEx Productivity Tools

This release of Cisco WebEx Meetings Server supports the latest version of WebEx Productivity Tools, which can be found on the Downloads page of your Cisco WebEx Meetings Server website. If you are upgrading to this release and have an older version of Productivity Tools installed, we recommend that you push out the latest .msi for the optimal experience.

New and Changed Features in Release 1.1 MR3

This Maintenance Release contained critical fixes but has now been deferred due to a newer release. There were no new features in this release.

WebEx Productivity Tools

This release of Cisco WebEx Meetings Server supports the latest version of WebEx Productivity Tools, which can be found on the Downloads page of your Cisco WebEx Meetings Server website. If you are upgrading to this release and have an older version of Productivity Tools installed, we recommend that you push out the latest .msi for the optimal experience.

New and Changed Features in Release 1.1 MR2

This Maintenance Release contained several bug fixes but has now been deferred due to a newer release. There were no new features in this release.

WebEx Productivity Tools

This release of Cisco WebEx Meetings Server supports the latest version of WebEx Productivity Tools, which can be found on the Downloads page of your Cisco WebEx Meetings Server website. If you are upgrading to this release and have an older version of Productivity Tools installed, we recommend that you push out the latest .msi for the optimal experience.

New and Changed Features in Release 1.1

- Jabber 9.1.2 and later and Cisco WebEx Meetings Server integration (Windows only):
 - Meetings from Cisco WebEx Meetings Server displayed in Cisco Jabber Meetings Tab.
 - Start/Join from Meetings Tab.
 - Ability to start instant meetings.
 - Meeting Reminders ("Toast Popup").
 - Start instant meetings from IM.
- Added support for the following:

- VMware 5.1—Larger deployments can now use vSphere Enterprise license instead of Enterprise Plus.
- CUCM 9.1.
- Optimized network and server requirements. Refer to the *Cisco WebEx Meetings Server System Requirements* for more information.
- Over 550 defects addressed.
- Product Enhancements:
 - Improvements to the product installation experience.
 - Performance and load issue fixes.
 - Email template improvements (related to monitoring, license usage, and other issues).
 - Improved first-time join meeting experience with simplified administration password creation.
 - Improved product installation experience.
 - Updated documentation.

Browser Support for Release 1.1 MR4

The following web browsers were tested to work with Cisco WebEx Meetings Server Release 1.1 MR4:

Windows

- Google Chrome: 23 - 27
- Mozilla Firefox: 10 - 21
- Microsoft Internet Explorer: 9.0 and 8.0 (32- and 64-bit)

Mac

- Safari versions supported by the Mac OS X 10.6, Mac OS X 10.7, and Mac OS X 10.8 operating systems
- Google Chrome: 23 - 27
- Mozilla Firefox: 10 - 21

Browser Support for Release 1.1 MR3

The following web browsers were tested to work with Cisco WebEx Meetings Server Release 1.1 MR3:

Windows

- Google Chrome: 23 - 27
- Mozilla Firefox: 10 - 21
- Microsoft Internet Explorer: 9.0 and 8.0 (32- and 64-bit)

Mac

- Safari versions supported by the Mac OS X 10.6, Mac OS X 10.7, and Mac OS X 10.8 operating systems
- Google Chrome: 23 - 27
- Mozilla Firefox: 10 - 21

Browser Support for Release 1.1 MR2

The following web browsers were tested to work with Cisco WebEx Meetings Server Release 1.1 MR2:

Windows

- Google Chrome: 23 - 26
- Mozilla Firefox: 10 - 20
- Microsoft Internet Explorer: 9.0 and 8.0 (32- and 64-bit)

Mac

- Safari versions supported by the Mac OS X 10.6, Mac OS X 10.7, and Mac OS X 10.8 operating systems
- Google Chrome: 23 - 26
- Mozilla Firefox: 10 - 20

Browser Support for Release 1.1

The following web browsers were tested to work with Cisco WebEx Meetings Server Release 1.1:

