

INDEX

Numerics

7.0 - 7.1 feature map, VPN 3000 to security appliance **15**

7.2 feature map, VPN 3000 to security appliance **26**

A

AAA

 attributes that are not available in external groups for ASA **22**

 comparing VPN 3000 with ASA **22**

 fallback mechanism **22**

 tunnel groups and group policies on ASA **22**

AAA server groups, adding AAA hosts **111**

accounting

 management traffic, VPN 3000 vs. ASA **22**

 RADIUS, comparing VPN 3000 with ASA **22**

ACL manager **104**

ACLs

 adding **103**

bypassing

 LAN-to-LAN IPSec traffic **74, 86**

 comparing VPN 3000 with ASA **25**

 configuring for LAN-to-LAN **70**

 downloadable **18**

Active/Standby Stateful Failover, WebVPN **20**

adaptive security appliance, overview **31**

Advanced Inspection and Prevention Security Services Module (AIPSSM) **17**

AES **66**

Aggressive Mode **17**

AIP SSM **17**

Are You There (AYT) firewall policy **97, 102**

ASA system, overview **31**

attribute-value pairs (AVP) **35**

authentication, certificate **60**

B

bandwidth reservation, comparing VPN 3000 with ASA **24**

C

Central Protection Policy (CPP) **97, 102**

certificate enrollment

 authenticating to the CA **60**

 generating key pairs **56**

 summary of steps **56**

 trustpoint configuration **58**

certificate management in ASDM **62**

Certificate Revocation Checking **27**

CIFS, WebVPN **20**

Citrix support, WebVPN **20**

CLI **17**

client firewall **101**

 Are You There (AYT) policy **97, 102**

 Central Protection Policy (CPP) **97, 102**

 configuring **97**

 allowing HTTP traffic **105**

 default **97**

 rules for firewall filters **97**

 group policy **99**

 local **97**

 policies **101**

 Compression, WebVPN and SSL VPN **20**

 configuring

AAA hosts **111**
 ACLs **70, 103**
 address management method **45**
 address pools **108**
 administrator password **45**
 authentication **45**
 client firewall **97**
 crypto map, IPSec LAN-to-LAN tunnel **72**
 default client firewall **97**
 dynamic crypto map, remote-access tunnel **84**
 extended access list rule **103**
 external authentication **113**
 external server **108**
 external server group **109**
 group policy, client firewall **99**
 interfaces
 IPSec LAN-to-LAN tunnel **64, 68**
 remote-access tunnel **76, 79**
 internal server user database **45**
 IP interfaces **44**
 IPSec group **45**
 IPSec LAN-to-LAN tunnel **63**
 ISAKMP policy
 IPSec LAN-to-LAN tunnel **65**
 remote-access tunnel **77**
 load balancing **115**
 network list **89**
 QoS **119**
 RADIUS **108**
 split tunneling **89**
 system information **44**
 transform set, remote-access tunnel **81**
 tunnel group
 IPSec LAN-to-LAN tunnel **71**
 remote-access tunnel **82**
 split tunneling **94**
 tunneling protocols and options **44**
 user access, remote-access tunnel **80**
 configuring users **17**

connection timeout, TCP **19**
 CRLs **27**
 crypto map
 applying to interfaces **74**
 configuring for LAN-to-LAN **72**

D

data integrity, Phase 2, default setting **16**
 dbgtrace logging levels, security appliance **18**
 DDNS **28**
 default
 DefaultL2Lgroup **32**
 DefaultRAgroup **32**
 DfltGrpPolicy **36**
 group policy **36**
 default group policy **35**
 default tunnel group **32**
 Denial of Service (DoS) attack **17**
 DES, IKE policy keywords (table) **66**
 Diffie-Hellman, groups supported **66**
 documentation
 additional **vii**
 cautions **ix**
 notes **ix**
 DoS attack **17**
 DSA key **19**
 dynamic crypto map
 configuring for remote access **84**
 dynamic DNS **28**

E

encryption algorithm, default **16**
 enrolling for certificate
 authenticating to the CA **60**
 generating key pairs **56**
 summary of steps **55**

trustpoint configuration **58**
 enrolling for identity certificate **61**
 extended access list rule **103**
 external authentication, configuring for tunnel group **113**
 external server
 configuring **108**
 protocols supported **110**
 external server group, configuring **109**

F

fallback, VPN 3000 vs. ASA **22**
 feature map
 VPN 3000 to Version 7.2 security appliance **26**
 VPN 3000 to Versions 7.0 and 7.1 security
 appliance **15**
 filters
 comparing VPN 3000 with ASA **25**
 VPN 3000 **18**
 firewall
 client **97**
 unlocking, comparing VPN 3000 with ASA **25**
 firewall policy **101**
 firewall types **101**

