

Preface

This guide describes the command-line interface (CLI) for the Cisco SFS Series Server Switch operating system software. This guide explains how to use the CLI and provides a categorized, alphabetical list of all available CLI commands.

This preface describes who should read the *Cisco SFS Product Family Command Reference*, how it is organized, and its document conventions. It includes the following sections:

- [Audience, page 13](#)
- [Organization, page 13](#)
- [Conventions, page 14](#)
- [Related Documentation, page 15](#)
- [Obtaining Documentation and Submitting a Service Request, page 15](#)

Audience

Cisco provides this guide for administrators who install, configure, and manage Cisco equipment. This document assumes that administrators have prior Ethernet, Fibre Channel, and network administration experience.

Organization

This guide is organized as follows:

Chapter	Title	Description
Chapter 1	Using the CLI	Describes CLI fundamentals.
Chapter 2	Command Groups	Provides a structured view of the commands by listing them according to the modes in which you can enter them.
Chapter 3	Commands	Describes all commands alphabetically.

Conventions

This document uses the following conventions:

Convention	Description
boldface font	Commands, command options, and keywords are in boldface . Bold text indicates elements or text that you must enter as-is.
<i>italic</i> font	Arguments in commands for which you supply values are in <i>italics</i> . Italics not used in commands indicate emphasis.
Menu1 > Menu2 > Item...	Series indicate a pop-up menu sequence to open a form or execute a desired function.
[]	Elements in square brackets are optional.
{ x y z }	Alternative keywords are grouped in braces and separated by vertical bars. Braces can also be used to group keywords and/or arguments; for example, { interface <i>interface type</i> }.
[x y z]	Optional alternative keywords are grouped in brackets and separated by vertical bars.
string	A nonquoted set of characters. Do not use quotation marks around the string or the string will include the quotation marks.
screen font	Terminal sessions and information the system displays are in screen font.
boldface screen font	Information you must enter is in boldface screen font.
<i>italic screen</i> font	Arguments for which you supply values are in <i>italic screen</i> font.
^	The symbol ^ represents the key labeled Control—for example, the key combination ^D in a screen display means hold down the Control key while you press the D key.
< >	Nonprinting characters, such as passwords are in angle brackets.
!, #	An exclamation point (!) or a pound sign (#) at the beginning of a line of code indicates a comment line.

Notes use the following conventions:

Note

Means *reader take note*. Notes contain helpful suggestions or references to material not covered in the manual.

Cautions use the following conventions:

Caution

Means *reader be careful*. In this situation, you might do something that could result in equipment damage or loss of data.