Windows

- Google Chrome: 23 and 24
- Mozilla Firefox: 10 - 18
- Microsoft Internet Explorer: 9.0 and 8.0 (32- and 64-bit)

Mac

- Safari versions supported by the Mac OS X 10.6, Mac OS X 10.7, and Mac OS X 10.8 operating systems
- Google Chrome: 23 and 24
- Mozilla Firefox: 10 - 18

Limitations and Restrictions

VMware vCenter Usage Requirement

You must use VMware vCenter to manage the ESXi hosts on which the Cisco WebEx Meetings Server system is deployed. Using the vSphere client, sign in to vCenter and deploy the OVA file for the Administration virtual machine.

Recording Limitations

You can create as many recordings as your storage server capacity will allow. Estimate the required storage server size for a typical five-year period using the following formula:

Estimated hours of meetings that you expect to be recorded per day * 50-100 MB per hour of recording * five years * 24 hours per day * 365 days per year

There are no per-user storage limitations. Recordings are stored indefinitely until you delete them. There is no feature that enables you to automatically delete recordings due to the possibility that this would enable users to accidentally delete important recordings. Once you mark a recording for deletion, the recording is actually kept on the storage server for up to six months, giving you time to archive recordings on other media.

For more information on recording limitations, refer to the "Network-Based Recording (NBR)-Recorded Video Resolutions and FPS" section of the *Cisco WebEx Network Bandwidth* white paper at http://www.cisco.com/en/US/prod/collateral/ps10352/ps10362/ps10409/white_paper_c11-691351.pdf.

Localization

Language Support

Cisco WebEx Meetings Server is available in the following languages:

- English
- Simplified Chinese
- Traditional Chinese
- Japanese
- Korean
- French
- German
- Italian
- Castilian Spanish
- Latin American Spanish
- Dutch

- Portuguese
- Russian

English Audio Prompts

To configure U.S. English go to your Administration site, select **Settings > Company Info** and select **English** for the Language setting and **U.S.** for the Locale setting. This enables U.S. English audio prompts. To configure U.K. English go to your Administration site, select **Settings > Company Info** and select **English** for the Language setting and **U.K.** for the Locale setting. This enables U.K. English audio prompts.

Internet Reverse Proxy Might Be Removed From the Platform

The Admin virtual machine can send a remove message to the Internet Reverse Proxy server to remove it from the platform. This message is sent as clear text, is unauthenticated, and could lead to a denial of service.

Using IP tables or access control lists (ACLs), configure the firewall so that connections to port 64616 only come from the Admin virtual machine.

Important Notes

Hypervisor Support

Cisco WebEx Meetings Server runs on VMware virtual machines.

- Both VMware vSphere and VMware vCenter are required to deploy Cisco WebEx Meetings Server. Using the vSphere client, you will deploy the Cisco WebEx Meetings Server OVA file on an ESXi host managed by vCenter.
- You must purchase VMware vSphere 5.0, 5.0 Update 1, or 5.1 for use as the hypervisor platform for Cisco WebEx Meetings Server by completing one of the following:
 - Buy vSphere directly from Cisco on the GPL (Global Price List). Cisco is an approved VMware partner and distributor. This is convenient for those who "want everything from a single vendor".
 - Purchase vSphere directly from VMware, through enterprise agreements you have directly with VMware.
- Cisco WebEx Meetings Server does not support other hypervisors.
- For more information about hypervisor requirements, see the *Cisco WebEx Meetings Server System Requirements* at http://www.cisco.com/en/US/products/ps12732/prod_installation_guides_list.html.

Configuring Your High-Availability System

When you update a high-availability system, after you reboot the system and the reboot process appears to be complete, we recommend that you wait an additional 15 minutes before starting your add high-availability system procedure.

About Using Self-Signed Certificates

We strongly recommend using a publicly signed certificate instead of the provided self-signed certificate. Publicly signed certificates are trusted by users' browsers since trust for them is established using the list of Root Certificate Authority certificates installed on each user's computer.

