

# CHAPTER 10

## Working with Reports

---

Cisco Prime Network (Prime Network) provides a Report Manager that enables you to generate, view, and export reports of the information managed by Prime Network. You can save the generated reports in any of the following formats: PDF, CSV, HTML, XLS, and XML.

In addition to a variety of standard reports for events and inventory, you can define reports as required for your environment. The following topics discuss the Report Manager and reports in more detail:

- [User Roles Required to Manage Reports, page 10-1](#)
- [Using the Report Manager, page 10-4](#)
- [Report Categories, page 10-11](#)
- [Generating Reports, page 10-22](#)
- [Managing Reports, page 10-40](#)
- [Defining Report Types, page 10-47](#)
- [Working with Report Folders, page 10-48](#)

## User Roles Required to Manage Reports

This topic identifies the roles that are required to manage reports. Prime Network determines whether you are authorized to perform a task as follows:

- For GUI-based tasks (tasks that do not affect elements), authorization is based on the default permission that is assigned to your user account.
- For element-based tasks (tasks that do affect elements), authorization is based on the default permission that is assigned to your account. That is, whether the element is in one of your assigned scopes and whether you meet the minimum security level for that scope.

For more information on user authorization, see the [Cisco Prime Network 3.8 Administrator Guide](#).

The following tables identify the tasks that you can perform:

- [Table 10-1](#) identifies whether you can generate a report if a selected element is **not in** one of your assigned scopes.
- [Table 10-2](#) identifies whether you can generate a report if a selected element is **in** one of your assigned scopes.
- [Table 10-3](#) identifies the tasks you can perform on the reports that you generate.

- [Table 10-4](#) identifies the tasks you can perform on the reports that someone else generates.
- [Table 10-5](#) identifies the tasks you can perform on report folders.

By default, users with the Administrator role have access to all managed elements. To change the Administrator user scope, see the topic on device scopes in the [Cisco Prime Network 3.8 Administrator Guide](#).

**Table 10-1** Default Permission/Security Level Required for Generating Reports - Element Not in User's Scope

Task	Viewer	Operator	OperatorPlus	Configurator	Administrator
Generate Events Reports					
• Detailed Network Events Reports	—	—	—	—	X
• Detailed Non-Network Events Reports	—	—	—	Partial <sup>1</sup>	X
• All other events reports	—	—	—	—	X
Generate Inventory Reports	—	—	—	—	X
Generate Network Service Reports	—	—	—	—	X

1. A user with the Configurator role can generate Detailed Provisioning Events reports for elements that are in and outside their scope.

**Table 10-2** Default Permission/Security Level Required for Generating Reports - Element in User's Scope

Task	Viewer	Operator	OperatorPlus	Configurator	Administrator
Generate Events Reports					
• Detailed Network Events Reports <sup>1</sup>	X	X	X	X	X

- [Managing Reports, page 10-40](#)

## Using the Report Manager

The Report Manager is available from Prime Network Vision, Prime Network Events, and Prime Network Administration by choosing **Reports > Report Manager**. The Report Manager (shown in [Figure 10-1](#)) enables you to run standard reports, such as the number of syslogs by device.

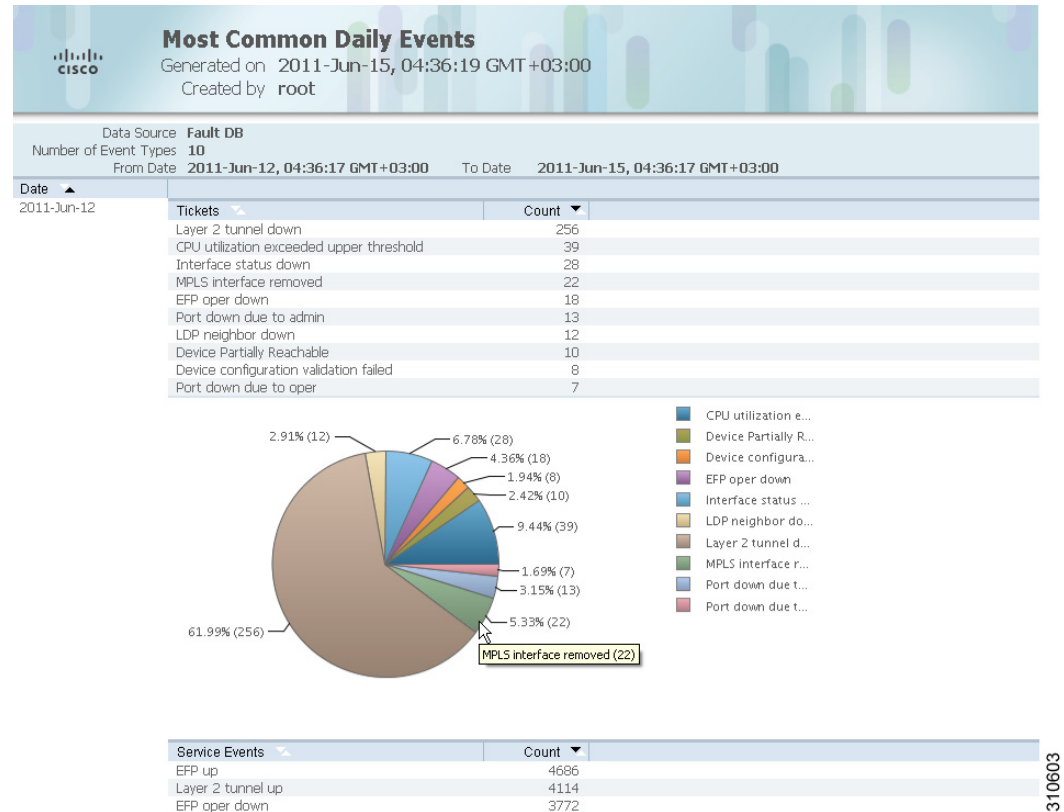

The Report Manager also enables you to create reports and folders, view previously generated reports, define report types for your use, and organize reports in a manner suited to your environment and needs.

**Figure 10-1** Report Manager Window

1	Menu bar	3	Navigation tree with report types and folders
2	Toolbar	4	Content pane

[Figure 10-2](#) shows an example of a generated report with a pie chart.

**Figure 10-2 Sample Report**

Generated reports contain the following information in the report heading:

- Report name
- Date, time, and timezone in which the report was generated
- Name of user who generated the report

Depending on the type of report, the following additional information can appear in the report heading:

- Source of the data, such as the fault or alarm database
- Time period covered by the report
- Number of items included in the report
- Any filters or maps applied to the report

A report might also include a pie chart. If you hover your mouse cursor over a section in the pie chart, a tooltip displays the information associated with that section, such as IP address, number of events, type of event, or percentage of total events.

**Note**

Not all reports include pie charts. In addition, reports that normally include a pie chart do not display a pie chart if the chart exceeds 25 slices.

**Related Topics**

- [Report Categories, page 10-11](#)
- [Managing Reports, page 10-40](#)

## Menu Options

[Table 10-6](#) describes the menu options available in the Report Manager window.

**Table 10-6** *Report Manager Menu Options*

Option	Description
<b>File Menu</b>	
Exit	Exits the Report Manager window.
<b>Tools Menu</b>	
Change User Password	Enables you to change the password used when logging into the Prime Network client application suite. The change takes effect the next time you log into the application.  <b>Note</b> The administrator can also change a user password in Prime Network Administration.
<b>Help Menu</b>	
Cisco Prime Network Report Manager Help	Opens the online help for Prime Network Vision and Prime Network Events.
Cisco.com	Unavailable.
About Cisco Report Manager	Displays application information about Prime Network Vision and Prime Network Events.

**Related Topics**

- [Report Manager Toolbar, page 10-6](#)
- [Navigation Tree, page 10-7](#)
- [Content Pane, page 10-8](#)

## Report Manager Toolbar

[Table 10-7](#) identifies the buttons that appear in the Report Manager toolbar.

