

Guide to User Documentation for Cisco Security Manager 4.0

Published: June 18, 2010

Cisco Security Manager is part of the Cisco Security Management Suite, which delivers comprehensive policy administration and enforcement for the Cisco Self-Defending Network. The suite also includes the Cisco Security Monitoring, Analysis, and Response System (MARS), which is available separately.

This document identifies and links to the various documents available for Cisco Security Manager (Security Manager), Auto Update Server (AUS), and Performance Monitor, and contains the following sections:

- [Documentation Set, page 2](#)
- [How to Get Started with Security Manager, page 4](#)

Documentation Set

The Cisco Security Manager documentation set, which is available at

http://www.cisco.com/en/US/products/ps6498/tsd_products_support_series_home.html, encompasses the following:

Data Sheets

Synopsis of Cisco Security Manager features and benefits, including new features, available at

http://www.cisco.com/en/US/products/ps6498/products_data_sheets_list.html:

- *Cisco Security Manager 4.0 data sheet*

Release Notes

Product overview, important notes, and known problems, available at

http://www.cisco.com/en/US/products/ps6498/prod_release_notes_list.html:

- *Release Notes for Cisco Security Manager 4.0*

Installation and Upgrade Guide

These guides contain information for planning your deployment and requirements and procedures for installing Security Manager on a Windows server or in a high availability or disaster recovery configuration. The installation guide provides installation, upgrade, and uninstallation instructions for Security Manager, AUS, and Performance Monitor and includes pre- and post-installation guidelines and troubleshooting information.

http://www.cisco.com/en/US/products/ps6498/prod_installation_guides_list.html:

- *Installation Guide for Cisco Security Manager 4.0*

Note

Please refer to *Release Notes for Cisco Security Manager 4.0* at http://www.cisco.com/en/US/products/ps6498/prod_release_notes_list.html for important installation notes.

- *Deployment Planning Guide for Cisco Security Manager 4.0*
- *High Availability Installation Guide for Cisco Security Manager 4.0*

User Guides and Online Help

Individual user guides for Security Manager, AUS, and Performance Monitor that provide conceptual and procedural information; the following are available at

http://www.cisco.com/en/US/products/ps6498/products_user_guide_list.html:

- [User Guide for Cisco Security Manager 4.0](#)

Tip

Context-sensitive online help that contains the content of [User Guide for Cisco Security Manager 4.0](#) is accessible from the Help menu or by clicking the Help button on any page or dialog box.

- [User Guide for Auto Update Server 4.0](#)
- [User Guide for Cisco Performance Monitor 4.0](#)

Videos

The Introduction to the Cisco Security Manager Event Viewer video provides a short introduction to the Event Viewer feature introduced in Cisco Security Manager 4.0.

- [Video: Introduction to the Cisco Security Manager Event Viewer](#)

Configuration Examples

Information about specific configuration scenarios and how they are implemented using Cisco Security Manager. Although specific to a particular Security Manager release, configuration examples can be used with other releases that support a feature of interest and are available at

http://www.cisco.com/en/US/products/ps6498/prod_configuration_examples_list.html:

- [Getting Started with Cisco Security Manager 4.0](#)
- [Configuring Botnet Traffic Filtering Using Cisco Security Manager 4.0](#)
- [Applying Zone-based Firewall Policies in Cisco Security Manager](#)
- [Migrating from 1800/2800/3800 ISRs to 1900/2900/3900 ISRs Using Cisco Security Manager 3.3.1](#)
- [Configuring Cisco IOS Content Filtering Using Cisco Security Manager Version 3.3 in Cisco IOS Software Releases 12.4\(15\)XZ and Later](#)

Supported Device Tables

Complete lists of devices and software supported by Security Manager, AUS, and Performance Monitor, available at

http://www.cisco.com/en/US/products/ps6498/products_device_support_tables_1ist.html:

- *Supported Devices and Software Versions for Cisco Security Manager 4.0*

How to Get Started with Security Manager

To get up and running quickly with Security Manager, we recommend the following:

- **Plan your installation.**

To learn which applications are available for installation and to plan your installation, we recommend that you begin by reviewing the “Overview” chapter of *Installation Guide for Cisco Security Manager 4.0* at

http://www.cisco.com/en/US/products/ps6498/prod_installation_guides_list.html.

- **Get an overview of Cisco Security Manager.**

For a general product overview, see “Product Overview” in *User Guide for Cisco Security Manager 4.0* at

http://www.cisco.com/en/US/products/ps6498/products_user_guide_list.html.

Tip

For an interactive overview of Security Manager features, see the interactive JumpStart tutorial that opens when you start Security Manager for the first time. You can also access the JumpStart tutorial by selecting Help > JumpStart.

- **Review Getting Started checklist.**

To get up and running most efficiently, work through the “Getting Started with Security Manager” chapter of *User Guide for Cisco Security Manager 4.0* at

http://www.cisco.com/en/US/products/ps6498/products_user_guide_list.html.

- **Define essential settings.**

Use Security Manager to define many application-wide settings that customize your working environment, such as deployment method. See “Completing the Initial Security Manager Configuration” in *User Guide for Cisco Security Manager 4.0* at

http://www.cisco.com/en/US/products/ps6498/products_user_guide_list.html.

- **Manage user authentication and authorization.**

- To define user roles and permissions, see “Setting Up User Permissions” in *User Guide for Cisco Security Manager 4.0* at

http://www.cisco.com/en/US/products/ps6498/products_user_guide_list.html.

- To integrate Security Manager with Cisco Secure ACS, see “Integrating Security Manager with Cisco Secure ACS” in *User Guide for Cisco Security Manager 4.0* at

http://www.cisco.com/en/US/products/ps6498/products_user_guide_list.html.

- **Bootstrap your devices.**

To enable communication between Security Manager and devices, you must configure transport settings on the devices before you add them to the inventory. See the “Preparing Devices for Management” chapter in *User Guide for Cisco Security Manager 4.0* at

http://www.cisco.com/en/US/products/ps6498/products_user_guide_list.html.
