CHAPTER 4

Fabric Extender Commands

This chapter describes the Cisco NX-OS commands used to manage a Cisco Nexus 2000 Series Fabric Extender from a Cisco Nexus 5000 Series switch.

attach fex

Send comments to nx5000-docfeedback@cisco.com

attach fex

To access the CLI of a connected Fabric Extender to run diagnostic commands, use the **attach fex** command.

attach fex *chassis_ID*

Syntax Description	<i>chassis_ID</i>	Fabric Extender chassis ID. The chassis ID range is from 100 to 199.
Command Default	None	
Command Modes	EXEC mode	
Command History	Release	Modification
	4.0(1a)N2(1)	This command was introduced.
Usage Guidelines	Use the attach fex command to access the CLI on a connected Fabric Extender and performing diagnostic commands. We recommend that you use this command only following direction from Cisco technical support personnel.	
Examples	This example shows how to access the CLI of a connected Fabric Extender to run diagnostic commands: <pre>switch# attach fex 101</pre>	
Related Commands	Command	Description
	show fex	Displays all configured Fabric Extender chassis connected to the switch.

Send comments to nx5000-docfeedback@cisco.com

beacon

To turn on the locator beacon LED of a Fabric Extender, use the **beacon** command. To turn off the locator beacon LED, use the **no** form of this command.

beacon

no beacon

Syntax Description This command has no arguments or keywords.

Command Default None

Command Modes Fabric Extender configuration mode

Command History	Release	Modification
	4.0(1a)N2(1)	This command was introduced.

Usage Guidelines Use the **beacon** command to toggle the locator beacon LED of a Fabric Extender, allowing you to easily identify the machine in a busy data center.

Examples This example shows how to turn on the locator beacon LED for a specific Fabric Extender chassis:

```
switch# configure terminal
switch(config)# fex 101
switch(config-fex)# beacon
```

This example shows how to turn off the locator beacon LED for a specific Fabric Extender chassis:

```
switch# configure terminal
switch(config)# fex 101
switch(config-fex)# no beacon
```

Related Commands	Command	Description
	fex	Creates a Fabric Extender and enters Fabric Extender configuration mode.
	show fex	Displays all configured Fabric Extender chassis connected to the switch.

■ description (fex)***Send comments to nx5000-docfeedback@cisco.com***

description (fex)

To specify a description for a Fabric Extender, use the **description** command. To revert to the default description, use the **no** form of this command.

description *description*

no description

Syntax Description	<i>description</i>	Description of a Fabric Extender. The default is the string FEXxxxx where xxxx is the chassis ID. For example, if the chassis ID is 123, the default description is FEX0123. The maximum length is 20 characters.
---------------------------	--------------------	---

Command Default	None
------------------------	------

Command Modes	Fabric Extender configuration mode
----------------------	------------------------------------

Command History	Release	Modification
	4.0(1a)N2(1)	This command was introduced.

Examples	This example shows how to specify a description for a Fabric Extender:
-----------------	--

```
switch# configure terminal
switch(config)# fex 101
switch(config-fex)# description Rack16_FEX101
```

This example shows how to revert to the default description for a Fabric Extender:
--

```
switch# configure terminal
switch(config)# fex 101
switch(config-fex)# no description
```

Related Commands	Command	Description
	fex	Creates a Fabric Extender and enters Fabric Extender configuration mode.
	show fex	Displays all configured Fabric Extender chassis connected to the switch.

