

INDEX

A

AAA, comparing VPN 3000 with ASA **1-6**
AAA server groups, adding AAA hosts **5-23**
AAA servers, tunnel group **2-3**
accounting
 management traffic, VPN 3000 vs. ASA **1-6**
 RADIUS, comparing VPN 3000 with ASA **1-6**
ACL manager **5-16**
ACLS
 adding **5-15**
 bypassing
 LAN-to-LAN IPSec traffic **4-20**
 remote access **4-32**
 comparing VPN 3000 with ASA **1-9**
 configuring for LAN-to-LAN **4-16**
 downloadable **1-4**
adaptive security appliance, overview **2-1**
Advanced Inspection and Prevention Security Services Module (AIPSSM) **1-3**
AES **4-12**
Aggressive Mode **1-3**
AIP SSM **1-3**
Are You There (AYT) firewall policy **5-9, 5-14**
ASA system, overview **2-1**
authentication, certificate **4-6**

B

bandwidth reservation, comparing VPN 3000 with ASA **1-8**
base group **2-2**

C

Central Protection Policy (CPP) **5-9, 5-14**
certificate enrollment
 authenticating to the CA **4-6**
 generating key pairs **4-2**
 summary of steps **4-2**
 trustpoint configuration **4-4**
certificate management in ASDM **4-8**
CLI **1-3**
client address assignment method, tunnel group **2-3**
client configuration parameters, group policy **2-5**
client firewall **5-13**
 Are You There (AYT) policy **5-9, 5-14**
 Central Protection Policy (CPP) **5-9, 5-14**
 configuring **5-9**
 allowing HTTP traffic **5-17**
 default **5-9**
 rules for firewall filters **5-9**
 group policy **5-11**
 local **5-9**
 policies **5-13**
 client firewall options, group policy **2-5**
 configuring
 AAA hosts **5-23**
 ACLs **4-16, 5-15**
 address management method **3-3**
 address pools **5-20**
 administrator password **3-4**
 authentication **3-3**
 client firewall **5-9**
 crypto map, IPSec LAN-to-LAN tunnel **4-18**
 default client firewall **5-9**

dynamic crypto map, remote-access tunnel [4-30](#)
 extended access list rule [5-15](#)
 external authentication [5-26](#)
 external server [5-20](#)
 external server group [5-21](#)
 group policy, client firewall [5-11](#)
 interfaces
 IPSec LAN-to-LAN tunnel [4-10, 4-14](#)
 remote-access tunnel [4-22, 4-25](#)
 internal server user database [3-3](#)
 IP interfaces [3-2](#)
 IPSec group [3-3](#)
 IPSec LAN-to-LAN tunnel [4-9](#)
 ISAKMP policy
 IPSec LAN-to-LAN tunnel [4-11](#)
 remote-access tunnel [4-23](#)
 load balancing [6-1](#)
 network list [5-1](#)
 QoS [6-5](#)
 RADIUS [5-20](#)
 split tunneling [5-1](#)
 system information [3-2](#)
 transform set, remote-access tunnel [4-27](#)
 tunnel group
 IPSec LAN-to-LAN tunnel [4-17](#)
 remote-access tunnel [4-28](#)
 split tunneling [5-6](#)
 tunneling protocols and options [3-2](#)
 user access, remote-access tunnel [4-26](#)
 configuring users [1-3](#)
 connection timeout, TCP [1-4](#)
 connection type, tunnel group [2-3](#)
 crypto map
 applying to interfaces [4-20](#)
 configuring for LAN-to-LAN [4-18](#)
 creating for using dynamic crypto map [4-32](#)

D

data integrity, Phase 2, default setting [1-2](#)
 dbgtrace logging levels, security appliance [1-3](#)
 DefaultL2LGroup [2-2](#)
 DefaultRAGroup [2-2](#)
 Denial of Service (DoS) attack [1-3](#)
 DES, IKE policy keywords (table) [4-12](#)
 DfltGrpPolicy [2-3](#)
 Diffie-Hellman, groups supported [4-12](#)
 DNS servers, group policy [2-5](#)
 documentation
 additional [ix](#)
 cautions [xi](#)
 notes [xi](#)
 DoS attack [1-3](#)
 dynamic crypto map
 configuring for remote access [4-30](#)
 crypto map usage [4-32](#)

E

encryption algorithm, default [1-1](#)
 enrolling for certificate
 authenticating to the CA [4-6](#)
 generating key pairs [4-2](#)
 summary of steps [4-1](#)
 trustpoint configuration [4-4](#)
 enrolling for identity certificate [4-7](#)
 extended access list rule [5-15](#)
 external authentication, configuring for tunnel group [5-26](#)
 external server
 configuring [5-20](#)
 protocols supported [5-22](#)
 external server group, configuring [5-21](#)
 EzVPN client [2-6](#)

F

fallback, VPN 3000 vs. ASA **1-6**
 feature map, VPN 3000 to security appliance **1-1**
 filters
 comparing VPN 3000 with ASA **1-9**
 group policy **2-4**
 VPN 3000 **1-4**
 firewall
 client **5-9**
 unlocking, comparing VPN 3000 with ASA **1-9**
 firewall policy **5-13**
 firewall types **5-13**