**Table 10-7** *Report Manager Toolbar Buttons*

Icon	Name	Description
	Run	Generates the selected report.
	Define Report of This Type	Enables you to define a report of this type that is suited specifically to your environment.

**Table 10-7 Report Manager Toolbar Buttons (continued)**

Icon	Name	Description
	New Folder	Creates a new folder.
	Move	Moves one or more folders or reports that you created.
	Rename	Renames a folder that you created.
	Delete	Deletes one or more folders that you created.
	Delete Report	Deletes one or more selected reports.
	View	Displays the selected report in HTML format.

**Related Topics**

- [Content Pane, page 10-8](#)
- [Navigation Tree, page 10-7](#)
- [Menu Options, page 10-6](#)

## Navigation Tree

The navigation pane displays a tree-and-branch representation of report folders and types of reports. The highest level in the tree displays report folders. The following standard report folders are provided in Report Manager:

- Events Reports
- Inventory Reports
- Network Service Reports

Each folder contains the types of reports that are provided with Prime Network and any user-defined reports. For more information on the standard report types, see [Table 10-12](#).

When you select an item in the tree, the content pane displays the generated reports as follows:

- If you select a folder, the content pane lists all reports that have been generated using any of the report types in that folder.
- If you select a report type, the content pane lists all reports that have been generated of that report type.

**Related Topics**

- [Menu Options, page 10-6](#)
- [Report Manager Toolbar, page 10-6](#)
- [Content Pane, page 10-8](#)

## Content Pane

The content pane lists all reports generated for the folder or report type selected in the navigation tree. You can double-click a report to view the report in HTML format.

Figure 10-3 shows an example of the content pane.

**Figure 10-3** Reports Manager Content Pane

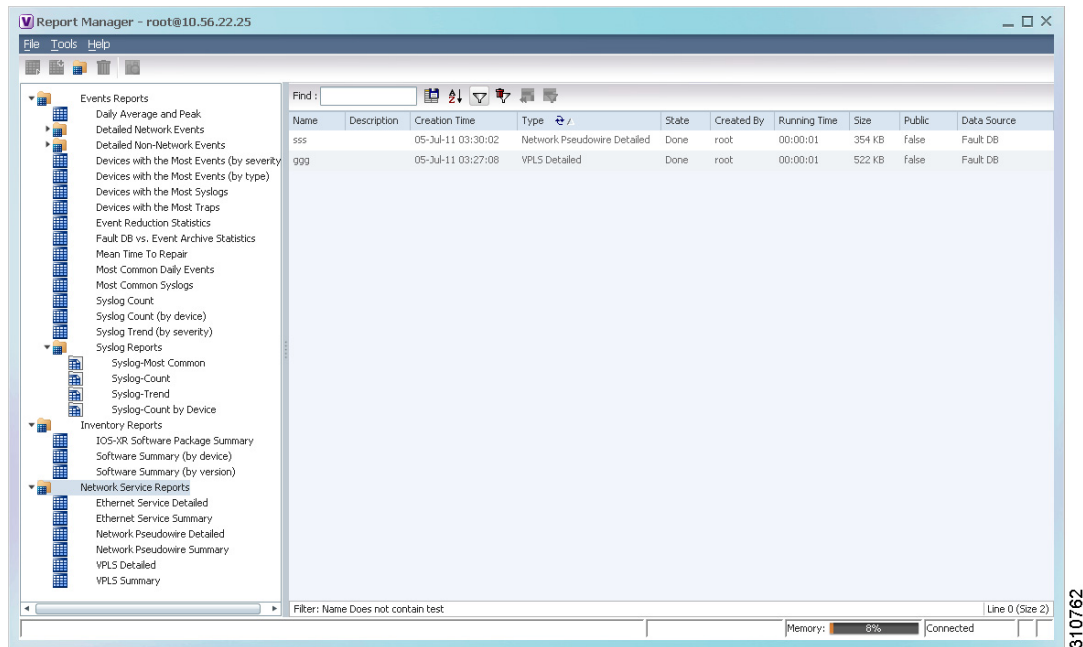

Table 10-8 describes the information displayed in the content pane for each report.

**Table 10-8** Reports Manager Content Pane Information

Attribute	Description
Name	Name of the report. Double-click the report to view the report in HTML format.
Description	Brief description of the report.
Creation Time	Date and time when the report was generated.
Type	Report type.
State	State of the report: Running, Done, Canceled, or Failed. For more information about the Failed state, see <a href="#">Generating Reports</a> , page 10-22.
Created By	User who created the report.
Running Time	Amount of time it takes for the report to be complete.
Size	Report size.

**Table 10-8** Reports Manager Content Pane Information (continued)

Attribute	Description
Public	Availability of the report to other users: <ul style="list-style-type: none"> <li>• True—The report is available to all users.</li> <li>• False—The report is available to only the user who generated the report and the administrator.</li> </ul>
Data Source	Source of the information for the report: Fault Database, Event Archive, or Network Elements.

**Note**

Reports are purged from Prime Network after 90 days by default. This setting can be modified by changing the setting in Prime Network Administration. For more information, see the [Cisco Prime Network 3.8 Administrator Guide](#).

**Related Topics**

- [Report Manager Toolbar, page 10-6](#)
- [Navigation Tree, page 10-7](#)
- [Right-Click Options, page 10-9](#)

## Right-Click Options

Right-click options are available for:

- [Navigation Pane Folders, page 10-9](#)
- [Navigation Pane Reports, page 10-10](#)
- [Content Pane Reports, page 10-10](#)

### Navigation Pane Folders

[Table 10-9](#) describes the options available when you right-click a folder in the navigation pane.

**Table 10-9** Report Manager Navigation Pane Folder Right-Click Options

Option	Description
New Folder	Creates a new folder.
Delete	Deletes a user-defined folder.
Rename	Renames a user-defined folder.
Move	Moves a user-defined folder.
Properties	Displays the Folder Properties window which lists the folder contents. For more information on the Reports Category Properties window, see <a href="#">Viewing Folder and Report Type Properties, page 10-51</a> .

## Navigation Pane Reports

[Table 10-10](#) describes the options available when you right-click a report in the navigation pane.

**Table 10-10 Report Manager Navigation Pane Report Right-Click Options**

Option	Description
Run	Displays the Run Report dialog box so you can run a report of this type specifically for your environment and adds the generated report to the table in the content pane.
Define Report of This Type	This option is available only for Cisco-supplied report types. Displays the Define Report dialog box so you can create a report of this type specifically for your environment, and adds the newly defined report to the navigation tree.
Delete	Deletes a user-defined report.
Move	Moves a user-defined report.
Properties	For a standard report type, displays the Reports Type Properties window which includes a brief description of the report and enables you to generate the report. For more information on the Reports Type Properties window, see <a href="#">Viewing Report Properties, page 10-46</a> . For a user-defined report, displays the Edit report dialog box so that you can modify the currently defined settings and generate the report.

## Content Pane Reports

[Table 10-11](#) describes the options available when you right-click a report in the content pane.

**Table 10-11 Report Manager Content Pane Report Right-Click Options**

Option	Description
View As	Displays the report in the selected format: <ul style="list-style-type: none"> <li>HTML</li> <li>PDF</li> <li>CSV</li> <li>XLS</li> <li>XML</li> </ul> The default option, HTML, is displayed in bold font. For more information on viewing reports, see <a href="#">Viewing and Saving Reports, page 10-41</a> .
Rename	Renames the selected report.