Send comments to nx5000-docfeedback@cisco.com

fex

To create a Fabric Extender and enter Fabric Extender configuration mode, use the **fex** command. To delete the Fabric Extender configuration, use the **no** form of this command.

fex chassis_ID

no fex chassis_ID

Syntax Description	<i>chassis_ID</i> Fabric Extender chassis ID. The chassis ID range is from 100 to 199.	
Command Default	None	
Command Modes	Configuration mode	
Command History	Release	Modification
	4.0(1a)N2(1)	This command was introduced.
Usage Guidelines	You can create and configure the Fabric Extender before you connect and associate it to an interface on the parent switch. Once you associate the Fabric Extender to the switch, the configuration you created is transferred over to the Fabric Extender and applied.	
Examples	<p>This example shows how to enter Fabric Extender configuration mode:</p> <pre>switch# configure terminal switch(config)# fex 101</pre> <p>This example shows how to delete the Fabric Extender configuration:</p> <pre>switch# configure terminal switch(config)# no fex 101</pre>	
Related Commands	Command	Description
	beacon	Turns on the locator beacon LED of a Fabric Extender.
	description (fex)	Specifies a description for a Fabric Extender.
	fex associate	Associates a Fabric Extender to an Ethernet or EtherChannel interface.
	pinning max-links	Specifies the number of statically pinned uplinks connected to a Fabric Extender.
	serial	Assigns a serial number to a Fabric Extender.
	show fex	Displays all configured Fabric Extender chassis connected to the switch.

fex associate

Send comments to nx5000-docfeedback@cisco.com

fex associate

To associate a Fabric Extender to a fabric interface, use the **fex associate** command. To disassociate the Fabric Extender, use the **no** form of this command.

fex associate *chassis_ID*

no fex associate [*chassis_ID*]

Syntax Description	<i>chassis_ID</i>	Fabric Extender chassis ID. The chassis ID range is from 100 to 199.
Command Default	None	
Command Modes	Interface configuration mode	
Command History	Release	Modification
	4.0(1a)N2(1)	This command was introduced.
Usage Guidelines	Before you can associate an interface on the parent switch to the Fabric Extender, you must first make the interface into a fabric interface by entering the switchport mode fex-fabric command.	
Examples	This example shows how to associate the Fabric Extender to an Ethernet interface: switch# configure terminal switch(config)# interface ethernet 1/40 switch(config-if)# switchport mode fex-fabric switch(config-if)# fex associate 101	
	This example shows how to associate the Fabric Extender to an EtherChannel interface: switch# configure terminal switch(config)# interface port-channel 4 switch(config-if)# switchport mode fex-fabric switch(config-if)# fex associate 101	
Related Commands	Command	Description
	show fex	Displays all configured Fabric Extender chassis connected to the switch.
	switchport mode fex-fabric	Sets the interface to be an uplink port.

Send comments to nx5000-docfeedback@cisco.com

fex pinning redistribute

To redistribute the host interfaces on a Fabric Extender, use the **fex pinning redistribute** command.

fex pinning redistribute *chassis_ID*

Syntax Description	<i>chassis_ID</i>	Fabric Extender chassis ID. The chassis ID range is from 100 to 199.
---------------------------	-------------------	--

Command Default	None
------------------------	------

Command Modes	EXEC mode
----------------------	-----------

Command History	Release	Modification
	4.0(1a)N2(1)	This command was introduced.

Usage Guidelines When you provision the Fabric Extender using the Statically Pinned mode (see the *Cisco Nexus 2000 Series Fabric Extender Software Configuration Guide*), the host interfaces on the Fabric Extender are pinned to the fabric interfaces in the order that they were initially configured. The next time that you reboot the Fabric Extender, the configured fabric interfaces are pinned to the host interfaces in an ascending order by the port number of the fabric interface.

Use the **fex pinning redistribute** command if you want to configure the same fixed distribution of host interfaces without restarting the Fabric Extender after your initial configuration.

Caution This command disrupts all the host interface ports of the Fabric Extender. However, the disruption is shorter than would be the case if you reboot the Fabric Extender.

