

## Preface

---

This guide is one of multiple short guides for Cisco Prime Collaboration 9.0 that are used in sequence to install, set up, administer, and manage Prime Collaboration:

- Set up the Prime Collaboration server with user credentials and license files.
- Integrate Cisco Prime Assurance and Cisco Prime Provisioning, if you have purchased them.
- Perform maintenance tasks, such as performing backup and restore.
- Configure the log files for troubleshooting.

### New and Changed Information

The table below describes information that has been added or changed since the initial release of the Cisco Prime Collaboration 9.0 Administration Guide.

Date	Revision	Location
June 28, 2013	Updated the LDAP configuration details.	<a href="#">Configuring an LDAP Server</a>
June 28, 2013	Updated the User Roles and Tasks table.	<a href="#">User Roles and Tasks</a>

## Audience

This guide is for voice and video engineers who are responsible for the configuration, provisioning, inventory, and maintenance of infrastructure-based, real-time collaboration services such as video (TelePresence) and telephony (VoIP), including endpoints, management servers, and service-specific network devices.

Prime Collaboration is deployed on a virtual server. The user must be familiar with virtual server configuration and with UNIX commands using the CLI.

## Related Documentation

This guide is one of multiple short guides for Cisco Prime Collaboration 9.0. To perform other Prime Collaboration tasks, such as user management, device management, voice provisioning, network monitoring, and fault management, see [Cisco Prime Collaboration 9.0 Documentation Overview](#) for a list of all available documents.

# Obtaining Documentation and Submitting a Service Request

For information on obtaining documentation, submitting a service request, and gathering additional information, see the monthly *What's New in Cisco Product Documentation*, which also lists all new and revised Cisco technical documentation, at:

<http://www.cisco.com/en/US/docs/general/whatsnew/whatsnew.html>

Subscribe to the *What's New in Cisco Product Documentation* as a Really Simple Syndication (RSS) feed and set content to be delivered directly to your desktop using a reader application. The RSS feeds are a free service and Cisco currently supports RSS Version 2.0.