**Table 10-11 Report Manager Content Pane Report Right-Click Options (continued)**

Option	Description
Share or Unshare	Shares the selected reports or limits them to your viewing only. The option toggles between Share and Unshare, as appropriate for the selected reports.  By default, the Share and Unshare options are available only to users with administrator access. These options are available to other users only if an administrator has enabled sharing in Prime Network Administration. For more information, see the <a href="#">Cisco Prime Network 3.8 Administrator Guide</a> .
Delete Report	Deletes the selected reports.
Cancel	This option is displayed only while the selected report is being generated or queued.  Cancels the report that is being generated or is queued.
Show Only Selected Rows	Displays only the rows that you select.
Show All Rows	Displays all table rows that meet the current filtering criteria.
Properties	Displays the Reports Type Properties window, which includes a brief description of the report and enables you to edit its name and description.

- [Report Manager Toolbar, page 10-6](#)

## Report Categories

Prime Network Vision provides reports related to:

- Events—See [Events Reports, page 10-11](#).
- Inventory—See [Inventory Reports, page 10-18](#).
- Network services—See [Network Service Reports, page 10-19](#).

## Events Reports

Prime Network Vision provides the following standard event report types:

- General report types, as described in [Table 10-12](#).
- Detailed network event reports, as described in [Table 10-13](#).
- Detailed non-network event reports, as described in [Table 10-14](#).

**Table 10-12**      **Standard Events Report Types**

Report Name	Description	Data Source
Daily Average and Peak	<p>For each day of the specified time period, the peak number and average rate of syslogs and traps for each of the following time periods:</p> <ul style="list-style-type: none"> <li>• Second</li> <li>• Ten seconds</li> <li>• Minute</li> <li>• Hour</li> <li>• Day</li> </ul>	Fault database
Devices with the Most Events (by severity)	<p>For the specified number of devices with the most events, the following information for each device for the specified time period:</p> <ul style="list-style-type: none"> <li>• Severity of the events associated with the device, sorted by severity</li> <li>• Number of events for each severity</li> </ul> <p>A pie chart presents the information by device and percentage in a graphical format.</p>	Fault database
Devices with the Most Events (by type)	<p>For the specified number of devices with the most events, the following information for each device for the specified time period:</p> <ul style="list-style-type: none"> <li>• Type of events associated with the device</li> <li>• Number of events received for each event type</li> </ul> <p>A pie chart presents the information by device and percentage in a graphical format.</p>	Fault database
Devices with the Most Syslogs	<p>For the specified number of devices with the most syslogs, the number of syslog messages for each device for the specified time period.</p> <p>You can run this report on the Prime Network fault database or the event archive.</p> <p>A pie chart presents the information by device and percentage in a graphical format.</p>	<p>User choice:</p> <ul style="list-style-type: none"> <li>• Fault database</li> <li>• Event archive</li> </ul>
Devices with the Most Traps	<p>For the specified number of devices with the most traps, the number of traps associated with each device for the specified time period.</p> <p>You can run this report on the fault database or the event archive.</p> <p>A pie chart presents the information by device and percentage in a graphical format.</p>	<p>User choice:</p> <ul style="list-style-type: none"> <li>• Fault database</li> <li>• Event archive</li> </ul>

**Table 10-12**      **Standard Events Report Types (continued)**

Report Name	Description	Data Source
Event Reduction Statistics	<p>For the specified devices and time period:</p> <ul style="list-style-type: none"> <li>Names of those tickets with: <ul style="list-style-type: none"> <li>The root cause in the device list</li> <li>The ticket creation time within the specified period</li> </ul> </li> <li>For each ticket type identified: <ul style="list-style-type: none"> <li>Number of tickets of that type</li> <li>Fewest number of correlated events</li> <li>Highest number of correlated events</li> <li>Average number of correlated events</li> </ul> </li> </ul>	Fault database
Fault DB vs. Event Archive Statistics	<p>For each day in the specified time period, the number of each of the following items in the fault database and the event archive:</p> <ul style="list-style-type: none"> <li>Syslogs</li> <li>Traps</li> <li>Tickets</li> <li>Correlated events</li> <li>Uncorrelated events</li> <li>Nonnetwork events</li> <li>Network-originated events</li> <li>Network-originated and service events</li> </ul>	Fault database and event archive
Mean Time to Repair	<p>For the specified devices and time period:</p> <ul style="list-style-type: none"> <li>Names of those tickets with: <ul style="list-style-type: none"> <li>The root cause in the device list</li> <li>The ticket creation time within the specified period</li> </ul> </li> <li>For each ticket type identified: <ul style="list-style-type: none"> <li>Whether the tickets were cleared by the user or network</li> <li>Number of tickets</li> <li>Minimum time (in seconds) to repair</li> <li>Maximum time (in seconds) to repair</li> <li>Average time (in seconds) to repair</li> </ul> </li> </ul> <p><b>Note</b> The time to repair is based on the ticket creation time and the time the ticket was last modified. For example, if you acknowledge a ticket after it has been cleared, the acknowledgement time affects the time to repair for that ticket.</p>	Fault database

**Table 10-12**      **Standard Events Report Types (continued)**

Report Name	Description	Data Source
Most Common Daily Events	<p>For each day in the specified time period:</p> <ul style="list-style-type: none"> <li>Specified number of most common tickets, service events, syslogs, and traps</li> <li>Number of each type of ticket, service event, syslog, and trap</li> <li>If selected, a pie chart presenting the events by percentage in a graphical format</li> </ul>	Fault database
Most Common Syslogs	<p>Most common syslog messages and the number of each for the specified time period and devices.</p> <p>A pie chart presents the information by syslog message and percentage in a graphical format.</p>	Fault database
Syslog Count	<p>Number of syslog messages by type for the specified time period with the times of the first and last occurrences.</p> <p>A pie chart presents the information by syslog message and percentage in a graphical format.</p>	Fault database
Syslog Count (by device)	<p>For each device, the type and number of each syslog message and the times of the first and last occurrences for each type.</p> <p>A pie chart presents the information by device and percentage in a graphical format.</p>	Fault database
Syslog Trend (by severity)	<p>For the specified devices, the trend of specified syslog messages in graph format:</p> <ul style="list-style-type: none"> <li>By priority</li> <li>For the specified time period</li> <li>At the specified intervals</li> </ul>	Fault database

**Table 10-13 Detailed Network Events Report Types**

Report Name	Description	Data Source
Detailed Event Count (by device)	<p>For each device, the following information for the specified time period:</p> <ul style="list-style-type: none"> <li>• For syslogs: <ul style="list-style-type: none"> <li>– Syslog severities</li> <li>– Number of syslogs per severity</li> <li>– Syslog type</li> <li>– Number of each syslog type</li> </ul> </li> <li>• For traps: <ul style="list-style-type: none"> <li>– Trap severities</li> <li>– Number of traps per severity</li> <li>– Trap type</li> <li>– Number of each trap type</li> </ul> </li> <li>• For tickets: <ul style="list-style-type: none"> <li>– Ticket severities</li> <li>– Number of tickets per severity</li> <li>– Ticket type</li> <li>– Number of each ticket type</li> </ul> </li> </ul> <p>You can select a maximum of 1000 devices for this report.</p>	Fault database
Detailed Service Events	<p>For each service event of the specified severities, time period, and devices:</p> <ul style="list-style-type: none"> <li>• Event severity</li> <li>• Event identifier</li> <li>• Timestamp</li> <li>• Brief and detailed descriptions</li> <li>• Device on which the event occurred</li> <li>• Alarm identifier</li> <li>• Ticket identifier</li> <li>• Causing event identifier</li> <li>• Duplication count</li> <li>• Reduction count</li> </ul>	Fault database