When using self-signed certificates, some users might have difficulty joining meetings because browsers by default do not trust such certificates. Users are required to explicitly establish trust in this case before they can proceed to join a meeting on your site. Some users might not understand how to establish trust with such a certificate. Others might be prevented from doing so by administrative settings. Therefore, you should use publicly signed certificates whenever possible to provide the best user experience.

The User Guide provides a topic on this issue for end-users. Refer to the "Meeting Client Does Not Load" topic in the Troubleshooting chapter of the *Cisco WebEx Meetings Server User Guide* at http://www.cisco.com/en/US/products/ps12732/products_user_guide_list.html.

Expanding Your System

If you have VMware snapshots of your existing (pre-expansion) system, make sure your expanded system is up and running while removing or deleting your existing system. This prevents accidental removal of the hard disk 4 base VMDK file, which might be accessed by the expanded system.

Ping Frequency

Cisco WebEx Meetings Server now allows ~1 ICMP echo request every second, increased from ~1 ICMP echo request every two seconds.

Productivity Tools Upgrade Notice

If a previously deployed Productivity Tools package has a different version or build number from a newly deployed Productivity Tools package and the upgrade is not blocked, then your Productivity Tools client will notify you with an upgrade warning dialog box.

SNMP v2 Community Names

There is no default SNMP v2 community name entry in this release of Cisco WebEx Meetings Server. The system will remove the existing Cisco WebEx Meetings Server 1.0 default Community Name, "CWS-Public," after upgrading. Only user-added SNMP v2 community names are maintained.

Known Issues and Notices

Apple iOS 6.x and SSO

There is a known issue with Apple iOS 6.x, where Single Sign-On (SSO) does not work for internal users of iPad/iPhone who are using the Safari 6 web browser. This is due to an Apple defect that is fixed in iOS 7. The Safari bug ID is 13484525.

Translated Documentation

Translated documentation for this release of Cisco WebEx Meetings Server will be published 4-6 weeks after the English-language release.

Keeping Your Hostname While Changing Your Virtual Machine IP Address

Never change the DNS entries for the hostnames that are configured in your deployment. You can change the hostname of a virtual machine that is part of your deployment. The corresponding IP address is picked up automatically from the DNS. If you want to change the IP address of a virtual machine and keep the same hostname, you must perform the following steps:

- 1 Configure a temporary hostname in the DNS.
- 2 Change the hostname of the virtual machine to the temporary hostname that you configured and take the system out of maintenance mode for the new hostname to take effect. Your original hostname is not part of the deployment after making this change.
- 3 Change the IP address of the original hostname in the DNS to the new IP address.
- 4 Change the temporary hostname of the virtual machine to the original hostname and take the system out of maintenance mode for the hostname to take effect. Now the original hostname with your new IP address is configured.

FQDN Text

When you deploy virtual machines from vCenter using the OVA file, make sure the virtual machine hostname does not contain uppercase characters or underscores. When changing the hostname at the Administration site also make sure the virtual machine hostname does not contain uppercase characters or underscores.

Support Information

The end-user online help contains incomplete browser support information. Refer to the *Cisco WebEx Meetings Server System Requirements* for the most current information.

Dashboard Issue - Error On Meeting Status Page

On the **Meeting Status** page under Monthly Reports, when you display data for the last month, the text under the graph incorrectly indicates that "Problems were experienced in x% of meetings in the last three months." It should read "Problems were experienced in x% of meetings in the last month."

Dashboard Issue - Failure to Display Meetings That Have Started

There is a known issue in this release of Cisco WebEx Meetings Server in which the dashboard fails to represent certain meetings as having started. This occurs in the following scenario: A meeting is scheduled

with the "Allow participants to join teleconference before host" setting enabled. A user joins the meeting by phone but does not join the web portion. The dashboard should indicate that this meeting has started and has one participant but it does not. This may cause users to schedule multiple meetings resulting in performance issues.

Audio Configuration

On your audio configuration settings, note that G.711 will yield better voice quality than G.729. Refer to "About Configuring Your Audio Settings" in the *Cisco WebEx Meetings Server Administration Guide* for more information.

IP Communicator 7.0.x Endpoints

IP communicator 7.0.x endpoints joining Cisco WebEx Meetings Server meetings might introduce audio quality issues (echo and other noises) to a conference if it is in unmuted state or the participant using this endpoint becomes an active speaker. To prevent this, make sure you fine tune the IP communicator environment (for example, the headset, microphone, and speaker) or use a different traditional phone.

Meetings Started or Scheduled with iOS Devices

Meetings that are started with iOS devices cannot be recorded.

Update Stuck for Multiple Hours

If you are attempting to update your system and it remains stuck for several hours, use VMware Data Recovery (vSphere Data Protection) or your system snapshots to revert to your previous version and then start the update again.

Caveats

Using Bug Search Tool

Known problems (bugs) are graded according to severity level. These release notes contain descriptions of the following:

- Open customer-found bugs of severity 1 - 3
- Resolved customer-found bugs of severity 1 - 5
- Resolved Cisco-found bugs of significance

You can find details about listed bugs and search for other bugs by using the Cisco Bug Search Tool.

Before You Begin

To access Bug Search Tool, you need the following items:

- Internet connection
- Web browser
- Cisco.com username and password

Procedure

-
- Step 1** To access the Bug Search Tool, go to <https://tools.cisco.com/bugsearch/search>.
- Step 2** Sign in with your Cisco.com username and password.
- Step 3** Enter the bug ID number in the “Search for” field, then press Enter.
- Tip** You can also navigate to a specific bug by entering <https://tools.cisco.com/bugsearch/bug/<BUGID>> where <BUGID> is the ID of the bug that you are searching for (e.g., CSCab12345).
-

What to Do Next

For information about how to search for bugs, create saved searches, and create bug groups, select **Help** on the **Bug Search Tool** page.

Open Caveats in Cisco WebEx Meetings Server 1.1 MR4

The caveats listed in the following table describe unexpected behavior in this release of Cisco WebEx Meetings Server. Refer to Bug Search Tool for further details.

Table 1: Open Caveats in Cisco WebEx Meetings Server 1.1 MR4 (Build 1.1.1.453)

Identifier	Component	Severity	Headline
CSCum32264	platform-install	3	Update stuck due to webadmin crash

Open Caveats in Cisco WebEx Meetings Server 1.1 MR3

The caveats listed in the following table describe unexpected behavior in this release of Cisco WebEx Meetings Server. Refer to Bug Search Tool for further details.

Table 2: Open Caveats in Cisco WebEx Meetings Server 1.1 MR3 (Build 1.1.1.316)

Identifier	Component	Severity	Headline
CSCuf03447	sso	2	Admin server possibly preventing SSO for iPad/iPhone
CSCue95183	documentation	3	MIB files for CWMS are not available
CSCug28451	admin-meetingtestn	3	Meetings Test fails intermittently
CSCug81299	platform-install	3	Update from 1.1.1.107.A to 1.1.1.220.A stuck for multiple hours
CSCug92035	platform-install	3	Mctool is timeout before the return of puppet in CWMS deployment
CSCug95151	ue-general	3	SSO First Time login sees incorrect Country-Region values

Identifier	Component	Severity	Headline
CSCuh07243	mc-client	3	Presenter cannot be passed to mobile device unless the device is host
CSCuh09270	mc-client-com-msi	3	Onpremmc_GB.msi and ptools_GB.msi are in Chinese instead of UK English
CSCuh17468	admin-log	3	ELM logs not part of infocap
CSCuh20090	admin-sys-config	3	Deactivate host account after x days occurs when disabled
CSCuh27650	admin-sys-config	3	User timezone mistaken to anothor same GMT city
CSCuh28400	admin-meetingmon	3	Meeting in progress doesn't report Meeting don't started on the Web
CSCuh28776	mc-mobile-ios	3	CWMS - WebEx app on iOS doesn't show all dial-in numbers
CSCuh31201	admin-sys-config	3	Administrator Account Setup fails
CSCuh33315	mc-web-enduser	3	Users able to continue scheduling after deactivation
CSCuh36263	admin-sys-config	3	Attempting to regenerate CSR with new parameters results in the same CSR
CSCuh36401	admin-sys-config	3	Special characters in CSR parameters breaks CSR generation
CSCuh37254	documentation	3	Useless SSO SAML Attribute Names show in Orion Planning Guide.

