

INDEX

A

AAA, comparing VPN 3000 with ASA **21**
AAA server groups, adding AAA hosts **107**
accounting
 management traffic, VPN 3000 vs. ASA **21**
 RADIUS, comparing VPN 3000 with ASA **21**
ACL manager **100**
ACLs
 adding **99**
 bypassing
 LAN-to-LAN IPSec traffic **70**
 remote access **82**
 comparing VPN 3000 with ASA **24**
 configuring for LAN-to-LAN **66**
 downloadable **18**
adaptive security appliance, overview **27**
Advanced Inspection and Prevention Security Services Module (AIPSSM) **17**
AES **62**
Aggressive Mode **17**
AIP SSM **17**
Are You There (AYT) firewall policy **93, 98**
ASA system, overview **27**
attribute-value pairs (AVP) **31**
authentication, certificate **56**

B

bandwidth reservation, comparing VPN 3000 with ASA **23**

C

Central Protection Policy (CPP) **93, 98**
certificate enrollment
 authenticating to the CA **56**
 generating key pairs **52**
 summary of steps **52**
 trustpoint configuration **54**
certificate management in ASDM **58**
CLI **17**
client firewall **97**
 Are You There (AYT) policy **93, 98**
 Central Protection Policy (CPP) **93, 98**
 configuring **93**
 allowing HTTP traffic **101**
 default **93**
 rules for firewall filters **93**
 group policy **95**
 local **93**
 policies **97**
 configuring
 AAA hosts **107**
 ACLs **66, 99**
 address management method **41**
 address pools **104**
 administrator password **41**
 authentication **41**
 client firewall **93**
 crypto map, IPSec LAN-to-LAN tunnel **68**
 default client firewall **93**
 dynamic crypto map, remote-access tunnel **80**
 extended access list rule **99**
 external authentication **109**

external server **104**
external server group **105**
group policy, client firewall **95**
interfaces
 IPSec LAN-to-LAN tunnel **60, 64**
 remote-access tunnel **72, 75**
internal server user database **41**
IP interfaces **40**
IPSec group **41**
IPSec LAN-to-LAN tunnel **59**
ISAKMP policy
 IPSec LAN-to-LAN tunnel **61**
 remote-access tunnel **73**
load balancing **111**
network list **85**
QoS **115**
RADIUS **104**
split tunneling **85**
system information **40**
transform set, remote-access tunnel **77**
tunnel group
 IPSec LAN-to-LAN tunnel **67**
 remote-access tunnel **78**
 split tunneling **90**
tunneling protocols and options **40**
user access, remote-access tunnel **76**
configuring users **17**
connection timeout, TCP **18**
crypto map
 applying to interfaces **70**
 configuring for LAN-to-LAN **68**
 creating for using dynamic crypto map **82**

D

data integrity, Phase 2, default setting **16**
dbgtrace logging levels, security appliance **17**
default
 DefaultL2Lgroup **28**

DefaultRAgroup **28**
DfltGrpPolicy **32**
 group policy **32**
default group policy **31**
default tunnel group **28**
Denial of Service (DoS) attack **17**
DES, IKE policy keywords (table) **62**
Diffie-Hellman, groups supported **62**
documentation
 additional **vii**
 cautions **ix**
 notes **ix**
 DoS attack **17**
 dynamic crypto map
 configuring for remote access **80**
 crypto map usage **82**

E

encryption algorithm, default **16**
enrolling for certificate
 authenticating to the CA **56**
 generating key pairs **52**
 summary of steps **51**
 trustpoint configuration **54**
enrolling for identity certificate **57**
extended access list rule **99**
external authentication, configuring for tunnel group **109**
external server
 configuring **104**
 protocols supported **106**
external server group, configuring **105**

F

fallback, VPN 3000 vs. ASA **21**
feature map, VPN 3000 to security appliance **15**
filters

comparing VPN 3000 with ASA **24**

VPN 3000 **18**

firewall

client **93**

unlocking, comparing VPN 3000 with ASA **24**

firewall policy **97**

firewall types **97**

G

general attributes, tunnel group **29**

general tunnel-group connection parameters **29**

Group 5, Diffie Hellman **62**

group policy

client firewall **95**

configuring **32**

default **32**

definition **31**

split tunneling **88**

group policy, default **31**

H

HTTP traffic **101**

hub-and-spoke configuration **17**

hybrid server group, support on VPN 3000 vs. ASA **21**

identity certificate, enrolling **57**

IKE

negotiation **16**

Phase 2 Data Integrity, enabling **25**

policy keywords **61**

IKE keepalive setting

tunnel group **30**

inspection, packet **17**

interfaces

configuring for LAN-to-LAN **60**

configuring for remote access **72, 75**

IP address pool, configuring **104**

IPSec

comparing VPN 3000 with ASA **22**

LAN-to-LAN, permitting **70**

remote access, permitting **82**

tunnel mode **64**

IPSec LAN-to-LAN tunnel

configuring ACLs **66**

configuring crypto map **68**

configuring interfaces **60, 64**

configuring ISAKMP Policy **61**

configuring tunnel group **67**

IPSec parameters, tunnel group **30**

ISAKMP

configuring **61, 73**

enabling Phase 2 data integrity **25**

ISAKMP keepalive setting

tunnel groups **30**

K

key length, RSA **19**

key pairs, generating **52**

L

L2TP, L2TP over IPSec, and PPTP **16**

LAN-to-LAN tunnel, configuring **59**

license, comparing of VPN 3000 with ASA **20**

load balancing

comparing VPN 3000 with ASA **22**

configuring **111**

logging, event, VPN 3000 **17**

low-latency queueing (LLQ), comparing VPN 3000 with ASA **23**

low memory, action **16**

M

management traffic accounting, VPN3000 vs. ASA **21**
managing certificates in ASDM **58**
MD5 **62**
memory red condition **16**
minimum bandwidth guarantee, comparing VPN 3000 with ASA **23**
modes, comparing VPN 3000 with ASA **22**

N

navigation map for ASDM **121**
network list, configuring **85**
network mask **18**
nice reboot **16**

O

object group, comparing VPN 3000 with ASA **22**

P

packet inspection **17**
permitting IPSec traffic
 LAN-to-LAN **70**
 remote access **82**
Phase 2 data integrity
 default setting **16**
 enabling **16, 25**
PKI
 certificate **19**
 implementation on ASA **37**
 new CLI commands **37**
policing, comparing VPN 3000 with ASA **23**
protocols, external servers **106**

Q

Quality of Service (QoS)
 comparing VPN 3000 with ASA **23**
 configuring **115**
Quick Configuration program, VPN 3000 **39**

R

RADIUS accounting, VPN 3000 vs. ASA **21**
RADIUS server, configuring **104**
reboot, nice **16**
related documentation **viii**
remote-access tunnel
 configuring **71**
 configuring dynamic crypto map **80**
 configuring interfaces **72, 75**
 configuring ISAKMP policy **73**
 configuring transform set **77**
 configuring tunnel group **78**
 configuring user access **76**
RSA key length **19**

S

service policy rule wizard **115**
session timeout, TCP **18**
SHA, IKE policy keywords (table) **62**
Split DNS **92**
split tunneling
 configuring **85**
 firewalls **93**
 group policy **88**
 tunnel group **90**
syslog levels, security appliance **17**
