General Compatibility Information

Each release of the Cisco Content Security Management Appliance (SMA) is compatible with several releases of the Email Security appliance (ESA) and several releases of the Web Security appliance (WSA).

A feature is supported on the Security Management appliance only when it is supported on the associated Email Security appliance or Web Security appliance.

The compatibility tables below assume that you have the latest build for each version. For example, if 7.9.0-201 is the latest build for version 7.9.0, you should have build 201, not build 107. This applies to Security Management appliances and associated Email and Web Security releases.

Advanced File Publishing

For Advanced File Publishing, the file to be published must be saved from a Web Security appliance running the identical version as the target Web Security appliance, including build number. For example, you can use Advanced File Publishing to publish a WSA 7.1.4-999 configuration file to a WSA running 7.1.4-999.

Importing Configuration Files into Configuration Masters

You can import configuration files from Web Security appliances into Configuration Masters on the Security Management appliance as follows:

Release	WSA 7.1.x	WSA 7.5.x	WSA 7.7.x
Releases earlier than 7.9.1: See the Release Notes for your version.			
SMA 7.9.1	WSA 7.1.4	WSA 7.5.1 WSA 7.5.2	—
SMA 8.0	WSA 7.1.4	WSA 7.5.1 WSA 7.5.2	WSA 7.7.x
SMA 8.1.x	WSA 7.1.4	WSA 7.5.1 WSA 7.5.2	WSA 7.7.x

Publishing Configuration Masters

Release	WSA 7.1.x	WSA 7.5.x	WSA 7.7.x
Releases earlier than 7.9.1: See the Release Notes for your version.