**Table 10-13** Detailed Network Events Report Types (continued)

Report Name	Description	Data Source
Detailed Syslogs	<p>For each device that is selected, the following information from the event archive for the specified time period:</p> <ul style="list-style-type: none"> <li>• IP address</li> <li>• Date and time of each syslog, in ascending order</li> <li>• Syslog raw data or description, depending on the data source</li> </ul> <p>The maximum number of syslogs retrieved for this report is 250,000.</p>	User selection: Event archive or fault database
Detailed Tickets	<p>For each ticket of the specified severities, time period, and device:</p> <ul style="list-style-type: none"> <li>• Ticket severity</li> <li>• Ticket identifier</li> <li>• Last modification time</li> <li>• Root event time</li> <li>• Description</li> <li>• Entity that caused the alarm</li> <li>• Whether or not the ticket is acknowledged</li> <li>• Ticket creation time</li> <li>• Event count</li> <li>• Affected devices count</li> <li>• Duplication count</li> <li>• Reduction count</li> <li>• Alarm count</li> </ul>	Fault database
Detailed Traps	<p>For each managed device that is selected, the following information for the specified time period:</p> <ul style="list-style-type: none"> <li>• IP address</li> <li>• Time of trap</li> <li>• SNMP version</li> <li>• Trap description</li> <li>• Generic or device-specific trap OID, if the source is the event archive</li> <li>• Long description, if the data source is the fault database</li> </ul> <p>The maximum number of traps retrieved for this report depends on whether the Long Description check box is selected. When selected, a maximum of 30,000 traps are retrieved. When this check box is not selected, a maximum of 100,000 traps are retrieved for this report.</p>	User Selection: Event archive or fault database

**Table 10-14**      **Detailed Non-Network Events Report Types**

Report Name	Description	Data Source
Detailed Audit Events	<p>For each audit event included in the report for the specified time period, severities, and search criteria:</p> <ul style="list-style-type: none"> <li>• Event severity</li> <li>• Event identifier</li> <li>• Timestamp</li> <li>• Description</li> <li>• Command name</li> <li>• Command signature</li> <li>• Command parameters</li> <li>• Originating IP address</li> <li>• User name</li> </ul>	Fault database
Detailed Provisioning Events	<p>For each provisioning event included in the report for the specified time period, severities, and search criteria:</p> <ul style="list-style-type: none"> <li>• Event severity</li> <li>• Event identifier</li> <li>• Timestamp</li> <li>• Description</li> <li>• Location</li> <li>• User name</li> <li>• Status</li> </ul>	Fault database
Detailed Security Events	<p>For each security event included in the report for the specified time period, severities, and search criteria:</p> <ul style="list-style-type: none"> <li>• Event severity</li> <li>• Event identifier</li> <li>• Timestamp</li> <li>• Description</li> <li>• Location</li> <li>• User name</li> <li>• Originating IP address</li> </ul>	Fault database
Detailed System Events	<p>For each system event included in the report for the specified time period, severities, and search criteria:</p> <ul style="list-style-type: none"> <li>• Event severity</li> <li>• Event identifier</li> <li>• Timestamp</li> <li>• Description</li> <li>• Location</li> </ul>	Fault database

# Generating Reports

You can generate reports in any of the following ways:

- [Generating Reports from Report Manager, page 10-23](#)
- [Generating Reports from the Reports Menu, page 10-38](#)
- [Generating Reports from Prime Network Vision, page 10-39](#)

You can generate reports only for devices that are within your scope.

**Note**

Report Manager generates reports up to 150 MB in size. If you generate a report that exceeds this limit:

- Report Manager window displays Failed in the State column.
- An error message is entered in the log stating that the report failed because the resulting output is too large.

To run the report successfully, enter more specific report criteria or limit the time period covered by the report.

## Database Load and Report Generation

If you generate reports while Prime Network Vision is working under a database load, the reports move to a *Load* mode which is indicated by a system event. While Prime Network Vision is in Load mode, the reports currently running are cancelled and new reports are queued.

After Prime Network Vision returns to normal operation and is no longer operating under a load, a new system event is generated and the queued reports start running.

**Related Topics**

- [Generating Reports from Report Manager, page 10-23](#)
- [Generating Reports from the Reports Menu, page 10-38](#)
- [Generating Reports from Prime Network Vision, page 10-39](#)

## Report Generation Failure

If a report fails to generate successfully, the State column contains the word *Failed*. Click **Failed** to view the reason for the failure. A window is displayed with the cause of the failure, such as *The disk space allocated for report storage is full* or *AVM 84 was restarted while the report was running*.

## Report Generation Canceled

If a report is canceled before it completes, the State column contains the word *Canceled*. Click **Canceled** to view the reason for the cancellation. A window is displayed with the cause of the cancellation, such as *The report was canceled by user <user-name>* or *The report was canceled by the system to prevent system overload*.

## Generating Reports from Report Manager

Prime Network Vision provides three report categories as described in [Report Categories, page 10-11](#). The information that you need to provide when generating a report depends on the report type. The following topics describe the information required to generate each report type:

- [Generating Events Reports, page 10-23](#)
- [Generating Inventory Reports, page 10-31](#)
- [Generating Network Service Reports, page 10-34](#)

**Note**

You can generate reports only for devices that are within your scope.

## Generating Events Reports

To generate an events report using Report Manager:

- Step 1** In Prime Network Vision, Prime Network Events, or Prime Network Administration, choose **Reports > Report Manager**.
- Step 2** In the Report Manager window, choose **Events Reports > report-type**.  
For information on the reports available for events, see [Table 10-12](#).
- Step 3** Generate the report in either of the following ways:
  - Click **Run** in the toolbar.
  - Right-click the report type, then choose **Run**.

The Run Report dialog box is displayed as shown in [Figure 10-4](#). The fields displayed in the Run Report dialog box vary depending on the type of report.

**Figure 10-4** Events Report - Run Report Dialog Box

The dialog box is titled "Run Report - Most Common Syslogs". It contains three main sections: Report Settings, Date Selection, and Device Selection.

**Report Settings:**

- Report Name: Syslogs - Most Common
- Description: Most common syslogs
- Display: 8 Most Common Syslogs
- Report Security: ☒ Private ☐ Public

**Date Selection:**

- ☐ Last: 1 Days
- ☒ From date: Mon 15 / Nov / 2010 10 : 11 : 15
- To date: Tue 16 / Nov / 2010 10 : 11 : 15

**Device Selection:**

- ☒ Select Devices
- ☐ All Devices
- Selected Devices:
  - p1
  - p2
  - c1-npe1-76
  - c2-npe1-crs
  - c7-sw2
  - c7-sw8
  - c7-sw9
  - c7-sw10
  - 10.56.101.75
  - c3-npe1-76
  - c5-npe1-gsr
  - p3
- Buttons: Add, Remove, Clear

At the bottom, there are OK and Cancel buttons. A status bar at the very bottom shows "Memory: 6%", "Connected", and a warning icon.

**Step 4** In the Run Report dialog box, specify the report settings as follows:

- For standard events reports, use the information in [Table 10-17](#).
- For detailed network reports, use the information in [Table 10-18](#).
- For detailed non-network reports, use the information in [Table 10-19](#).

**Table 10-17 Events Report - Run Report Dialog Box Fields**

Option	Description
<b>Report Settings</b>	
Report Name	Enter a unique name for the report, from 1 to 150 characters in length. Report names cannot include the following characters: ;?<>/\#"#* .
Description	Enter a brief description of the report.
Report Security	<p>This field is displayed only if report sharing is enabled in Prime Network Administration.</p> <p>Indicate the level of security for the report by clicking the appropriate option:</p> <ul style="list-style-type: none"> <li>• <b>Private</b>—The report can be viewed and used only by the report creator and the administrator.</li> <li>• <b>Public</b>—The report can be viewed and used by all other users, regardless of whether the devices are listed in the report are in the user's scope.</li> </ul> <p><b>Note</b> You can share reports with others only if sharing is enabled in Prime Network Administration. For more information, see the <a href="#">Cisco Prime Network 3.8 Administrator Guide</a>.</p>
Display <i>n</i>	<p>This field does not appear for all reports.</p> <p>Enter the number of items to be displayed in the generated report.</p>
Data Source	<p>This field does not appear for all reports.</p> <p>Select the source of information to use for the report: Fault Database or Event Archive.</p>
Include pie charts in report output	<p>This field does not appear for all reports.</p> <p>Check the check box to view pie charts in the report with the standard numerical output.</p>
<b>Date Selection</b>	
Last	Specify the length of time before the current date and time, and the unit of measure: seconds, minutes, hours, days, weeks, or months.
From Date To Date	<p>Specify the date range for the report:</p> <ol style="list-style-type: none"> <li>1. Click <b>From Date</b>.</li> <li>2. In the From date field, enter the start date for the time period, or click the drop-down arrow to select the start date from a calendar.</li> <li>3. Enter a time for the start date, using the format HH MM SS.</li> <li>4. In the To Date field, enter the end date for the time period, or click the drop-down arrow to select the end date from a calendar.</li> <li>5. Enter a time for the end date, using the format HH MM SS.</li> </ol>

