

## New and Changed Information

---

As of Cisco MDS NX-OS Release 4.2(1), software configuration information is available in new feature-specific configuration guides for the following information:

- System management
- Interfaces
- Fabric
- Quality of service
- Security
- IP services
- High availability and redundancy

The information in these new guides previously existed in the *Cisco MDS 9000 Family CLI Configuration Guide* and in the *Cisco MDS 9000 Family Fabric Manager Configuration Guide*. Those configuration guides remain available on Cisco.com and should be used for all software releases prior to MDS NX-OS Release 4.2(1). Each guide addresses the features introduced in or available in a particular release. Select and view the configuration guide that pertains to the software installed in your switch.

Some information from the *Cisco MDS 9000 Family CLI Configuration Guide* and the *Cisco MDS 9000 Family Fabric Manager Configuration Guide* now appears in the following guides that are common among products that run the Nexus operating system:

- *Cisco NX-OS Family Licensing Guide* – Explains the licensing model and describes the feature licenses.
- *Cisco NX-OS Fundamentals Configuration Guide* – Describes the switch setup utility and includes general CLI, file system, and configuration information.

For a complete list of document titles, see the list of Related Documentation in the “Preface.”

To find additional information about Cisco MDS NX-OS Release 4.2(x), see the *Cisco MDS 9000 Family Release Notes* available at the following Cisco Systems website:

[http://www.cisco.com/en/US/products/ps5989/prod\\_release\\_notes\\_list.htm](http://www.cisco.com/en/US/products/ps5989/prod_release_notes_list.htm)

### About this Guide

The information in the new *Cisco Fabric Manager System Management Configuration Guide* previously existed in the following parts of the *Cisco MDS 9000 Family Fabric Manager Configuration Guide*:

- Part 2: Installation and Switch Management
- Part 5: Security

## Send documentation comments to [fm-docfeedback@cisco.com](mailto:fm-docfeedback@cisco.com)

- Part 8: Network and Switch Monitoring
- Part 9: Troubleshooting

[Table 1](#) lists the New and Changed features for this guide, starting with MDS NX-OS Release 4.2(1).

**Table 1**      ***New and Changed Features for Cisco MDS NX-OS Release 5.0(1a)***

| Feature                   | New or Changed Topics                                                           | Changed in Release | Where Documented                                                |
|---------------------------|---------------------------------------------------------------------------------|--------------------|-----------------------------------------------------------------|
| Notification Enhancements | Added the enhancement in Notification in the Event Filter Using Device Manager. | 5.0(1a)            | <a href="#">Chapter 4, “Configuring Call Home”</a>              |
| Syslog Enhancements       | Added Monitoring Syslog Server from Fabric Manager                              | 5.0(1a)            | <a href="#">Chapter 3, “Configuring System Message Logging”</a> |
|                           | Added System Message Logging information.                                       |                    |                                                                 |
| CFS Pending Difference    | Added the new CFS pending difference screen shot.                               | 5.0(1a)            | <a href="#">Chapter 2, “Using the CFS Infrastructure”</a>       |
| Call Home Destination tab | Added the enhancement in Destination tab.                                       | 4.2(1)             | <a href="#">Chapter 4, “Configuring Call Home”</a>              |
| Call Home HTTPs support   | Added Call Home HTTPs enhancement.                                              | 4.2(1)             | <a href="#">Chapter 4, “Configuring Call Home”</a>              |
| SNMP Trap Control tab     | Added details of the new Control tab available from NX-OS Release 4.2(1).       | 4.2(1)             | <a href="#">Chapter 9, “Configuring SNMP”</a>                   |
| Domain Manager Turbo Mode | Added procedure to configure Domain Manager turbo mode.                         | 4.2(1)             | <a href="#">Chapter 10, “Configuring Domain Parameters”</a>     |
