### Numerics

802.1Q [8-1](#)

---

### A

AAA server [3-2, 10-4, 10-14, 12-6](#)  
access domains [2-8, 3-6](#)  
access hours, for VPN 3000 [10-18](#)  
access protocol [2-10](#)  
ACL (access control lists) [12-1](#)  
active templates [4-13](#)  
aggregated rate limiters [9-6](#)  
aggregated traffic shapers [9-6](#)  
aggregation, route [2-8](#)  
AH (authentication header) [10-16](#)  
algorithm, hash [10-3](#)  
annotations, in schema [1-12](#)  
API  
  checking status [2-1](#)  
  components [1-1](#)  
  license [3-7](#)  
  operations [1-9](#)  
  port [2-1](#)  
  server [1-8](#)  
  XML schema [1-10](#)  
appended templates [4-4](#)  
asynchronous notifications [1-8](#)  
ATM [7-1](#)  
attachment circuits [7-2](#)  
attributes, unsetting [9-4](#)  
auditing [2-12](#)  
  configurations [3-11](#)

IPsec service requests [3-9](#)  
MPLS service requests [6-13](#)  
VPN tunnels [3-12](#)  
  auditing, forced [8-18](#)  
  authentication, HTTP [1-4](#)  
  authentication, LDAP [5-2](#)  
  authentication proxy [12-2](#)  
  authentication server type [10-14](#)  
Autodiscovery [2-5](#)  
autopick VLAN ID [7-12, 8-15](#)  
autotranslation [11-1](#)  
avoidance, for QoS [9-3](#)

---

### B

BGP AS [3-6](#)  
block call [1-18](#)  
body of message, SOAP [1-5](#)  
body text, in templates [4-3](#)  
BPDU (bridge protocol data unit) [8-1](#)  
browser, schema [1-12](#)  
buffer templates [4-2](#)

---

### C

canned reports [5-4](#)  
CAR, interface-based [9-6](#)  
Catalyst switches [3-2](#)  
CBAC (context-based access control) [12-11](#)  
CE routing community (CERC) [3-5](#)  
certificate chain [3-9](#)  
certificate enrollment audit [3-9](#)  
checking API status [2-1](#)

- child policies, for firewalls [12-11](#)  
 CIM objects [1-13](#)  
 Cisco express forwarding (CEF) [9-2](#)  
 Cisco IOS switches [3-2](#)  
 Cisco router [3-2](#)  
 clauses, for searching [5-8](#)  
 client  
   connections [1-8](#)  
   interface [1-2](#)  
   java [2-1](#)  
   client, enabling [B-1](#)  
   code attribute, errors [1-17](#)  
   collection server [5-4, 5-13](#)  
   collection task [2-10, 3-10](#)  
   collection zones [3-6](#)  
   column labels, output file [5-10](#)  
   command syntax [2-12](#)  
   comma separated value (CSV) [5-10](#)  
   committed information rate [9-18](#)  
   common APIs [3-1](#)  
   components, in errors [1-17](#)  
   components, of API [1-1](#)  
   compressed real-time protocol (cRTP) [9-6](#)  
   configlet, for templates [4-6](#)  
   configuration  
     audit [2-12, 3-11](#)  
     collection [2-10, 3-10](#)  
     download [1-14](#)  
     configurations, for templates [4-2](#)  
     congestion management [9-3](#)  
     content, HTTP header [1-3](#)  
     core type, for VPLS [8-1](#)  
     CPE, creating [3-3](#)  
     CPE role [10-4](#)  
     create session [1-9](#)  
     creating  
       objects [1-9](#)  
       repository inventory [2-5](#)  
       service orders [2-11](#)  
     test inventory [3-14](#)  
     crypto maps [10-3, 10-8](#)  
     crypto profiles [10-3](#)  
     customer reports [5-6](#)  
     customers, defined [2-7](#)
-

- data  
   file editor [4-11](#)  
   for templates [4-2](#)  
   transient [4-8](#)  
 database, searching [5-4](#)  
 database change events [1-8, 5-1](#)  
 data buffer [4-10](#)  
 data records [5-4](#)  
 data service class [9-3](#)  
 data structures [1-10](#)  
 debugging [1-18](#)  
 decommissioning service requests [3-10, 4-16](#)  
 default  
   login session [3-7](#)  
   MPLS policy [6-3](#)  
   wait timeout [1-6](#)  
 define interfaces  
   MPLS [6-13](#)  
   VPLS [8-17](#)  
 defining templates [4-2](#)  
 deleting  
   objects [1-9](#)  
   template data files [4-8](#)  
 delimiter, output file [5-4](#)  
 deliver event operation [1-9](#)  
 deliver event responses [5-3](#)  
 deploying services [3-11](#)  
 deploying templates [4-1](#)  
 description attribute, errors [1-17](#)  
 device collection [3-10](#)  
 device group [3-6](#)

device interface, AAA server **10-5**  
 device locking **5-21**  
 device peer IP address ranges **11-8**  
 devices, non-Cisco **3-3**  
 DHCP protocol **3-13**  
 DHCP server **10-19**  
 DHGroup **10-16**  
 DMZ, for firewalls **12-5**  
 DNS **3-13**  
 documents, related **xviii**  
 DOT1Q, tagging for VPLS **8-1**  
 downloading  
   configurations **1-14**  
   template files **4-7**  
   templates **4-3**  
 DSCP value **9-3**  
 due dates **3-8**  
 dynamic address translation **11-2**

---

**E**

Easy VPN site-to-site policy **10-3**  
 editable attributes **2-11, 6-2, 7-2, 8-2, 10-18**  
 enable client **B-1**  
 enabling HTTPS **1-4**  
 enabling SOAP **1-4**  
 enabling VPN **8-14**  
 encapsulation type, for interfaces **11-6**  
 encrypting API messages **1-4**  
 encryption policies **10-3**  
 end-to-end wires **7-2**  
 end-user services **1-14**  
 enrollment status **3-9**  
 enumerated schemas **1-11**  
 enumerate instances **1-9**  
 envelope, SOAP **1-4**
