

License and Documentation Guide for Cisco NAC Guest Server

Document Number 78-21070-01 Published November 28, 2012

This document provides important license and documentation information for Cisco NAC Guest Server, a provisioning, management, and reporting system that provides temporary network access for guests, visitors, contractors, consultants, or customers. The Cisco NAC Guest Server works alongside Cisco NAC Appliance, Cisco Wireless LAN Controllers, and other Cisco Network Enforcement devices, which provide the captive portal and enforcement point for guest access.

Software License Claim Certificate

A Product Authorization Key (PAK) for each Cisco NAC Guest Server that you purchase is affixed as a sticky label at the bottom of the Software License Claim Certificate card included in your package. Carefully follow the instructions on this card to perform customer registration via web. You must submit each PAK you received and correctly enter the eth0 MAC address of your Cisco NAC Guest Server to obtain valid license file(s) for your system. For each PAK that you submit, a license file is generated and sent to you via email, which you should save to disk. You will need to install these license files on your Cisco NAC Guest Server later. For details, see *Cisco NAC Appliance Service Contract / Licensing Support* at http://www.cisco.com/en/US/products/ps6128/prod_installation_guides_list.html.

Software Upgrades

To obtain the latest Cisco NAC Guest Server release, **Log In** to the Cisco Software Download Site at <http://www.cisco.com/public/sw-center/index.shtml> and navigate to the latest release available under **Security > Access Control and Policy > Cisco Network Access Control > Cisco NAC Guest Server**.

For upgrade instructions, refer to the “Upgrading” section of the release notes at http://www.cisco.com/en/US/products/ps6128/prod_release_notes_list.html.
