

NAT SCCP Fragmentation Support

The NAT SCCP Fragmentation Support feature prevents skinny control message exchanges from failing in a TCP segmentation scenario because the NAT skinny ALG is able to reassemble the skinny control messages. A fragmented payload that requires an IP or port translation will no longer be dropped.

Configuration Information

Configuration information is included in the “Using Application Level Gateways” module in the *Cisco IOS NAT Configuration Guide*, Release 12.4T, at the following URL:

- http://www.cisco.com/univercd/cc/td/doc/product/software/ios124/124tcg/tnat_c/htnatalg.htm

Command Reference Information

Command reference information is included in the “NAT Commands” chapter of the *Cisco IOS IP Addressing Services Command Reference*, Release 12.4T, at the following URL:

- http://www.cisco.com/univercd/cc/td/doc/product/software/ios124/124tcr/tiad_r/adnatht.htm

New or Modified Commands

There are no new or modified commands introduced by this feature.

List of All Release 12.4T Commands