G

general attributes, tunnel group **33**
 general tunnel-group connection parameters **33**
 Graphical User Interface **17**
 Group 5, Diffie Hellman **66**
 group lock
 comparing VPN 3000 with ASA **23**
 group policy
 client firewall **99**
 configuring **36**
 default **36**
 definition **35**
 split tunneling **92**

group policy, default **35**

H

HTTP traffic **105**
 hub-and-spoke configuration **17**
 hybrid server group, support on VPN 3000 vs. ASA **22**

I

identity certificate, enrolling **61**
 IKE
 negotiation **16**
 Phase 2 **16**
 Phase 2 Data Integrity, enabling **29**
 policy keywords **65**
 IKE keepalive setting
 tunnel group **34**
 inspection, packet **17**
 interfaces
 configuring for LAN-to-LAN **64**
 configuring for remote access **76, 79**
 IP address pool, configuring **108**
 IPSec
 comparing VPN 3000 with ASA **23**
 LAN-to-LAN, permitting **74, 86**
 tunnel mode **68**
 IPSec LAN-to-LAN tunnel
 configuring ACLs **70**
 configuring crypto map **72**
 configuring interfaces **64, 68**
 configuring ISAKMP Policy **65**
 configuring tunnel group **71**
 IPSec parameters, tunnel group **34**
 ISAKMP
 configuring **65, 77**
 enabling Phase 2 data integrity **29**
 ISAKMP keepalive setting

tunnel groups **34**

nice reboot **16**

K

Keep Cisco SSL VPN Client feature, renamed **21**
Keep Installer on Client System feature, ASA **21**
key length, RSA **19**
key pairs, generating **56**

L

L2TP, L2TP over IPSec, and PPTP **26**
LAN-to-LAN tunnel, configuring **63**
license, comparing VPN 3000 with ASA **21**
load balancing
 comparing VPN 3000 with ASA **23**
 configuring **115**
logging, event, VPN 3000 **18**
low-latency queueing (LLQ), comparing VPN 3000 with ASA **24**
low memory, action **16**

M

management traffic accounting, VPN3000 vs. ASA **22**
managing certificates in ASDM **62**
MD5 **66**
memory red condition **16**
minimum bandwidth guarantee, comparing VPN 3000 with ASA **24**
modes, comparing VPN 3000 with ASA **23**

N

navigation map for ASDM **125**
Network Admission Control **27**
 WebVPN **20**
network list, configuring **89**
network mask **18**

O

object group, comparing VPN 3000 with ASA **23**
OCSP **27**
Online Certificate Status Protocol (OCSP) **27**

P

packet inspection **17**
PDA support, WebVPN **20**
permitting IPSec traffic
 LAN-to-LAN **74, 86**
Phase 2 data integrity
 default setting **16**
 enabling **16, 29**
PKI
 certificate **19**
 implementation on ASA **41**
 new CLI commands **41**
policing, comparing VPN 3000 with ASA **24**
protocols, external servers **110**

Q

Quality of Service (QoS)
 comparing VPN 3000 with ASA **24**
 configuring **119**
Quick Configuration program, VPN 3000 **43**

R

RADIUS accounting, VPN 3000 vs. ASA **22**
RADIUS server, configuring **108**
reboot, nice **16**
related documentation **viii**
remote-access tunnel

configuring **75**
 configuring dynamic crypto map **84**
 configuring interfaces **76, 79**
 configuring ISAKMP policy **77**
 configuring transform set **81**
 configuring tunnel group **82**
 configuring user access **80**
 RIPv2 **28**
 RSA key length **19**

S

service policy rule wizard **119**
 session timeout, TCP **19**
 SHA, IKE policy keywords (table) **66**
 Single Sign-on, WebVPN **20**
 Split DNS **96**
 split tunneling
 configuring **89**
 firewalls **97**
 group policy **92**
 tunnel group **94**
 SSL VPN Client, comparing VPN 3000 with ASA **21**
 syslog levels, security appliance **18**

T

TCP connection timeout **19**
 timeout, TCP connection **19**
 transform set, configuring for remote access **81**
 Triple DES, IKE policy keyword (table) **66**
 trustpoint **19, 58**
 tunnel group
 configuring for LAN-to-LAN **71**
 configuring for remote access **82**
 default **32**
 definition **32**
 external authentication **113**

IPSec parameters **34**
 tunnel-group
 general attributes **33**
 webvpn attributes **35**

U

user
 configuring **38**
 configuring specific **38**
 users
 adding for remote access **80**
 configuring **17**

V

VPN 3000 features in ASA **31**
 VPN client
 configuring a client firewall to allow HTTP traffic **105**
 firewall options **97**
 firewall policy **102**
 stateful firewall **101**
 VPN Wizard **46**

W

WebVPN
 comparing VPN 3000 with ASA **20**
 webvpn attributes, tunnel-group **35**
 WebVPN tunnel-group connection parameters **35**
 wildcard mask **18**
 wizards
 service policy rule **119**
 VPN **46**

Z

Zone Labs Integrity Server **28**
