

SDP Expanded Template CGI Support

This feature allows users to configure the Secure Device Provisioning (SDP) registrar to send a bootstrap configuration to the SDP petitioner based on not only the device name, but also its current Cisco IOS version and current configuration.

Configuration Information

Configuration information is included in the “Configuring Authorization and Revocation of Certificates in a PKI” chapter in the *Cisco IOS Security Configuration Guide*, Release 12.4T, at the following URL:

- http://www.cisco.com/univercd/cc/td/doc/product/software/ios124/124tcg/tsec_c/part20/t_pkisdpm.htm

Command Reference Information

Command reference information is included in the *Cisco IOS Security Command Reference*, Release 12.4T, at the following URL:

- http://www.cisco.com/univercd/cc/td/doc/product/software/ios124/124tcr/tsec_r/index.htm

New or Modified Commands

The following command was modified for this feature:

- **template config**

List of All Release 12.4T Commands
