

License and Documentation Guide for Cisco NAC Appliance, Release 4.7

Document Number 78-19122-01 Published February 7, 2011

This document provides important license and documentation information for Cisco NAC Appliance, an easily deployed Network Admission Control (NAC) product that allows network administrators to authenticate, evaluate, and remediate wired and wireless users and their machines prior to network access.

Software License Claim Certificate

A Product Authorization Key (PAK) for each Cisco NAC Appliance that you purchase is affixed as a sticky label at the bottom of the Software License Claim Certificate card included in your package. Carefully follow the instructions on this card to perform customer registration via web. You must submit the PAK you received and correctly enter the eth0 MAC address of your Cisco NAC Manager machine to obtain valid license file(s) for your system. For each PAK that you submit, a license file is generated and sent to you via email, which you should save to disk. You will need to install these license files on your Cisco NAC Manager later. If you purchased a failover bundle, you will receive two (2) appliances and one (1) failover license that counts both appliances as one redundant unit. The PAK will be inside one of the two appliances. For details, refer to *Cisco NAC Appliance Service Contract/Licensing Support* at http://www.cisco.com/en/US/products/ps6128/prod_installation_guides_list.html.

Software Upgrades

To obtain the latest Cisco NAC Appliance software release, **Log In** to the Cisco Software Download Site at <http://www.cisco.com/public/sw-center/index.shtml> and navigate to **Security > Endpoint Security > Cisco Network Access Control > Cisco NAC Appliance > Cisco NAC Appliance 4.7**.

For upgrade instructions, refer to the “Upgrading” section of the release notes at http://www.cisco.com/en/US/products/ps6128/prod_release_notes_list.html.