**Table 10-17**     *Events Report - Run Report Dialog Box Fields (continued)*

Option	Description
<b>Device Selection</b>	
Select Devices	<p><b>Note</b></p> <ul style="list-style-type: none"> <li>You can add only those devices that are within your scope.</li> <li>A user with the Administrator role can select unmanaged devices (by IP address) for reports that run on the Event Archive.</li> </ul> <p>Select devices to include in the report:</p> <ol style="list-style-type: none"> <li>Click <b>Select Devices</b>.</li> <li>Click <b>Add</b>.</li> <li>In the Add Network Element dialog box, select devices using either of the following methods: <ul style="list-style-type: none"> <li>To select devices that meet specific criteria, click <b>Search</b> and enter the required criteria.</li> <li>To select from all network elements, click <b>Show All</b>.</li> </ul> </li> <li>In the list of displayed elements, select the network elements that you want to include in the report. You can select multiple network elements at a time.</li> <li>Click <b>OK</b>.</li> </ol>
All Devices	<p>This field does not appear for all reports.</p> <p>Click <b>All Devices</b> to include all devices in your scope in the report.</p>
<b>Syslog Trend (by Severity) Report—Additional Report Specifications</b>	
Intervals	In the Grouped by drop-down list, choose the unit of time to use for tracking the trend: Seconds, Minutes, Hours, or Days.
Severity	Check the check boxes of the syslog message severities to be included in the report: All, Critical, Major, Minor, Warning, Cleared, Information, and Indeterminate.
Syslog Messages	<p>Specify the syslog messages to be included in the report:</p> <ul style="list-style-type: none"> <li>To include selected syslog messages in the report, in the list of syslog messages on the left, select the required syslog messages, and then click <b>Add Selected</b> to move them to the list of syslog messages on the right.</li> <li>To include all syslog messages in the report, click <b>Add All</b>.</li> </ul> <p>To find syslog messages that match a string, enter the string in the Find field. The list of syslog messages is automatically updated to include only those messages that contain the string you enter.</p> <p>Click the <b>Sort Order</b> button to sort the syslog messages in alphabetic or reverse alphabetic order.</p>

Description Contains	Enter the string that the event must contain to be included in the report.
Command Name Contains	Enter the string that the command name must contain to be included in the report.
Originator IP Contains	Enter the string that the originating IP address must contain to be included in the report.
User Name Contains	Enter the string that the user name must contain to be included in the report.

**Table 10-19 Detailed Non-Network Events Reports - Run Report Dialog Box Fields (continued)**

Option	Description
<b>Detailed Provisioning Events Report—Additional Report Specifications</b>	
Description Contains	Enter the string that the trap must contain to be included in the report.
User Name Contains	Enter the string that the user name must contain to be included in the report.
Status	Choose the statuses to be included in the report: All, Unknown, Configuring, Success, and Fail.
<b>Detailed Security Events Report—Additional Report Specifications</b>	
Description Contains	Enter the string that the event must contain to be included in the report.
Originator IP Contains	Enter the string that the originating IP address must contain to be included in the report.
User Name Contains	Enter the string that the user name must contain to be included in the report.
<b>Detailed System Events Report—Additional Report Specifications</b>	
Description Contains	Enter the string that the event must contain to be included in the report.

**Step 5** Click **OK**.

The report appears in the table in the content pane with a state of Running. When the report is complete, the state changes to Done.

You can view the reports when the state is Done. Occasionally, some report formats require additional time for generation. If so, a progress bar is displayed, indicating that the report is being created and will be available soon.

If the report exceeds 150 MB, the state changes to Failed and an error message is written to the log. We recommend running the report with more specific criteria or a shorter time period to avoid this situation.

If no data is found for the report, the report states that no results were found.

## Generating Network Service Reports

If you generate a detailed network service report on a large-scale setup, a message is displayed in the Run Report dialog box recommending that you apply a filter to limit the size of the report.

To generate a network service report using Report Manager:

- 
- Step 1** In Prime Network Vision, Prime Network Events, or Prime Network Administration, choose **Reports > Report Manager**.
- Step 2** In the Report Manager window, choose **Network Service Reports > *report-type***.  
For information on the standard reports available for network services, see [Table 10-16](#).
- Step 3** Generate the report in either of the following ways:
- Click **Run** in the toolbar.
  - Right-click the report type, then choose **Run**.

The Run Report dialog box is displayed as shown in [Figure 10-6](#).

**Figure 10-6** Network Service Report - Run Report Dialog Box

The dialog box is titled "Run Report - Network Pseudowire Detailed". It contains three main sections: "Report Settings", "Report Contents", and "Maps".

**Report Settings**

- Report Name: Pseudowire Edge Report
- Description: Pseudowire edges
- Report Security: ☒ Private ☐ Public

**Report Contents**

- ☒ Define Filter
- Network Pseudowire Name Contains: [Empty text box]
- Network Pseudowire Type Contains: Edge
- Network Pseudowire Business Tag Contains: [Empty text box]

**Maps**

Available Items: [Empty list box]

Selected Items:

- 123Map
- nsa

Buttons: OK, Cancel

Memory: 5% Connected

237378

**Step 4** Enter the required information the Run Report dialog box as described in [Table 10-21](#).

**Table 10-21 Network Service Report - Run Report Dialog Box Fields**

Field	Description
<b>Report Settings</b>	
Report Name	Enter a unique name for the report, from 1 to 150 characters in length. Report names cannot include the following characters: ;?<>/:\"#* .
Description	Enter a brief description of the report.
Report Security	<p>This field is displayed only if report sharing is enabled in Prime Network Administration.</p> <p>Indicate the level of security for the report by clicking the appropriate option:</p> <ul style="list-style-type: none"> <li>• <b>Private</b>—The report can be viewed and used only by the report creator and the administrator.</li> <li>• <b>Public</b>—The report can be viewed and used by all other users, regardless of whether the devices are listed in the report are in the user's scope.</li> </ul> <p><b>Note</b> You can share reports with others only if sharing is enabled in Prime Network Administration. For more information, see the <a href="#">Cisco Prime Network 3.8 Administrator Guide</a>.</p>
<b>Ethernet Service Reports—Report Contents</b>	
Define Filter	<p>Check the <b>Define Filter</b> check box to enter criteria that must be matched for inclusion in the report.</p> <p>You can specify match criteria in any or all of the following fields.</p>
Ethernet Service Name Contains	Enter a string that must appear in the Ethernet service name for the Ethernet service to be included in the report.
EVC Name Contains	Enter a string that must appear in the EVC name for the EVC to be included in the report.
Ethernet Service Business Tag Contains	Enter a string that must appear in the Ethernet service business tag for the Ethernet service to be included in the report.
EVC Business Tag Contains	Enter a string that must appear in the EVC business tag for the EVC to be included in the report.
Maps	<p>Specify the maps to include in the report:</p> <ul style="list-style-type: none"> <li>• To include specific maps in the report, in the list of maps on the left, select the required maps, and then click <b>Add Selected</b> to move them to the list of maps on the right.</li> <li>• To include all maps in the report, click <b>Add All</b>.</li> </ul> <p>To find maps that match a string, enter the string in the Find field. The list of maps is automatically updated to include only those maps that contain the string you enter.</p> <p>Click the <b>Sort Order</b> button to sort the maps alphabetically or in reverse alphabetic order.</p>

