These Release Notes describe the enhancements in the Cisco WRV210 firmware version 1.1.17.

Contents

This document includes the following topics:

- [Changes Since Cisco WRV210 Firmware Version 1.1.16](#)
- [Related Information](#)

Changes Since Cisco WRV210 Firmware Version 1.1.16

Changes to the GUI

In firmware version 1.1.17, the web-based configuration utility now supports the following languages:

- English
- Spanish
- French
- Italian

- Portuguese
- German

Known Issues

The following are known issues.

- When the router is set to the Router mode, the WAN port does not get a DHCP IP address.
- You must enable Windows Firewall on Windows Vista for QuickVPN Client to function properly.

This is because the IPSec service on Vista is disabled when Windows Firewall is disabled.

- There is a known issue with Windows XP SP2 Firewall where ICMP packets are always dropped by the Firewall when the Firewall is enabled.

The issue causes the QuickVPN Client to fail in establishing a tunnel with the remote QuickVPN Server.

Microsoft has released a patch to fix this issue. After you install the patch, the issue should be resolved.
