

AsyncOS for Web 7.1.4

Build 7.1.4-056

Known Limitations Fixed in Hot Patch 2

Fixed: Enabling safe search or site content rating in the Global Access Policy degrades Web Proxy performance in some cases

Previously, enabling safe search or site content rating in the Global Access Policy degraded Web Proxy performance when many user defined Access Policies were defined that inherited the global setting. This no longer occurs. [Defect ID: 86307]
