

About This Guide

Revised: May 15, 2012

This guide describes how to upgrade from Cisco PIX Version 6.3 or 6.2 to Cisco PIX Security appliance Version 7.0. The upgrade to PIX Security appliance Version 7.0 is generally seamless, and requires little manual intervention on your part. This guide describes the changed and deprecated features and commands in detail. Examples of these changes are also included. New features added in PIX Security appliance Version 7.0 are briefly introduced in this guide.

The target audience for this guide is a security appliance administrator with an understanding of CLI commands and features, and experience configuring PIX.

Obtaining Documentation and Submitting a Service Request

For information on obtaining documentation, submitting a service request, and gathering additional information, see the monthly *What's New in Cisco Product Documentation*, which also lists all new and revised Cisco technical documentation, at:

<http://www.cisco.com/en/US/docs/general/whatsnew/whatsnew.html>

Subscribe to the *What's New in Cisco Product Documentation* as an RSS feed and set content to be delivered directly to your desktop using a reader application. The RSS feeds are a free service. Cisco currently supports RSS Version 2.0.
