

OCSP - Server Certification from Alternate Hierarchy

This feature provides users with the flexibility to specify multiple Online Certificate Status Protocol (OCSP) servers, either per client certificate or per group of client certificates, and provides the capability for OCSP server validation based external certification authority (CA) certificates or self-signed certificates.

Configuration Information

Configuration information is included in the “Configuring Authorization and Revocation of Certificates in a PKI” chapter in the *Cisco IOS Security Configuration Guide*, Release 12.4T, at the following URL:

- http://www.cisco.com/univercd/cc/td/doc/product/software/ios124/124tgc/tsec_c/part20/t_pki_ct.htm

Command Reference Information

Command reference information is included in the *Cisco IOS Security Command Reference*, Release 12.4T, at the following URL:

- http://www.cisco.com/univercd/cc/td/doc/product/software/ios124/124tcr/tsec_r/index.htm

New or Modified Commands

The following command is new for this feature:

- **match certificate override ocs**

List of All Release 12.4T Commands

An alphabetical list of all Cisco IOS Release 12.4T commands is in the *Cisco IOS Master Command List*, Release 12.4T, at the following URL:

- http://www.cisco.com/en/US/docs/ios/mcl/124tmcl/124t_book.html