Examples	This example shows how to redistribute the host interfaces on a Fabric Extender:
-----------------	--

```
switch# fex pinning redistribute 101
```

Related Commands	Command	Description
	pinning max-links	Defines the number of uplinks on a Fabric Extender.
	show fex	Displays all configured Fabric Extender chassis connected to the switch.
	show interface <i>interface fex-intf</i>	Displays the Fabric Extender ports pinned to a specific switch interface.

logging fex

Send comments to nx5000-docfeedback@cisco.com

logging fex

To set the logging alert level for Fabric Extender events, use the **logging fex** command. To reset the logging level, use the **no** form of this command.

logging fex [severity-level]

no logging fex [severity-level]

Syntax Description	<i>severity-level</i>	(Optional) Number of the desired severity level at which messages should be logged. Messages at or numerically lower than the specified level are logged. Severity levels are as follows:
		<ul style="list-style-type: none"> • 0—emergency: System unusable • 1—alert: Immediate action needed • 2—critical: Critical condition—default level • 3—error: Error condition • 4—warning: Warning condition • 5—notification: Normal but significant condition • 6—informational: Informational message only • 7—debugging: Appears during debugging only

Command Default	None
------------------------	------

Command Modes	Configuration mode
----------------------	--------------------

Command History	Release	Modification
	4.0(1a)N2(1)	This command was introduced.

Examples	This example shows how to set the logging alert level for Fabric Extender events:
	switch(config)# logging fex 4

This example shows how to reset the logging level:

```
switch(config)# no logging fex
```

Related Commands	Command	Description
	show fex	Displays all configured Fabric Extender chassis connected to the switch.

Send comments to nx5000-docfeedback@cisco.com

pinning max-links

To specify the number of statically pinned uplinks, use the **pinning max-links** command. To reset to the default, use the **no** form of this command.

pinning max-links *uplinks*

no pinning max-links

Syntax Description	<i>uplinks</i>	Number of uplinks. The range is 1 to 4. The default is 1. This command is applicable only if the Fabric Extender is connected to its parent switch using one or more statically pinned fabric interfaces.
---------------------------	----------------	--

Command Default The maximum uplinks is 1.

Command Modes Fabric Extender configuration mode

Command History	Release	Modification
	4.0(1a)N2(1)	This command was introduced.

Usage Guidelines Use the **pinning max-links** command when you create a number of pinned fabric interface connections to enable the parent switch to determine a distribution of host interfaces. The host interfaces are divided by the number of *uplinks* and distributed accordingly.

Caution Changing the value of *uplinks* is disruptive; all the host interfaces on the Fabric Extender are brought down and back up as the parent switch reassigns its static pinning.

Examples This example shows how to specify the number of statically pinned uplinks for a Fabric Extender:

```
switch# configure terminal
switch(config)# fex 101
switch(config-fex)# pinning max-links 4
```

This example shows how to revert to the uplink count to the default for a Fabric Extender:

```
switch# configure terminal
switch(config)# fex 101
switch(config-fex)# no pinning max-links
```

■ pinning max-links

Send comments to nx5000-docfeedback@cisco.com

Related Commands	Command	Description
	fex	Creates a Fabric Extender and enters Fabric Extender configuration mode.
	fex pinning redistribute	Redistributes the host interfaces on a Fabric Extender.
	show fex	Displays all configured Fabric Extender chassis connected to the switch.

Send comments to nx5000-docfeedback@cisco.com

serial

To assign a serial number to a Fabric Extender, use the **serial** command. To remove the serial number, use the **no** form of this command.

serial *serial_string*

no serial

Syntax Description	<i>serial_string</i>	Serial number string for the Fabric Extender. The string is alphanumeric, case sensitive, and has a maximum length of 20 characters.
Command Default	None	
Command Modes	Fabric Extender configuration mode	
Command History	Release	Modification
	4.0(1a)N2(1)	This command was introduced.
Usage Guidelines	The serial number string you define with the serial command must match the serial number of the Fabric Extender. If you configure a serial number and then you use the fex associate command to associate the corresponding chassis ID to the switch, the association will succeed only if the Fabric Extender reports a matching serial number string.	
Caution	Configuring a serial number other than that of the given Fabric Extender will force the Fabric Extender offline.	

