

ISP1—Device Characteristics and Complete Configuration Files

This document includes the device characteristics and configuration files for the following host names in ISP1 and ISP1-POP:

- ISP1BB1
- ISP1BB2
- ISP1BB3
- ISP1BB4
- ISP1BB5
- ISP1BB6
- ISP1BB7
- ISP1DA1
- ISP1DA2
- ISP1DA3
- ISP1AC1
- ISP1AC2

Note

The multicast solutions in this document were tested with valid IP addresses. In the example configurations provided in the following sections, the first octet of these reserved IP addresses has been replaced with the letter “J” or the letter “K” for privacy reasons. The letter “J” always represents one unique number, and the letter “K” always represents one unique number that is different from “J.”

The example configurations are intended for illustrative purposes only. The letters “J” and “K” must be replaced with valid numbers when these IP addresses are configured in an actual network.

Note

The example configurations provided in the following sections use boldface text to indicate pertinent configuration commands used for deploying the IP multicast solutions described in this document.