G

Group 5, Diffie Hellman **4-12**
 group policy
 attributes **2-4**
 client firewall **5-11**
 default **2-3**
 defined **2-4**
 split tunneling **5-4**
 groups **2-2**

H

HTTP traffic **5-17**
 hub-and-spoke configuration **1-3**
 hybrid server group, support on VPN 3000 vs. ASA **1-6**

I

identity, group policy **2-4**
 identity certificate, enrolling **4-7**
 IKE
 negotiation **1-2**
 Phase 2 Data Integrity, enabling **1-10**

policy keywords **4-11**
 inspection, packet **1-3**
 interfaces
 configuring for LAN-to-LAN **4-10**
 configuring for remote access **4-22, 4-25**
 IP address pool, configuring **5-20**
 IPSec
 comparing VPN 3000 with ASA **1-6**
 LAN-to-LAN, permitting **4-20**
 parameters
 group policy **2-5**
 tunnel group **2-3**
 remote access, permitting **4-32**
 tunnel mode **4-14**
 IPSec LAN-to-LAN tunnel
 configuring ACLs **4-16**
 configuring crypto map **4-18**
 configuring interfaces **4-10, 4-14**
 configuring ISAKMP Policy **4-11**
 configuring tunnel group **4-17**
 ISAKMP
 configuring **4-11, 4-23**
 enabling Phase 2 data integrity **1-10**

K

key length, RSA **1-5**
 key pairs, generating **4-2**

L

L2TP, L2TP over IPSec, and PPTP **1-1**
 LAN-to-LAN tunnel, configuring **4-9**
 license, comparing of VPN 3000 with ASA **1-5**
 load balancing
 comparing VPN 3000 with ASA **1-7**
 configuring **6-1**
 logging, event, VPN 3000 **1-3**

low-latency queueing (LLQ), comparing VPN 3000 with ASA **1-8**

low memory, action **1-2**

M

management traffic accounting, VPN3000 vs. ASA **1-6**

managing certificates in ASDM **4-8**

MD5 **4-12**

memory red condition **1-2**

minimum bandwidth guarantee, comparing VPN 3000 with ASA **1-8**

modes, comparing VPN 3000 with ASA **1-7**

N

navigation map for ASDM **A-1**

network list, configuring **5-1**

network mask **1-4**

nice reboot **1-2**

O

object group, comparing VPN 3000 with ASA **1-7**

P

packet inspection **1-3**

permitting IPSec traffic

 LAN-to-LAN **4-20**

 remote access **4-32**

Phase 2 data integrity

 default setting **1-2**

 enabling **1-2, 1-10**

PKI

 certificate **1-5**

 implementation on ASA **2-8**

 new CLI commands **2-8**

policing, comparing VPN 3000 with ASA **1-8**

protocols, external servers **5-22**

Q

Quality of Service (QoS)

 comparing VPN 3000 with ASA **1-8**

 configuring **6-5**

Quick Configuration program, VPN 3000 **3-1**

R

RADIUS accounting, VPN 3000 vs. ASA **1-6**

RADIUS server, configuring **5-20**

reboot, nice **1-2**

related documentation **x**

remote-access tunnel

 configuring **4-21**

 configuring dynamic crypto map **4-30**

 configuring interfaces **4-22, 4-25**

 configuring ISAKMP policy **4-23**

 configuring transform set **4-27**

 configuring tunnel group **4-28**

 configuring user access **4-26**

RSA key length **1-5**

S

servers, group policy **2-5**

service policy rule wizard **6-5**

session timeout, TCP **1-4**

SHA, IKE policy keywords (table) **4-12**

Split DNS **5-8**

split tunneling

 configuring **5-1**

 firewalls **5-9**

 group policy **5-4**

 tunnel group **5-6**

syslog levels, security appliance **1-3**

T

TCP connection timeout **1-4**
 timeout, TCP connection **1-4**
 transform set, configuring for remote access **4-27**
 Triple DES, IKE policy keyword (table) **4-12**
 trustpoint **1-5, 4-4**
 tunnel group
 attributes **2-2**
 configuring for LAN-to-LAN **4-17**
 configuring for remote access **4-28**
 default **2-2**
 external authentication **5-26**
 tunneling protocols, group policy **2-4**

W

WebVPN
 comparing VPN 3000 with ASA **1-5**
 connection parameters, group policy **2-6**
 wildcard mask **1-4**
 WINS servers, group policy **2-5**
 wizards
 service policy rule **6-5**
 VPN **3-4**

U

user management, differences from the VPN 3000 **2-2**
 users
 account attributes **2-7**
 adding for remote access **4-26**
 configuring **1-3**

V

VPN 3000 features in ASA **2-1**
 VPN 3002 hardware client See EzVPN client
 VPN client
 configuring a client firewall to allow HTTP traffic **5-17**
 firewall options **5-9**
 firewall policy **5-14**
 stateful firewall **5-13**
 VPN Wizard **3-4**
