

CHAPTER 12

Support Information for Cisco Syslogs

This chapter provides detailed information about the Syslogs supported in Cisco ANA. It presents this information in:

- A section devoted to the supported Syslogs for a MIB (e.g., [Cisco IOS Syslogs](#)). Each of these sections contains a table listing the name of each ANA-supported syslog in that MIB, along with a description, the association key, raw format of the syslog string, and a short description.
- The [Registry Parameters for Syslog Events](#) section. This section provides tables of all the event subtypes, grouped according to the event type they share. The event subtype tables describe when these Syslogs are generated, and give information about how Cisco ANA processes them (such as their severity, and whether they are ticketable, can be correlated, are autocleared, and so on).

This chapter includes the following sections:

- [Cisco ASR Syslogs, page 12-2](#)
- [Cisco IOS Syslogs, page 12-2](#)
- [Cisco IOX Syslogs, page 12-11](#)
- [Registry Parameters for Syslog Events, page 12-20](#)
