

Call Detail Records (CDR) Feature Correlation ID for Supplementary Features

This feature captures additional information in CDRs for voice calls that are transferred or forwarded on phones controlled by Cisco Unified CallManager Express (Cisco Unified CME) or Cisco Unified Survivable Remote Site Telephony (Cisco Unified SRST). It includes a unique correlation ID that identifies a given call feature across all legs in a call. CDR information can be output in RADIUS VSAs or system log (syslog) messages.

Configuration Information

Configuration information and a description of the feature VSA is included in *CDR Accounting for Cisco IOS Voice Gateways* at the following URL:

- <http://www.cisco.com/en/US/docs/ios/voice/cdr/developer/guide/cdrdev.html>