**Table 10-21 Network Service Report - Run Report Dialog Box Fields (continued)**

Field	Description
<b>Network Pseudowire Reports—Report Contents</b>	
Define Filter	<p>Check the <b>Define Filter</b> check box to enter criteria that must be matched for inclusion in the report.</p> <p>You can specify match criteria in any or all of the following fields.</p>
Network Pseudowire Name Contains	Enter a string that must appear in the network pseudowire name for the pseudowire to be included in the report.
Network Pseudowire Type	In the drop-down list, choose the type of network pseudowire to be included in the report.
Network Pseudowire Business Tag Contains	Enter a string that must appear in the network pseudowire business tag for the pseudowire to be included in the report.
Maps	<p>Specify the maps to include in the report:</p> <ul style="list-style-type: none"> <li>To include specific maps in the report, in the list of maps on the left, select the required maps, and then click <b>Add Selected</b> to move them to the list of maps on the right.</li> <li>To include all maps in the report, click <b>Add All</b>.</li> </ul> <p>To find maps that match a string, enter the string in the Find field. The list of maps is automatically updated to include only those maps that contain the string you enter.</p> <p>Click the <b>Sort Order</b> button to sort the maps alphabetically or in reverse alphabetic order.</p>
<b>VPLS Reports—Report Contents</b>	
Define Filter	<p>Check the <b>Define Filter</b> check box to enter criteria that must be matched for inclusion in the report.</p> <p>You can specify match criteria in any or all of the following fields.</p>
VPLS Name Contains	Enter a string that must appear in the VPLS name for the VPLS or H-VPLS to be included in the report.
VPLS Business Tag Contains	Enter a string that must appear in the VPLS business tag for the VPLS or H-VPLS to be included in the report.
Maps	<p>Specify the maps to be included in the report:</p> <ul style="list-style-type: none"> <li>To include specific maps in the report, in the list of maps on the left, select the required maps, and then click <b>Add Selected</b> to move them to the list of maps on the right.</li> <li>To include all maps in the report, click <b>Add All</b>.</li> </ul> <p>To find maps that match a string, enter the string in the Find field. The list of maps is automatically updated to include only those maps that contain the string you enter.</p> <p>Click the <b>Sort Order</b> button to sort the maps alphabetically or in reverse alphabetic order.</p>

**Step 5** Click **OK**.

The report appears in the table in the content pane with a state of Running. When the report is complete, the state changes to Done.

You can view the reports when the state is Done. Occasionally, some report formats require additional time for generation. If so, a progress bar is displayed, indicating that the report is being created and will be available soon.

If the report exceeds 150 MB, the state changes to Failed and an error message is written to the log. We recommend running the report with more specific criteria or a shorter time period to avoid this situation.

If no data is found for the report, the report states that no results were found.

## Generating Reports from the Reports Menu

To generate reports quickly and without opening the Reports Manager window, choose **Reports > Run Report > folder > report-type**. The menus include all standard folders and reports, and any folders or reports that you have created. After entering the required information, you can view the report as soon as it is generated or at a later time.

**Note**

---

You can generate reports only for devices that are within your scope.

---

To generate a report from the Reports menu:

---

**Step 1** Choose **Reports > Run Report > folder > report-type** where:

- *folder* is the required folder.
- *report-type* is the required type of report.

**Step 2** In the Run Report dialog box, enter the required information. For more information on the options in the Run Report dialog box, see [Generating Reports, page 10-22](#).**Step 3** Click **OK**.**Step 4** In the Running Report dialog box, select the required viewing options:

- a. Check the **Open Report Manager to monitor status** check box to open the Report Manager window so that you can view the report generation process. Uncheck the check box to proceed without opening the Report Manager window.
- b. Check the **View report immediately upon completion** check box to view the report as soon as it is generated. If you enable this option, the report is displayed in HTML format as soon as it is complete. Uncheck the check box to view the report at a later time by using Report Manager.

**Step 5** Click **OK**.

Depending on your selections in [Step 4](#), the Report Manager window is displayed, the report is displayed, or the report is available for viewing at a later time.

---

## Generating Reports from Prime Network Vision

Prime Network Vision enables you to run reports on selected devices from the map and list views.

#### Note

You can generate reports only for devices that are within your scope.

To generate a report from Prime Network Vision:

---

**Step 1** In Prime Network Vision, select the required devices in the map or list view.

**Step 2** In the navigation tree or content pane, right-click the selected devices, then choose **Run Report > folder > report-type**.

**Step 3** In the Run Report dialog box, enter the required information as described in [Generating Reports, page 10-22](#).

The devices that you select in the navigation pane or content pane are automatically included in the report.

**Step 4** Click **OK**.

**Step 5** In the Running Report dialog box, specify the desired viewing options:

- a. Check the **Open Report Manager to monitor status** check box to open the Report Manager window so that you can view the report generation process. Uncheck the check box to proceed without opening the Report Manager window.
- b. Check the **View report immediately upon completion** check box to view the report as soon as it is generated. If you enable this option, the report is displayed in HTML format as soon as it is complete. Uncheck the check box to view the report at a later time by using Report Manager.

Depending on your selections in [Step 5](#), the Report Manager window is displayed, the report is displayed, or the report is available for viewing at a later time.

# Managing Reports

Prime Network provides the following options for working with reports:

- [Managing the Maximum Number of Concurrent Reports, page 10-40](#)
- [Viewing and Saving Reports, page 10-41](#)
- [Renaming Reports, page 10-42](#)
- [Sharing Reports, page 10-43](#)
- [Moving Reports Between Folders, page 10-44](#)
- [Deleting Reports, page 10-45](#)
- [Viewing Report Properties, page 10-46](#)

## Managing the Maximum Number of Concurrent Reports

Prime Network enables you to run multiple reports at the same time. When the maximum number of concurrent reports is running, new report requests are queued for generation and have the status Queued ( $n$ ) where  $n$  is the number in the report queue. When a running report moves to a Completed, Failed, or Cancelled state, the first report in the queue starts running.

The maximum number of concurrent reports is set at 5 by default. As the event rate approaches the maximum committed event rate, we recommend that you decrease the maximum number of concurrent reports. The maximum number of concurrent reports is defined in the registry, in `reports.xml`, under `site/reports/reports-setting/reports-running-settings/maxRunningReports`.

### Note

Changes to the registry should only be carried out with the support of Cisco. For details, contact your Cisco account representative.

To change the maximum number of concurrent reports, use the **runRegTool** command (located in *ANAHOME/Main*) as follows:

```
./runRegTool.sh -gs 127.0.0.1 set 0.0.0.0  
site/reports/reports-setting/reports-running-settings/maxRunningReports value
```

where *value* is the new maximum number of concurrent reports.

You do not need to restart any AVMs after entering this command.

For more information on the **runRegTool** command, see the [Cisco Prime Network 3.8 Administrator Guide](#).

## Viewing and Saving Reports

You can view any reports that appear in the Report Manager content pane with the state Done. After viewing a report, you can save it in any of the available formats.