Examples

This example shows how to specify a serial number for a Fabric Extender:

```
switch# configure terminal
switch(config)# fex 101
switch(config-fex)# serial Rack16_FEX101
```

This example shows how to remove a serial number from a Fabric Extender:

```
switch# configure terminal
switch(config)# fex 101
switch(config-fex)# no serial
```

Send comments to nx5000-docfeedback@cisco.com

Related Commands	Command	Description
	fex	Creates a Fabric Extender and enters Fabric Extender configuration mode.
	fex associate	Associates a Fabric Extender to an Ethernet or EtherChannel interface.
	show fex	Displays all configured Fabric Extender chassis connected to the switch.

Send comments to nx5000-docfeedback@cisco.com

show diagnostic result fex

To display the results from the diagnostic tests for a Fabric Extender chassis, use the **show diagnostic result fex** command.

show diagnostic result fex *chassis_ID*

Syntax Description	<i>chassis_ID</i>	Fabric Extender chassis ID. The chassis ID range is from 100 to 199.
Command Default	None	
Command Modes	EXEC mode	
Command History	Release	Modification
	4.0(1a)N2(1)	This command was introduced.
Examples	This example shows how to display the results from the diagnostic tests for a Fabric Extender:	
	<pre>switch# show diagnostic result fex 101</pre>	
Related Commands	Command	Description
	show fex	Displays all configured Fabric Extender chassis connected to the switch.

■ show environment fex

Send comments to nx5000-docfeedback@cisco.com

show environment fex

To display the environmental sensor status, use the **show environment fex** command.

show environment fex {all | chassis_ID} [temperature | power | fan]

Syntax Description	
all	Show information for all Fabric Extender chassis.
<i>chassis_ID</i>	Fabric Extender chassis ID. The chassis ID range is from 100 to 199.
temperature	(Optional) Displays temperature sensor information.
power	(Optional) Displays power capacity and power distribution information.
fan	(Optional) Displays fan information.

Command Default None

Command Modes EXEC mode

Command History	Release	Modification
	4.0(1a)N2(1)	This command was introduced.

Examples This example shows how to display the environmental sensor status for a Fabric Extender:

```
switch# show environment fex 101
```

Related Commands	Command	Description
	show fex	Displays all configured Fabric Extender chassis connected to the switch.

Send comments to nx5000-docfeedback@cisco.com

show fex

To display information about a specific Fabric Extender or all attached chassis, use the **show fex** command.

show fex [chassis_ID [detail]]

Syntax Description	<p>chassis_ID (Optional) Fabric Extender chassis ID. The chassis ID range is from 100 to 199.</p> <p>detail (Optional) Displays a detailed listing.</p>				
Command Default	None				
Command Modes	EXEC mode				
Command History	<table> <thead> <tr> <th>Release</th><th>Modification</th></tr> </thead> <tbody> <tr> <td>4.0(1a)N2(1)</td><td>This command was introduced.</td></tr> </tbody> </table>	Release	Modification	4.0(1a)N2(1)	This command was introduced.
Release	Modification				
4.0(1a)N2(1)	This command was introduced.				
Examples	<p>This example shows how to display information about all attached Fabric Extender chassis:</p> <pre>switch# show fex</pre>				
Related Commands	<table> <thead> <tr> <th>Command</th><th>Description</th></tr> </thead> <tbody> <tr> <td>fex</td><td>Creates a Fabric Extender and enters Fabric Extender configuration mode.</td></tr> </tbody> </table>	Command	Description	fex	Creates a Fabric Extender and enters Fabric Extender configuration mode.
Command	Description				
fex	Creates a Fabric Extender and enters Fabric Extender configuration mode.				

■ **show fex transceiver**

Send comments to nx5000-docfeedback@cisco.com

show fex transceiver

To display information about the transceiver connecting a Fabric Extender to the Cisco Nexus 5000 Series switch, use the **show fex transceiver** command.

show fex *chassis_ID* transceiver [calibration | detail]

Syntax Description	<i>chassis_ID</i> Fabric Extender chassis ID. The chassis ID range is from 100 to 199. calibration (Optional) Displays detailed calibration information about the transceiver. detail (Optional) Displays detailed diagnostic information about the transceiver.
---------------------------	--

Command Default	None
------------------------	------

Command Modes	EXEC mode
----------------------	-----------

Command History	Release	Modification
	4.0(1a)N2(1)	This command was introduced.

