Release Notes for Cisco CVR100W Wireless-N VPN Router Firmware Version 1.0.1.19

March 2013

These Release Notes describe the new features, resolved issues, and known issues in the Cisco CVR100W Wireless-N VPN Router firmware version 1.0.1.19.

Contents

This document includes the following topics:

New Features

The following new features were supported in firmware version 1.0.1.19:

- IPsec site-to-site VPN for setting up a single gateway-to-gateway VPN tunnel.

- IGMP Snooping and IGMP Proxy for both Ethernet ports and SSIDs.

- Port management for all Ethernet ports.

- Support for password complexity settings and verification.

- Configure Cisco-Simple-Connect wireless network on the **Wireless** > **Basic Settings** page.

Resolved Issues

The following problems were fixed in firmware version 1.0.1.19:

Ref Number	Description
CSCua38482	IGMP protocol packets cannot be forwarded between the wireless clients and the wired clients on the LAN side.
CSCua96531	Fast repeated switching on and off of the Cisco-Simple-Connect function on the unit causes the WLAN to operate abnormally.

Known Issues

The following table lists the known issues in firmware version 1.0.1.19:

Ref Number	Description
CSCtx72346	Unable to block preinstalled ActiveX applications when Block ActiveX is enabled on the unit. **Workaround** Manually clean up the browser cache.
CSCtx72378	The wireless guest clients that are connected to the WDS slave devices cannot access the Internet. **Workaround** None.
CSCue86796	IGMP Snooping cannot work when the multicast source is located at the WLAN side. **Workaround** None.
CSCue86814	The wireless guest clients can join the multicast group without web authentication. **Workaround** None.