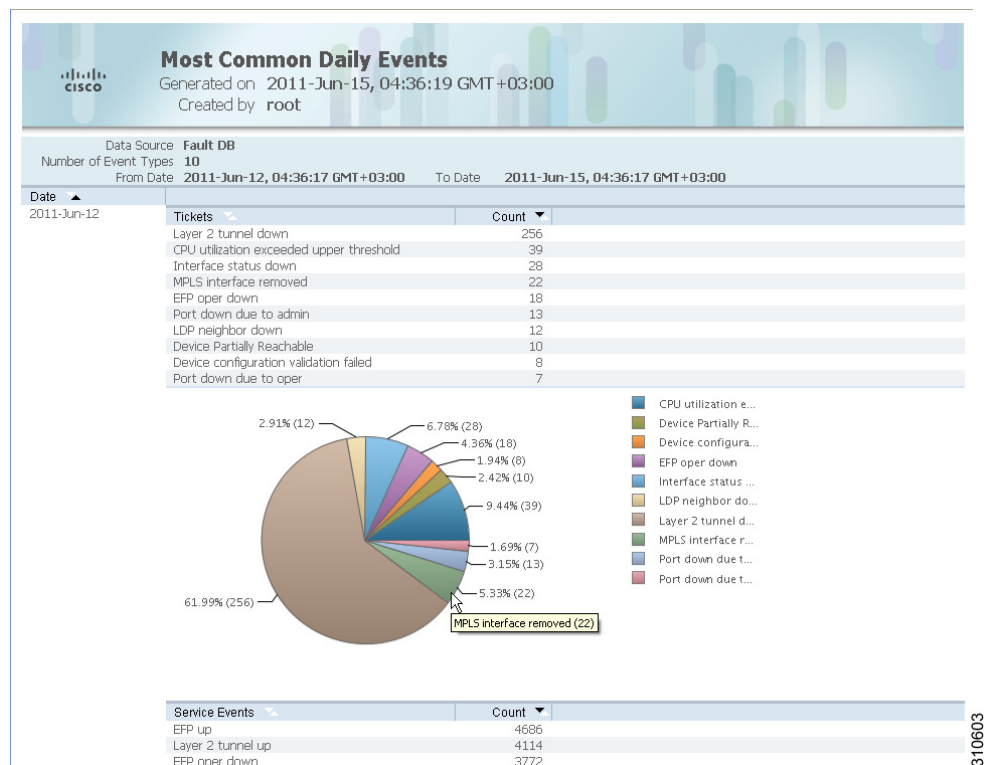

**Note**

Reports are purged from Prime Network after 90 days by default. This setting can be modified by changing the setting in Prime Network Administration. For more information, see the [Cisco Prime Network 3.8 Administrator Guide](#).

To view and save a report:

- 
- Step 1** Choose **Reports > Report Manager**.
- Step 2** In the navigation pane, locate the required report in either of the following ways:
- Select the folder containing the report.
  - Select the report type.
- Step 3** In the content pane, right-click the report, then choose **View As > format** where *format* is one of the following:
- **HTML**—Displays the report in a browser window. Clicking a column heading in the report sorts the report by that value; clicking the column heading again sorts the data in the reverse order. HTML is the default format.
  - **PDF**—Displays a PDF version of the report.
  - **CSV**—Creates a CSV version of the report that you can either save to a specific location or view using another application. The CSV version contains only the report data; it does not contain the header information, layout, or formatting information that is available in other formats.
  - **XLS**—Creates an XLS version of the report that you can either save to a specific location or view using another application, such as Microsoft Excel.
  - **XML**—Creates an XML version of the report that you can either save to a specific location or view using an XML editor or viewer.

[Figure 10-7](#) is an example of the Most Common Daily Events report in HTML format. The data is sorted by the Count column, in descending order.

**Figure 10-7** Most Common Daily Events Report Example

**Step 4** Save the report as required.

- [Sharing Reports, page 10-43](#)
- [Moving Reports Between Folders, page 10-44](#)

## Renaming Reports

You can rename:

- Any report type that you defined.
- Any generated report that you have access to.

You cannot rename any of the Prime Network standard report types.

### Renaming a User-Defined Report Type

#### Note

When you rename a report type, the new name applies to only those reports that you run after changing the name; it does not change the names of reports that were run prior to changing the name.

To rename a user-defined report type:

- 
- Step 1** In the navigation tree, select the user-defined report type.
- Step 2** Right-click the report type, then choose **Properties**.
- Step 3** In the Edit dialog box, enter a new name for the report type in the Report Name field, using the following conventions:
- The name can contain 1 to 150 characters.
  - The name cannot include the following characters: ;?<>/:\ "#\*!.
- Step 4** Click **OK**.
- The navigation pane is refreshed and the report type is displayed with the new name.
- 

## Renaming a Generated Report

To rename a report:

- 
- Step 1** Choose **Reports > Report Manager**.
- Step 2** In the content pane, right-click the report that you want to rename, then choose **Rename** or **Properties**.
- Step 3** In the Name field, enter the new name for the report, using the following conventions:
- The name can contain 1 to 150 characters.
  - The name cannot include the following characters: ;?<>/:\ "#\*!.
- Step 4** Click **OK**.
- The content pane is refreshed and the report is displayed with the new name.
- 

### Related Topics

- [Viewing Report Properties, page 10-46](#)

## Sharing Reports

Prime Network enables you to share reports that you generate with other users, or limit access to a report to only you and the administrator.

### Note

You can share reports with others only if sharing is enabled in Prime Network Administration. For more information, see the [Cisco Prime Network 3.8 Administrator Guide](#).

## Sharing a Report

To share access to a report that you generated:

- 
- Step 1** Choose **Reports > Report Manager**.
- Step 2** In the navigation pane, locate the required report in either of the following ways:
- Select the folder containing the report.
  - Select the report type.
- Step 3** In the content pane, right-click the report that you want to share, then choose **Share**.  
The report is available to all system users for viewing and using.
- 

## Limiting Access to a Report

To limit access to a report that you generated and subsequently shared:

- 
- Step 1** Choose **Reports > Report Manager**.
- Step 2** In the navigation pane, locate the required report in either of the following ways:
- Select the folder containing the report.
  - Select the report type.
- Step 3** In the content pane, right-click the report that you want to limit access to, then choose **Unshare**.  
The report can be viewed and used by only you and the administrator.
-

- [Moving Reports Between Folders, page 10-44](#)

## Moving Reports Between Folders

You can move a report type that you have defined from the current folder to another folder in the navigation tree.

### Note

You cannot move a standard report type from one folder to another.

To move a report type to a new folder:

- 
- Step 1** Choose **Reports > Report Manager**.
- Step 2** In the navigation tree, select the required report that you have defined.

- Step 3** Do either of the following:
- Click **Move** in the toolbar.
  - Right-click the report, then choose **Move**.
- Step 4** In the Move To dialog box, select the folder to which you want to move the report.
- Step 5** Click **OK**.
- The Report Manager window is refreshed and the report appears in the specified folder.
- 

**Related Topics**

- [Viewing and Saving Reports, page 10-41](#)
- [Renaming Reports, page 10-42](#)
- [Sharing Reports, page 10-43](#)

## Deleting Reports

You can delete reports to which you have access.

To delete a report:

- 
- Step 1** Choose **Reports > Report Manager**.
- Step 2** In the navigation pane, locate the required report in either of the following ways:
- Select the folder containing the report.
  - Select the report type.
- Step 3** In the content pane, select the required report.
- Step 4** Delete the report in either of the following ways:
- Right-click the report, then choose **Delete Report**.
  - Click **Delete Report** in the toolbar.
- Step 5** In the Delete Report confirmation window, click **Yes** to confirm deletion.
- The Report Manager window is refreshed and the deleted report no longer appears.
- 

**Related Topics**

## Viewing Report Properties

The Report Properties dialog box enables you to view the report settings and to modify some of them. To view report properties, and optionally change the name, description, or access:

- Step 1** Choose **Reports > Report Manager**.
- Step 2** In the navigation pane, locate the required report in either of the following ways:
  - Select the folder containing the report.
  - Select the report type.
- Step 3** In the content pane, right-click the selected report, then choose **Properties**.  
The Report Properties dialog box is displayed, as shown in [Figure 10-8](#).

**Figure 10-8** Report Properties Dialog Box

The Report Properties dialog box contains the following information about the report:

- Name
- Description
- Type
- Source of the information
- Date and time it was created
- User who created it
- Size
- State
- Access

**Step 4** Change the information in the following fields as required:

- Name
- Description
- Report Security

**Step 5** Click **OK**.

---

## Defining Report Types

You can modify any of the report types provided by Prime Network so that it better suits your needs and environment. This is extremely beneficial if you generate a particular type of report for specific devices or events on a regular basis.