Examples	This example shows how to display information about the transceiver connecting a Fabric Extender to the Cisco Nexus 5000 Series switch:
	<pre>switch# show fex transceiver</pre>

Related Commands	Command	Description
	fex	Creates a Fabric Extender and enters Fabric Extender configuration mode.

Send comments to nx5000-docfeedback@cisco.com

show fex version

To display the version information about a Fabric Extender, use the **show fex version** command.

show fex *chassis_ID* version

Syntax Description	<i>chassis_ID</i>	Fabric Extender chassis ID. The chassis ID range is from 100 to 199.
Command Default	None	
Command Modes	EXEC mode	
Command History	Release	Modification
	4.0(1a)N2(1)	This command was introduced.
Examples	This example shows how to display the version information about a Fabric Extender:	
	<pre>switch# show fex version</pre>	
Related Commands	Command	Description
	fex	Creates a Fabric Extender and enters Fabric Extender configuration mode.

 show interface fex-fabric

Send comments to nx5000-docfeedback@cisco.com

show interface fex-fabric

To display all Fabric Extender fabric interfaces, use the **show interface fex-fabric** command.

show interface fex-fabric

Syntax Description This command has no arguments or keywords.

Command Default None

Command Modes EXEC mode

Command History	Release	Modification
	4.0(1a)N2(1)	This command was introduced.

Examples This example shows how to display all Fabric Extender fabric interfaces:

```
switch# show interface fex-fabric
```

Related Commands	Command	Description
	show fex	Displays all configured Fabric Extender chassis connected to the switch.

Send comments to nx5000-docfeedback@cisco.com

show interface fex-intf

To display the host interfaces pinned to a fabric interface, use the **show interface fex-intf** command.

show interface *interface* fex-intf

Syntax Description	<i>interface</i>	Ethernet or EtherChannel interface.
---------------------------	------------------	-------------------------------------

Command Default	None
------------------------	------

Command Modes	EXEC mode
----------------------	-----------

Command History	Release	Modification
	4.0(1a)N2(1)	This command was introduced.

Examples	This example shows how to display the host interfaces pinned to an Ethernet fabric interface on the parent switch:
-----------------	--

```
switch# show interface ethernet 1/1 fex-intf
```

This example shows how to display the host interfaces pinned to an EtherChannel fabric interface on the parent switch:
--

```
switch# show interface port-channel 1 fex-intf
```

Related Commands	Command	Description
	show fex	Displays all configured Fabric Extender chassis connected to the switch.

 show interface transceiver fex-fabric

Send comments to nx5000-docfeedback@cisco.com

show interface transceiver fex-fabric

To display information about all transceivers connected to fabric interfaces, use the **show interface transceiver fex-fabric** command.

show interface transceiver fex-fabric [calibration | detail]

Syntax Description	calibration (Optional) Displays detailed calibration information about the transceiver. detail (Optional) Displays detailed diagnostic information about the transceiver.
---------------------------	--

Command Default	None
------------------------	------

Command Modes	EXEC mode
----------------------	-----------

Command History	Release	Modification
	4.0(1a)N2(1)	This command was introduced.

Examples	This example shows how to display information about all transceivers that connect to fabric interfaces:
	<code>switch# show interface transceiver fex-fabric</code>

Related Commands	Command	Description
	show fex	Displays all configured Fabric Extender chassis connected to the switch.

Send comments to nx5000-docfeedback@cisco.com

show queuing interface

To display the queuing information of interfaces, use the show queuing interface command.

show queuing interface [ethernet slot-chassis-no/port-slot-no/port-no]

Syntax Description	ethernet (Optional) Specifies that queuing information be displayed for an Ethernet interface or a Fabric Extender. slot-chassis-no Slot number of the Ethernet interface or chassis ID of the Fabric Extender. The range is from 1 to 255. port-slot-no Port number of the Ethernet interface or the remote slot ID of the Fabric Extender. The range is from 1 to 128. port-no Port number of the Fabric Extender. The range is from 1 to 48.
---------------------------	--

Command Default Displays the queuing information for all interfaces.

