

FHRP - Enhanced Object Tracking of IP SLAs

This feature enables first-hop redundancy protocols (FHRPs) and other enhanced object tracking clients to track the output from IP Service Level Agreements (SLAs) objects and use the provided information to trigger an action.

Configuration Information

Configuration information is included in the “Configuring Enhanced Object Tracking” chapter in the *Cisco IOS IP Application Services Configuration Guide*, Release 12.4T at the following URL:

- http://www.cisco.com/univercd/cc/td/doc/product/software/ios124/124tcg/tiapp_c/index.htm

Command Reference Information

Command reference information is included in the *Cisco IOS IP Application Services Command Reference*, Release 12.2SR, at the following URL:

- http://www.cisco.com/univercd/cc/td/doc/product/software/ios122sr/cr/sriap_r/index.htm

New or Modified Commands

The following commands are new or modified for this feature:

- **track rtr**

Any Internet Protocol (IP) addresses used in this document are not intended to be actual addresses. Any examples, command display output, and figures included in the document are shown for illustrative purposes only. Any use of actual IP addresses in illustrative content is unintentional and coincidental.