To define a report type:

---

**Step 1** Choose **Reports > Report Manager**.

**Step 2** In the navigation pane, select the existing report type on which you want to base your report type and then do either of the following:

- Right-click the existing report type, then choose **Define Report of This Type**.
- Click **Define Report of This Type** in the toolbar.

**Step 3** In the Define report of type dialog box, specify the options using the information in [Generating Reports, page 10-22](#).

**Step 4** In the Location field, use the specified reports folder or click **Browse** to select a different folder.

**Step 5** Click **OK**.

The newly defined report type appears in the navigation tree in the specified folder.

## Working with Report Folders

Prime Network provides the following options for working with report folders:

- [Creating Folders, page 10-48](#)
- [Moving Folders, page 10-49](#)
- [Renaming Folders, page 10-49](#)
- [Deleting Folders, page 10-50](#)
- [Viewing Folder and Report Type Properties, page 10-51](#)

## Creating Folders

Prime Network enables you to create additional report folders in Report Manager.

To create a report folder:

---

**Step 1** Choose **Reports > Report Manager**.

**Step 2** Select a folder in which to place the new folder.

**Step 3** Do one of the following:

- Click **New Folder** in the toolbar.
- Right-click the folder, then choose **New Folder**.

**Step 4** In the New Folder dialog box, enter a name for the folder.

**Step 5** Click **OK**.

The navigation pane is refreshed and the new folder is displayed.

- Step 6** To move the new folder to another folder, or to the top level in the folder hierarchy:
- In the navigation pane, select the newly created folder, and then do one of the following:
    - Click **Move** in the toolbar.
    - Right-click the folder, then choose **Move**.
  - In the Move To dialog box, select the location where you want the folder to reside.
  - Click **OK**.
- The folder is displayed in the new location.
-

## Moving Folders

Prime Network enables you to move folders that you have created in Report Manager. You cannot move the Events Reports, Inventory Reports, or Network Service Reports folder.

To move a report folder:

- 
- Step 1** Choose **Reports > Report Manager**.
- Step 2** In the navigation pane, select the folder you want to move, and then do one of the following:
- Click **Move** in the toolbar.
  - Right-click the folder, then choose **Move**.
- Step 3** In the Move To dialog box, select the location where you want the folder to reside.
- Step 4** Click **OK**.

The navigation pane is refreshed and the folder is displayed in the new location.

## Renaming Folders

Prime Network enables you to rename folders that you have created in Report Manager. You cannot:

- Rename a folder that resides at the highest level in the hierarchy, such as the Events Reports, Inventory Reports, or Network Service Reports folder.
- Use the same name for different folders that reside at the same level in the hierarchy.

To rename a report folder:

- 
- Step 1** Choose **Reports > Report Manager**.
- Step 2** In the navigation pane, select the folder you want to rename, and then do one of the following:
- Click **Rename** in the toolbar.
  - Right-click the folder, then choose **Rename**.
- Step 3** In the Rename Folder dialog box, enter the new name for the folder.
- Step 4** Click **OK**.

The navigation pane is refreshed and the folder is displayed with the new name.

---

#### Related Topics

## Deleting Folders

You can delete folders that you have created in Report Manager if they are empty. You cannot delete the following folders:

- Events Reports
- Detailed Network Events
- Detailed Non-Network Events
- Inventory Reports
- Network Service Reports
- User-created folders that contain other folders or report types

To delete a report folder:

- 
- Step 1** Choose **Reports > Report Manager**.
- Step 2** In the navigation pane, select the folder you want to delete, and then do one of the following:
- Click **Delete** in the toolbar.
  - Right-click the folder, then choose **Delete**.
- Step 3** In the Confirm Folder Delete dialog box, click **Yes** to confirm the deletion.

The navigation pane is refreshed and the folder no longer appears.

## Viewing Folder and Report Type Properties

The following topics describe how to view properties for folders and report types:

- [Viewing Report Folder Properties, page 10-51](#)
- [Viewing Report Type Properties, page 10-52](#)

### Viewing Report Folder Properties

The Report Properties window enables you to view report properties and to add folders.

To view report properties:

- Step 1** Choose **Reports > Report Manager**.
- Step 2** In the navigation pane, right-click the required folder, then choose **Properties**.  
The Folder Properties window is displayed, as shown in [Figure 10-9](#).

**Figure 10-9** Folder Properties

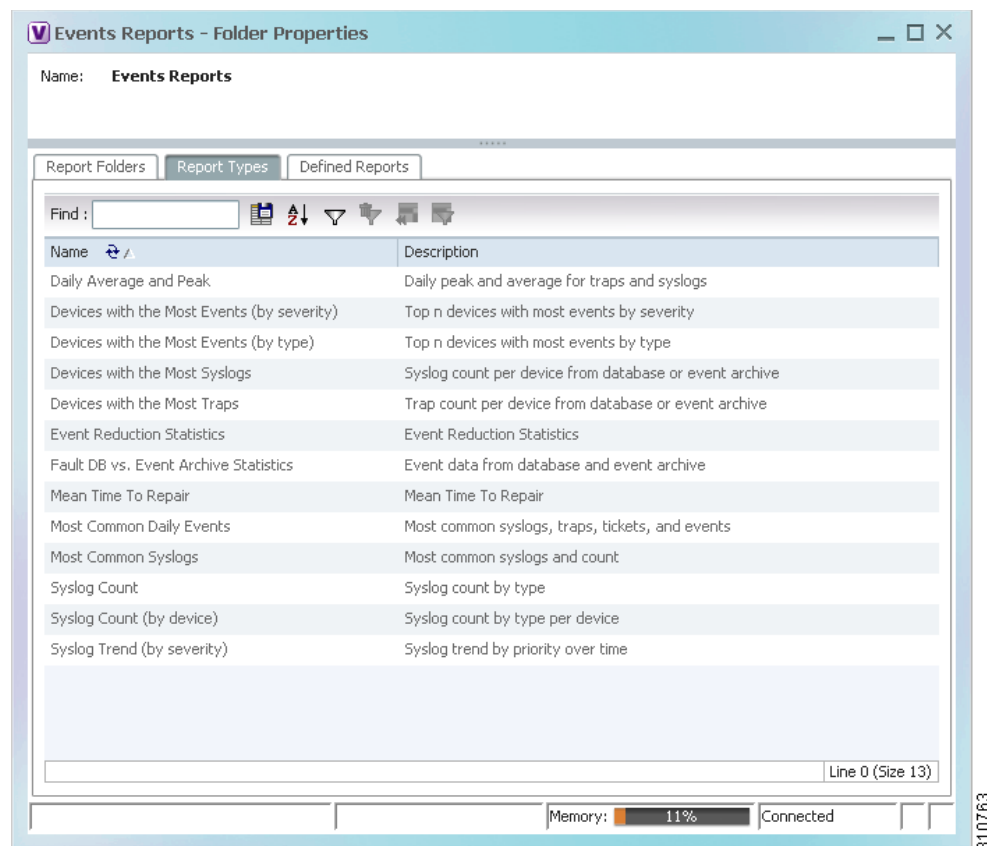

Table 10-22 describes the information that is displayed in each tab, depending on the folder's contents.

**Table 10-22** Folder Properties Window

Field	Description
<b>Report Folders Tab</b>	
Name	Name of the folder included in the selected folder.
<b>Report Types Tab</b>	
Name	Name of the report type included in the selected folder.
Description	Description of the report type included in the selected folder.
<b>Defined Reports Tab</b>	
Name	Name of the user-defined report in the selected folder.
Description	Description of the user-defined report in the selected folder.
Type	Report type on which the user-defined report is based.
Public	Status of public access to the report: True or False.