Open Caveats in Cisco WebEx Meetings Server 1.1 MR2

The caveats listed in the following table describe unexpected behavior in this release of Cisco WebEx Meetings Server. Refer to Bug Search Tool for further details.

Table 3: Open Caveats in Cisco WebEx Meetings Server 1.1 MR2 (Build 1.1.1.220)

Identifier	Component	Severity	Headline
CSCug20116	admin-sys-config	2	User Account Creation Bug results in a locked out user account...
CSCuf66233	mc-web-enduser	2	User unable to schedule/start meeting
CSCuf03447	sso	2	Admin server possibly preventing SSO for iPad/iPhone
CSCug28451	admin-meetingtest	3	Meetings Test fails intermittently
CSCug25645	admin-reporting	3	Customized tracking codes do not reflect correctly in exported user.csv
CSCuf29957	licensing-elm	3	ELM not accessible

Identifier	Component	Severity	Headline
CSCug09353	licensing-elm	3	Remove hostname from CSR
CSCug27854	mc-client-com-pt	3	Productivity tools installation causes installation of tools on MOC/Lync
CSCug08918	admin-sys-config	4	CWMS admin should not allow duplicate IP address for IRP and public VIP
CSCug32014	admin-sys-config	4	Grammar error on the CWMS login page
CSCue88358	mc-web-com-api	4	Upper case in URL causes System error, please contact administrator msg

Open Caveats in Cisco WebEx Meetings Server 1.1

The caveats listed in the following table describe unexpected behavior in this release of Cisco WebEx Meetings Server. Refer to Bug Search Tool for further details.

Table 4: Open Caveats in Cisco WebEx Meetings Server 1.1

Identifier	Component	Severity	Headline
CSCue14445	platform-os	2	add HA failed due to RSync disconnect, cause active DB on both admin VMs
CSCue14962	platform-install	3	Added HA XU to the updated system shows down status - HA didn't reboot
CSCue19612	db-schema	3	ASIG: User password should not be stored in a recoverable format
CSCue21761	admin-systemmon	3	Storage size is not reported correctly on Dashboard
CSCue24053	ha	3	CWMS failover to HA: reconnect time too long and cannot restart video
CSCue24205	platform-install	3	Cron job does not try to expand size
CSCue94900	admin-meetingmon	3	CWMS admin sends out false email notification: 100% Mtgs having issues

Resolved Caveats in Cisco WebEx Meetings Server 1.1 MR4

The caveats listed in the following table describe issues that were resolved in this release of Cisco WebEx Meetings Server. Refer to Bug Search Tool for further details.

Table 5: Resolved Caveats in Cisco WebEx Meetings Server 1.1 MR4 (Build 1.1.1.453)

Identifier	Component	Severity	Headline
CSCu149294	mc-web-enduser	1	NPAPI phase out

Resolved Caveats in Cisco WebEx Meetings Server 1.1 MR3

The caveats listed in the following table describe issues that were resolved in this release of Cisco WebEx Meetings Server. Refer to Bug Search Tool for further details.