Command Modes EXEC mode

Command History	Release	Modification
	4.1(3)N1(1)	This command was introduced.

Examples This example shows how to display the queuing information of a specified interface:

```
switch# show queuing interface ethernet 1/4

Interface Ethernet1/4 TX Queuing
qos-group  sched-type  oper-bandwidth
  0          WRR          50
  1          WRR          50
  5          priority      0

Interface Ethernet1/4 RX Queuing
qos-group  0:
  q-size: 102400, MTU: 1538
  drop-type: drop, xon: 0, xoff: 640
  Statistics:
    Pkts received over the port : 1
    Ucast pkts sent to the cross-bar : 0
    Mcast pkts sent to the cross-bar : 1
    Ucast pkts received from the cross-bar : 1577841
    Pkts sent to the port : 1577841
    Pkts discarded on ingress : 0
    Per-priority-pause status : Rx (Inactive), Tx (Inactive)

qos-group  1:
  q-size: 76800, MTU: 2240
  drop-type: no-drop, xon: 128, xoff: 240
  Statistics:
```

■ show queuing interface

Send comments to nx5000-docfeedback@cisco.com

```

Pkts received over the port : 0
Ucast pkts sent to the cross-bar : 0
Mcast pkts sent to the cross-bar : 0
Ucast pkts received from the cross-bar : 0
Pkts sent to the port : 0
Pkts discarded on ingress : 0
Per-priority-pause status : Rx (Inactive), Tx (Inactive)

qos-group 5:
  q-size: 122880, MTU: 1538
  drop-type: drop, xon: 0, xoff: 768
  Statistics:
    Pkts received over the port : 0
    Ucast pkts sent to the cross-bar : 0
    Mcast pkts sent to the cross-bar : 0
    Ucast pkts received from the cross-bar : 0
    Pkts sent to the port : 1
    Pkts discarded on ingress : 0
    Per-priority-pause status : Rx (Inactive), Tx (Inactive)
switch#

```

Table 4-1 describes the significant fields shown in the display.

Table 4-1 show queuing interface Field Descriptions

Field	Description
Ethernet ...	Ethernet interface information.
qoS-group	Information about QoS groups configured on the switch.
sched-type	Type of schedule.
WRR	Weighted round robin(WRR). Queue eight for scheduling.
Priority	Priority of the queue.
q-size	Queue size.
drop-type	Queue drop type can be either drop or no-drop.
MTU	Maximum transmit unit (MTU) for the queue.
Xon	Transmission on at this threshold.
Xoff	Transmission off at this threshold.

Related Commands

Command	Description
show fex	Displays all configured Fabric Extender chassis connected to the switch.

Send comments to nx5000-docfeedback@cisco.com

switchport mode fex-fabric

To set the interface type to be an uplink port for a Fabric Extender, use the **switchport mode fex-fabric** command.

switchport mode fex-fabric

no switchport mode fex-fabric

Syntax Description This command has no arguments or keywords.

Command Default None

Command Modes Interface configuration mode

Command History	Release	Modification
	4.0(1a)N2(1)	This command was introduced.

Examples This example shows how to set an Ethernet interface to be an uplink port for a Fabric Extender:

```
switch# configure terminal
switch(config)# interface ethernet 1/40
switch(config-if)# switchport mode fex-fabric
```

This example shows how to set an EtherChannel interface to be an uplink port for a Fabric Extender:

```
switch# configure terminal
switch(config)# interface port-channel 4
switch(config-if)# switchport mode fex-fabric
```

Related Commands	Command	Description
	fex associate	Associates a Fabric Extender to an Ethernet or EtherChannel interface.
	show fex	Displays all configured Fabric Extender chassis connected to the switch.

■ switchport mode fex-fabric

Send comments to nx5000-docfeedback@cisco.com
