

The ITA Has Moved

You have reached this page because the Cisco Internetworking Terms and Acronyms (ITA) content has moved to DocWiki. Internetworking terms and acronyms are specific to Cisco products, technologies, or services or have an additional definition or description that is unique to Cisco.

The intent of the DocWiki pages is to provide up-to-date, accurate, consistent definitions of terms. The intent is not to duplicate industry-standard terms for which definitions can be found in other sources external to Cisco.

Please update your bookmark to the new link:
