CHAPTER **10**

Vpc Commands

This chapter describes the Cisco NX-OS Vpc commands available on Cisco Nexus 5000 Series switches.

 show running-config vpc

Send comments to nx5000-docfeedback@cisco.com

show running-config vpc

To display the running configuration information for virtual port channels (vPCs), use the **show running-config vpc** command.

show running-config vpc [all]

Syntax Description[all	(Optional) Displays running configuration for vPC with defaults.
----------------------------	------------	--

Defaults	None
-----------------	------

Command Modes	Any command mode.
----------------------	-------------------

Command History	Release	Modification
	4.1(3)N1(1)	This command was introduced.

Usage Guidelines	This command does not require a license.
-------------------------	--

Examples	This example shows how to display the running configuration for a vPC:
-----------------	--

```
switch (config)# show running-config vpc
version 4.1(3)N1(1)
feature vpc
vpc domain 1000
  role priority 9000
  peer-keepalive destination 10.193.183.56
  peer-config-check-bypass
interface port-channel1
  vpc peer-link
interface port-channel3
  vpc 4096
interface port-channel5
  vpc 4001
interface port-channel12
  vpc 4000
interface port-channel24
  vpc 2000
interface port-channel41
  vpc 41
interface port-channel48
  vpc 48
```

Related Commands	Command	Description
	show vpc brief	Displays information about vPCs. If the feature is not enabled, this command returns an error.

Send comments to nx5000-docfeedback@cisco.com

show startup-config vpc

To display virtual port-channel (vPC) configuration information in the startup-configuration, use the **show startup-config vpc** command.

show startup-config vpc [all]

Syntax Description	all (Optional) Displays startup-configuration information for all vPCs.				
Defaults	None				
Command Modes	Any command mode.				
Command History	<table border="1"> <thead> <tr> <th>Release</th><th>Modification</th></tr> </thead> <tbody> <tr> <td>4.1(3)N1(1)</td><td>This command was introduced.</td></tr> </tbody> </table>	Release	Modification	4.1(3)N1(1)	This command was introduced.
Release	Modification				
4.1(3)N1(1)	This command was introduced.				
Usage Guidelines	This command does not require a license.				
Examples	<p>This example shows how to display the vPC information in the startup configuration:</p> <pre>switch(config)# show startup-config vpc version 4.1(3)N1(1) feature vpc vpc domain 1000 peer-keepalive destination 10.193.183.56 peer-config-check-bypass interface port-channel1 vpc peer-link interface port-channel3 vpc 4096 interface port-channel5 vpc 4001 interface port-channel12 vpc 4000 interface port-channel24 vpc 2000</pre>				
Related Commands	<table border="1"> <thead> <tr> <th>Command</th><th>Description</th></tr> </thead> <tbody> <tr> <td>show vpc brief</td><td>Displays information about vPCs. If the feature is not enabled, the system displays an error when you enter this command.</td></tr> </tbody> </table>	Command	Description	show vpc brief	Displays information about vPCs. If the feature is not enabled, the system displays an error when you enter this command.
Command	Description				
show vpc brief	Displays information about vPCs. If the feature is not enabled, the system displays an error when you enter this command.				

■ show tech-support vpc

Send comments to nx5000-docfeedback@cisco.com

show tech-support vpc

To display detailed technical support information for virtual port-channel (vPC), use the **show show tech-support vpc** command.

show tech-support vpc

Syntax Description[None	This command has no arguments or keywords.
Defaults	None	
Command Modes	Any command mode.	
Command History	Release	Modification
	4.1(3)N1(1)	This command was introduced.
Usage Guidelines	This command does not require a license.	
Examples	<pre>switch(config)# show tech-support vpc version 4.1(3)N1(1) Cisco Nexus Operating System (NX-OS) Software TAC support: http://www.cisco.com/tac Copyright (c) 2002-2010, Cisco Systems, Inc. Related Commands	Command	Description
	show vpc brief	Displays information about vPCs. If the feature is not enabled, the system displays an error when you enter this command.

show vpc brief**Send comments to nx5000-docfeedback@cisco.com**

show vpc brief

To display brief information about the virtual port channels (vPCs), use the **show vpc brief** command.

show vpc brief [vpc number]

Syntax Description	vpc number	(Optional) Displays the brief information for the specified vPC. The range is from 1 to 4096.
---------------------------	-------------------	---

Defaults	None
-----------------	------

Command Modes	Any command mode.
----------------------	-------------------

Command History	Release	Modification
	4.1(3)N1(1)	This command was introduced.

Usage Guidelines	The show vpc brief command displays the vPC domain ID, the peer-link status, the keepalive message status, whether the configuration consistency is successful, and whether peer-link formed or the failure to form.
-------------------------	---

This command is not available if you have not enabled the vPC feature. See **feature vpc** for information on enabling vPCs.

You can display the track object, if you have configured a tracked object for running vPCs on a single module under the vpc-domain configuration mode. This command does not require a license.

Examples	This example shows how to display brief information about the vPCs:
-----------------	---

```
switch(config)# show vpc brief

Legend:
(*) - local vpc is down, forwarding via vPC peer-link

vPC domain id          : 10
Peer status             : peer adjacency formed ok
vPC keep-alive status   : peer is alive
Configuration consistency status: success
vPC role                : primary
Number of vPC configured : 1

vPC Peer-link status
-----
id  Port    Status Active vlans
--  ----    ----  -----
1   Po10   up      1-100

vPC status
-----
```

Send comments to nx5000-docfeedback@cisco.com

id	Port	Status	Consistency	Reason	Active vlans
20	Po20	up	success	success	1-100

This example also shows how to display brief information about the vPCs. In this example, the port channel failed the consistency check, and the device displays the reason for the failure:

```
switch(config)# show vpc brief

Legend:
(*) - local vpc is down, forwarding via vPC peer-link

vPC domain id : 10
Peer status : peer adjacency formed ok
vPC keep-alive status : peer is alive
Configuration consistency status: failed
Configuration consistency reason: vPC type-1 configuration incompatible - STP interface
port type inconsistent
vPC role : secondary
Number of vPC configured : 1

vPC Peer-link status
-----
id Port Status Active vlans
-- -- -
1 Po10 up 1-100

vPC status
-----
id Port Status Consistency Reason Active vlans
-- -- -
20 Po20 up failed vPC type-1 configuration - 
incompatible - STP
interface port type
inconsistent
```

This example also shows how to display information about the tracked objects in the vPCs:

```
switch(config)# show vpc brief

Legend:
(*) - local vpc is down, forwarding via vPC peer-link

vPC domain id : 1
Peer status : peer adjacency formed ok
vPC keep-alive status : peer is alive
Configuration consistency status: success
vPC role : secondary
Number of vPC configured : 3
Track object : 12

vPC Peer-link status
-----
id Port Status Active vlans
-- -- -
1 Po10 up 1-100
```

■ show vpc brief

Send comments to nx5000-docfeedback@cisco.com

Related Commands	Command	Description
	show tech-support vpc	Displays detailed technical support information for virtual port-channel (vPC).

Send comments to nx5000-docfeedback@cisco.com

show vpc peer-keepalive

To display the destination IP for the virtual port-channel (vPC) peer keepalive message and the status of the messages, use the **show vpc peer-keepalive** command.

show vpc peer-keepalive

Syntax Description This command has no arguments or keywords.

Defaults None

Command Modes Any command mode.

Command History	Release	Modification
	4.1(3)N1(1)	This command was introduced.

Usage Guidelines The **show vpc peer-keepalive** command displays the destination IP of the peer keepalive message for the vPC. The command also displays the send and receive status as well as the last update from the peer in seconds and milliseconds

Note We recommend that you create a separate VRF on the peer devices to send and receive the vPC peer keepalive messages. Do not use the peer link itself to send the vPC peer-keepalive messages.

This command does not require a license.

Examples This example shows how to display information about the peer-keepalive message:

```
switch(config)# show vpc peer-keepalive
vPC keep-alive status          : peer is alive
--Peer is alive for            : (41024) seconds, (592) msec
--Send status                  : Success
--Last send at                : 2010.04.08 14:53:00 976 ms
--Sent on interface           : mgmt0
--Receive status               : Success
--Last receive at              : 2010.04.08 14:53:01 5 ms
--Received on interface        : mgmt0
--Last update from peer       : (0) seconds, (818) msec
vPC Keep-alive parameters
--Destination                 : 10.193.183.56
--Keepalive interval          : 1000 msec
--Keepalive timeout            : 5 seconds
--Keepalive hold timeout      : 3 seconds
--Keepalive vrf                : management
--Keepalive udp port           : 3200
--Keepalive tos                : 192
```

■ show vpc peer-keepalive

Send comments to nx5000-docfeedback@cisco.com

Related Commands	Command	Description
	show vpc brief	Displays information about vPCs. If the feature is not enabled, the system displays an error when you enter this command.

Send comments to nx5000-docfeedback@cisco.com

show vpc role

To display information about the virtual port-channel (vPC) role of the peer device, use the **show vpc role** command.

show vpc role

Syntax Description This command has no arguments or keywords.

Defaults None

Command Modes Any command mode.

Command History	Release	Modification
	4.1(3)N1(1)	This command was introduced.

Usage Guidelines The **show vpc role** command displays the following information about the vPC status:

- Status of peer adjacency
- vPC role of the VDC that you are working on
- vPC MAC address
- vPC system priority
- MAC address of the device that you are working on
- System priority for the device that you are working on

This command is not available if you have not enabled the vPC feature. See **feature vpc** for information on enabling vPCs.

This command does not require a license.

Examples This example shows how to display the vPC role information of the device that you are working on:

```
switch (config)# show vpc role
vPC Role status
-----
vPC role : secondary
Dual Active Detection Status : 0
vPC system-mac : 00:23:04:ee:c1:e8
vPC system-priority : 32667
vPC local system-mac : 00:0d:ec:a3:9d:bc
vPC local role-priority : 9000
```

■ show vpc role

Related Commands	Command	Description
	show vpc brief	Displays information about vPCs. If the feature is not enabled, the system displays an error when you enter this command.

Send comments to nx5000-docfeedback@cisco.com

show vpc statistics peer-keepalive

To display virtual port-channel (vPC) statistics, use the **show vpc statistics peer-keepalive** command.

show vpc statistics peer-keepalive

Syntax Description[peer-keepalive	Displays statistics about the peer-keepalive message.
Defaults	None	
Command Modes	Any command mode.	
Command History	Release	Modification
	4.1(3)N1(1)	This command was introduced.
Usage Guidelines	This command does not require a license.	
Examples	<p>This example shows how to display statistics about the peer-keepalive message:</p> <pre>switch# show vpc statistics peer-keepalive vPC keep-alive status : peer is alive VPC keep-alive statistics ----- peer-keepalive tx count: 1036 peer-keepalive rx count: 1028 average interval for peer rx: 995 Count of peer state changes: 1</pre> <p>This example shows how to display statistics about the peer-link message:</p>	
Related Commands	Command	Description
	show vpc brief	Displays information about vPCs. If the feature is not enabled, the system displays an error when you enter this command.
	show port channel summary	Displays information about port channels.

■ show vpc statistics

Send comments to nx5000-docfeedback@cisco.com

show vpc statistics

To display virtual port-channel (vPC) statistics, use the **show vpc statistics** command.

show vpc statistics {vpc <vpc_num> | peer-link}

Syntax Description[peer-link Displays statistics about the peer link. the peer-keepalive message.
	vpc_num Displays statistics about the specified vPC. The range is from 1 to 4096.

Defaults	None
-----------------	------

Command Modes	Any command mode.
----------------------	-------------------

Command History	Release	Modification
	4.1(3)N1(1)	This command was introduced.

Usage Guidelines	The peer-link parameter displays the same information as the show interface port-channel channel number command for the vPC peer-link port channel.
-------------------------	---

This command does not require a license.

Examples	This example shows how to display statistics about the peer-link message:
-----------------	---

```
d14-switch-2# show vpc statistics peer-link
port-channel1 is up
  Hardware: Port-Channel, address: 000d.eca3.9da5 (bia 000d.eca3.9da5)
  MTU 1500 bytes, BW 160000000 Kbit, DLY 10 usec,
    reliability 255/255, txload 1/255, rxload 1/255
  Encapsulation ARPA
  Port mode is trunk
  full-duplex, 10 Gb/s
  Beacon is turned off
  Input flow-control is off, output flow-control is off
  Switchport monitor is off
  Members in this channel: Eth1/1, Eth1/2, Eth1/3, Eth1/4, Eth1/21, Eth1/22, Eth1/23,
Eth1/24, Eth1/25, Eth1/26, Eth1/27
  , Eth1/28, Eth1/29, Eth1/30, Eth1/31, Eth1/32
  Last clearing of "show interface" counters never
  30 seconds input rate 2645539776 bits/sec, 4842090 packets/sec
  30 seconds output rate 1184009112 bits/sec, 2177802 packets/sec
  Load-Interval #2: 5 minute (300 seconds)
    input rate 2.48 Gbps, 4.55 Mpps; output rate 1.22 Gbps, 2.24 Mpps
  RX
    356216924324 unicast packets 11366280385 multicast packets 0 broadcast packets
    367583204709 input packets 25317981509171 bytes
```

Send comments to nx5000-docfeedback@cisco.com

```

0 jumbo packets 0 storm suppression packets
0 runts 0 giants 0 CRC 0 no buffer
0 input error 0 short frame 0 overrun 0 underrun 0 ignored
0 watchdog 0 bad etype drop 0 bad proto drop 0 if down drop
0 input with dribble 0 input discard
81372137 Rx pause
TX
95309974177 unicast packets 2491785887 multicast packets 0 broadcast packets
97801760066 output packets 6605708744882 bytes
0 jumbo packets
2 output errors 0 collision 0 deferred 0 late collision
0 lost carrier 0 no carrier 0 babble
377039096 Tx pause
7 interface resets

```

Related Commands	Command	Description
	show vpc brief	Displays information about vPCs. If the feature is not enabled, the system displays an error when you enter this command.
	show port channel summary	Displays information about port channels.

■ **show vpc consistency-parameters**

Send comments to nx5000-docfeedback@cisco.com

show vpc consistency-parameters

To display the consistency of parameters that must be compatible across the virtual port-channel (vPC) interfaces, use the **show vpc consistency-parameters** command.

show vpc consistency-parameters {global | interface <if>}

Syntax Description	global (Optional) Displays the configuration of all Type 1 global parameters on both sides of the vPC peer link. interface <if> (Optional) Displays the configuration of all Type 1 interface channel-number parameters on both sides of the vPC peer link.
---------------------------	--

Defaults	None
-----------------	------

Command Modes	Any command mode.
----------------------	-------------------

Command History	Release	Modification
	4.1(3)N1(1)	This command was introduced.

Usage Guidelines	The show vpc consistency-parameters command displays the configuration of all the vPC Type 1 parameters on both sides of the vPC peer link.
-------------------------	--

Note All the Type 1 configurations must be identical on both sides of the vPC peer link, or the link will not come up.

The vPC Type 1 configuration parameters are as follows:

- Port-channel mode: on, off, or active
- Link speed per channel
- Duplex mode per channel
- Trunk mode per channel
 - Native VLAN
 - VLANs allowed on trunk
 - Tagging of native VLAN traffic
- Spanning Tree Protocol (STP) mode
- STP region configuration for Multiple Spanning Tree
- Enable/disable state the same per VLAN
- STP global settings
 - Bridge Assurance setting

Send comments to nx5000-docfeedback@cisco.com

- Port type setting—We recommend that you set all vPC peer link ports as network ports.
- Loop Guard settings
- STP interface settings:
 - Port type setting
 - Loop Guard
 - Root Guard
- Maximum transmission unit (MTU)
- Allowed VLAN bit set

This command is not available if you have not enabled the vPC feature. See **feature vpc** for information on enabling vPCs.

This command does not require a license.

Examples

This example shows how to display the vPC consistency parameters for the specified port channel:

```
switch (config)# show vpc consistency-parameters global
```

Legend:

Type 1 : vPC will be suspended in case of mismatch

Name	Type	Local Value	Peer Value
QoS	1	([], [3], [0], [1-2], [4-5], [6])	([], [3], [0], [1-2], [4-5], [6])
Network QoS (MTU)	1	(1538, 2240, 5038, 4038, 9216, 9216)	(1538, 2240, 5038, 4038, 9216, 9216)
Network Qos (Pause)	1	(F, T, T, F, F, F)	(F, T, T, F, F, F)
Input Queuing (Bandwidth)	1	(5, 10, 20, 0, 20, 40)	(5, 10, 20, 0, 20, 40)
Input Queuing (Absolute Priority)	1	(F, F, T, F, F, F)	(F, F, T, F, F, F)
Output Queuing (Bandwidth)	1	(5, 10, 20, 0, 20, 40)	(5, 10, 20, 0, 20, 40)
Output Queuing (Absolute Priority)	1	(F, F, T, F, F, F)	(F, F, T, F, F, F)
STP Mode	1	Rapid-PVST	Rapid-PVST
STP Disabled	1	None	None
STP MST Region Name	1	" "	" "
STP MST Region Revision	1	0	0
STP MST Region Instance to VLAN Mapping	1		
STP Loopguard	1	Disabled	Disabled
STP Bridge Assurance	1	Enabled	Enabled
STP Port Type, Edge	1	Normal, Disabled,	Normal, Disabled,
BPDUFilter, Edge BPDUGuard		Disabled	Disabled
STP MST Simulate PVST	1	Enabled	Enabled
Allowed VLANs	-	1-330,333-450,1000-102 3,2000-2023	1-330,333-447,1000-102 8,2000-2018
Local suspended VLANs	-	331-332,448-450,2019-2 - 023	

This example shows how to display the vPC consistency parameters for the specified port channel:

```
switch (config)# show vpc consistency-parameters interface port-channel 20
```

Legend:

Type 1 : vPC will be suspended in case of mismatch

Name	Type	Local Value	Peer Value

■ **show vpc consistency-parameters**

Send comments to nx5000-docfeedback@cisco.com

STP Port Type	1	Default	Default
STP Port Guard	1	None	None
mode	1	on	on
Speed	1	10 Gb/s	10 Gb/s
Duplex	1	full	full
Port Mode	1	trunk	trunk
Native Vlan	1	1	1
MTU	1	1500	1500

show vpc orphan-ports

To display ports that are not part of the virtual port channel (vPC) but have common VLANs, use the **show vpc orphan-ports** command.

show vpc orphan-ports

Syntax Description This command has no arguments or keywords.

Defaults None

Command Modes Any command mode.

Command History	Release	Modification
	4.1(3)N1(1)	This command was introduced.

Usage Guidelines The **show vpc orphan-ports** command displays those ports that are not part of the vPC but that share common VLANs with ports that are part of the vPC.

This command is not available if you have not enabled the vPC feature. See **feature vpc** for information on enabling vPCs.

This command does not require a license.

Examples This example shows how to display vPC orphan ports:

```
switch(config)# show vpc orphan ports

Note:
-----:Going through port database. Please be patient.:-----

VLAN      Orphan Ports
-----      -----
1          Po600
2          Po600
3          Po600
4          Po600
5          Po600
6          Po600
7          Po600
8          Po600
9          Po600
10         Po600
11         Po600
12         Po600
13         Po600
14         Po600
15         Po600
```

■ show vpc orphan-ports

Send comments to nx5000-docfeedback@cisco.com

Related Commands	Command	Description
	show vpc brief	Displays brief information about vPCs.

Send comments to nx5000-docfeedback@cisco.com

clear vpc statistics

To clear virtual port-channel (vPC) statistics, use the **clear vpc statistics** command.

clear vpc statistics {all | peer-keepalive | peer-link | vpc *number*}

Syntax Description

all	Clears all vPC statistics on the local vPC peer device.
peer-keepalive	Clears the vPC peer-keepalive statistics on the local vPC peer device.
peer-link	Clears statistics on the local vPC peer device.
vpc <i>number</i>	Clears vPC statistics on the specified vPC. The range is from 1 to 4096.

Defaults

None

Command Modes

Any command mode

Supported User Roles

network-admin
vdc-admin

Command History

Release	Modification
4.1(3)	This command was introduced.

Usage Guidelines

Use the **clear vpc statistics** command to clear the vPC statistics. If the feature is not enabled, this command is unavailable.

The **clear vpc statistics peer-link** and **clear vpc statistics vpc *number*** commands are redirected to the appropriate port channel and the **clear statistics port-channel *channel-number*** command.

This command does not require a license.

Examples

This example shows how to clear the statistics for vPC 10:

```
switch(config)# clear vpc statistics vpc 10
switch(config) #
```

Related Commands

Command	Description
show vpc statistics	Displays vPC statistical information on vPCs. If the feature is not enabled, the system displays an error when you enter this command.

■ clear vpc statistics
