

INDEX

B

banner, configuring **55**
BOOTP, disabling **44**

C

cable modem **8**
CDP, disabling **45**
CEF, enabling **48**
Challenge Handshake Authentication Protocol,
see CHAP
CHAP **23, 26**

D

DHCP **23, 26**
DLCI **29**
dynamic IP address **23, 26**

E

encapsulation
IETF **29**

PPPoE **25**
RFC 1483 Routing **25**

F

finger service, disabling **41**
Frame Relay
 DLCI **29**
 IETF encapsulation **29**
 LMI type **29**

G

gratuitous ARP requests, disabling **51**

I

ICMP host unreachable messages, disabling **53**
ICMP mask reply messages, disabling **53**
ICMP redirect messages, disabling **51**
IETF encapsulation **29**
interface
 cable modem **8**
IP address

dynamic **23, 26**
negotiated **23, 26**
unnumbered **23, 26**
IP directed broadcasts, disabling **52**
IP Identification service, disabling **44**
IP source routing, disabling **45**

L

LMI **29**
logging
enabling **49**
enabling sequence numbers and time stamps **47**

M

MOP service, disabling **53**

N

NetFlow, enabling **46**

P

PAD service, disabling **42**
PAP **23, 26, 32**
Password Authentication Protocol, see PAP
passwords

enabling encryption **46**
setting minimum length **54**
PPPoE **25**
proxy ARP, disabling **51**

R

RFC 1483 Routing **25**

S

scheduler allocate **48**
scheduler interval **48**
SDP
troubleshooting **59**
sequence numbers, enabling **47**
SNMP, disabling **41**
SSH
enabling **56**

T

TCP keep-alive message, enabling **47**
TCP small servers, disabling **42**
TCP synwait time **49**
teleworker support **39**
text banner, configuring **55**
time stamps, enabling **47**

U

UDP small servers, disabling [43](#)

unicast RPF, enabling [50](#)
