

NetFlow Dynamic Top Talkers CLI

The NetFlow Dynamic Top Talkers CLI feature gives you an overview of the highest volume traffic in your network by aggregating flows on a common field. For example, you can aggregate all of the flows for a destination network by aggregating them on the destination IP address prefix. There are over 20 fields from flows that you can aggregate the highest volume traffic on.

Configuration Information

Configuration information is included in the “Detecting and Analyzing Network Threats With NetFlow” module in the “Configuring Advanced Use of NetFlow for Analyzing Network Traffic Data chapter” of the *Cisco IOS NetFlow Configuration Guide*, Release 12.4T at the following URL:

- http://www.cisco.com/en/US/docs/ios/netflow/configuration/guide/nf_detct_analy_thrts_ps6441_TSD_Products_Configuration_Guide_Chapter.html

Command Reference Information

Command reference information is included in the *Cisco IOS NetFlow Command Reference*, at the following URL:

- http://www.cisco.com/en/US/docs/ios/netflow/command/reference/nf_book.html