Table 6: Resolved Caveats in Cisco WebEx Meetings Server 1.1 MR3 (Build 1.1.1.316)

Identifier	Component	Severity	Headline
CSCuf66233	mc-web-enduser	2	User unable to schedule/start meeting
CSCug20116	admin-sys-config	2	User Account Create Does Not Strip Leading or Trailing Space Characters
CSCug44227	admin-systemmon	2	NBR doesn't work after system reboot
CSCug93401	dld-java	2	Cannot start/join meeting via Firefox21
CSCue81770	admin-sys-config	3	Call-in access numbers not restored from disaster recovery
CSCuf29957	licensing-elm	3	ELM not accessible
CSCuf61549	documentation	3	Admin Guide: Need more comprehensive description of System Backup...
CSCuf94093	documentation	3	Maximum Meeting Capacity
CSCug09353	licensing-elm	3	Remove hostname from CSR
CSCug09787	documentation	3	Document SMTP Port requirements for Large Deployment
CSCug11892	documentation	3	CWMS documentation should include visual effects during web sharing
CSCug20257	admin-reporting	3	Pure call back user shall be counted on MeetingReport.csv report
CSCug24749	documentation	3	Add CWMS Troubleshooting Steps for Downloading Reports
CSCug25645	admin-reporting	3	Customized tracking codes do not reflect correctly in exported user.csv
CSCug48982	admin-sys-config	3	Recording is allowed when not allowed in participant privileges.
CSCug59161	documentation	3	Include ports used by Meeting Center in networking documentation
CSCug69146	admin-reporting	3	CWMS Reports cannot be downloaded using IE 8

Identifier	Component	Severity	Headline
CSCug74470	mmp-stream-server	3	Media node reaching out to 1.0.0.0
CSCug85244	mc-client-com-pt	3	CWMS 1.1 Meeting does not show up on web for added participants
CSCug86339	mc-web-enduser	3	Access https://SiteURL/manager/html, disclose tomcat server info.
CSCug94986	platform-integ	3	No exact info about mount failure in log when isStorageSever.sh failed
CSCuh01025	platform-install	3	Update from 1.1.1.220 to 1.1.1.305 stuck
CSCuh22603	admin-reporting	3	CWMS Reports and infocap cannot be downloaded using IE 8, from email
CSCue90282	ue-doc	4	Only one vNIC active on non-admin nodes
CSCuf86498	admin-systemmon	4	Webex site URL shows orion.webex.cisco.com on admin page intermittently
CSCug08918	admin-sys-config	4	CWMS admin should not allow duplicate IP address for IRP and public VIP
CSCug32014	admin-sys-config	4	Grammar error on the CWMS login page
CSCug37373	admin-systemmon	4	CWMS communication throws security alert due to invalid getBulkRequest
CSCuf85994	admin-meetingmon	5	Text for the meeting status note should be corrected
CSCug66780	admin-reporting	5	Monthly Report: Meetings Feature Usage has Bad legend
CSCug66786	admin-reporting	5	Meetings Feature Usage graph for Web Sharing is not using right color

Resolved Caveats in Cisco WebEx Meetings Server 1.1 MR2

The caveats listed in the following table describe issues that were resolved in this release of Cisco WebEx Meetings Server. Refer to Bug Search Tool for further details.

Table 7: Resolved Caveats in Cisco WebEx Meetings Server 1.1 MR2 (Build 1.1.1.220)

Identifier	Component	Severity	Headline
CSCue70983	licensing	1	CWMS 1.1 ELM Issue prevents use of top-level-domains for CWMS Admin Site
CSCuf21793	mc-web-mobile	1	CWMS adding invitees to meeting in iOS problem
CSCue89570	db-core	2	after database file size is exhausted, new file not created
CSCue31363	eureka-server	2	Ability to Read Uninitialized Memory

Identifier	Component	Severity	Headline
CSCue36629	eureka-server	2	The CB "cache" directory content can be downloaded
CSCue89871	platform-integ	2	Users could not log into scheduling page after the upgrade to 1.1.1.9
CSCuf96994	platform-integ	2	cancel dmz makes empty bootconfig
CSCue71736	telephony	2	sRTP does not use FIPS-compliant routines
CSCue29643	admin-reporting	3	Cannot generate user license report if system timezone is GMT+8
CSCue14886	admin-sys-config	3	Firefox infinite loop displaying page redirect pop-up confirmation
CSCue81770	admin-sys-config	3	Call-in access numbers not restored from disaster recovery
CSCue19380	admin-systemmon	3	False alarm "One or more virtual machines needs your attention"
CSCuf37985	ha	3	CWMS 1.1 admin HA node down
CSCuf29946	licensing-elm	3	ELM server not accessible if webadmin fails over on HA admin node
CSCuf24663	mc-as	3	Authenticaton module can not build with Maven.
CSCuf60313	mc-client-com-pt	3	PT: It should tell user how to login cloud non-SSO site via PT.
CSCue89193	mc-web-com-waf	3	We shouldn't eat the log of flush caching on other VMs.
CSCue89797	mc-web-com-waf	3	There is an invalid API call to http://meetings.atk.com1/dispatcher/
CSCue72804	mc-web-enduser	3	Mtg url in mtg-client shouldn't include psw if check on exclude psw
CSCuf52200	platform-install	3	Deployment fte pages accessible without passphrase
CSCue24205	platform-install	3	Cron job does not try to expand size
CSCue56377	platform-integ	3	Deployment FTE fails if the first DNS server is down or unreachable
CSCue62740	platform-integ	3	Allow grow using both OVA 1.0 and OVA 1.1
CSCug11140	platform-integ	3	Block direct update from 1.0 to 1.1MR2
CSCue78851	sso	3	SSO sign in fail and notice the the user is inactive
CSCue14799	admin-reporting	4	Meeting size statistics on pdf report does not follow data prepared
CSCud86685	email	4	CWMS 1.1 TVT_percentage sign is missing in English source string
CSCue29401	email	4	Email: Won't show meeting password in reminder mail

Identifier	Component	Severity	Headline
CSCud67904	mc-web-enduser	4	Password not required to join meetings
CSCud85417	mc-web-enduser	4	CWMS 1.1 TVT_global change for "cover the licenses"
CSCud85436	mc-web-enduser	4	CWMS 1.1 TVT_global change for "purchased licenses"
CSCud85443	mc-web-enduser	4	CWMS 1.1 TVT_translation change for "You are using a free trial..."
CSCue01592	mc-web-enduser	4	'start' button always stays in grey in MDP when disable JBH in admin
CSCue03725	mc-web-enduser	4	CWMS End User Training Videos is not available for "Español de España"
CSCue07774	mc-web-enduser	4	Company name won't change if starting meeting as soon as
CSCue14840	mc-web-enduser	4	Do not show access code if attendee do not log in site
CSCue15556	mc-web-enduser	4	Create user password error when check on "Email address unacceptable"
CSCue25425	platform-install	4	Adding HA system fails intermittently
CSCue60665	platform-install	4	CWMS cannot use alias for hostname to deploy a system
CSCue96113	telephony-cms	4	CWMS need to disable VAD if peer side not support VAD
CSCuf66253	telephony-cms	4	Disable VAD parameter in config file

Resolved Caveats in Cisco WebEx Meetings Server 1.1

The caveats listed in the following table describe issues that were resolved in this release of Cisco WebEx Meetings Server. Refer to Bug Search Tool for further details.

Table 8: Resolved Caveats in Cisco WebEx Meetings Server 1.1

Identifier	Component	Severity	Headline
CSCud08598	eventbus	1	VM states flapping Up/Down every few mins
CSCuc51705	admin-sys-config	2	UI doesn't show correct status on failed HA Add
CSCud20537	admin-sys-config	2	Wrong initial value for special character rule is displayed
CSCud57104	admin-sys-config	2	OVA 1.1.0.51 : Basic Config FTE is not working
CSCud77315	admin-sys-config	2	Browser button does not work in IE
CSCuc45013	db-core	2	Grow failed due to an error in db restore

Identifier	Component	Severity	Headline
CSCud16831	db-core	2	Update from 1.0.1.157 -> 1.1.0.17 failed. missing DBMS upgrade file
