NetFlow Layer 2 and Security Monitoring Exports

NetFlow Layer 2 and Security Monitoring Exports improves your ability to detect and analyze network threats such as denial of service (DoS) attacks by increasing the number of fields from which NetFlow can capture the values.

Configuration Information

Configuration information is included in the "NetFlow Layer 2 and Security Monitoring Exports" chapter in the *Cisco IOS NetFlow Configuration Guide*, Release 12.4T, at the following URL:

http://www.cisco.com/univercd/cc/td/doc/product/software/ios124/124tcg/tnf_c/ch15/nfhtsec.htm

Command Reference Information

Command reference information is included in the *Cisco IOS NetFlow Command Reference*, Release 12.2SR, at the following URL:

http://www.cisco.com/univercd/cc/td/doc/product/software/ios122sr/cr/srnf_r/

New or Modified Commands

The following command is new or modified for this feature:

- **ip flow-capture**
