INDEX

limitations 1-15

buffer allocation and QoS configuration 1-11	E
configuring for FCoE COS 1-8	Enhanced Transmission Selection (ETS) 1-12
for FCoE 1-8	Ethernet NIC 1-6
	ETS
C	default settings 1-12
class-fcoe 1-8	
class of service (COS) 1-12	F
and ETS 1-12	FC-MAP 1-2
and PFC 1-12	changing the FC-MAP value 1-2
CNA	default value 1-2
DCB support 1-13	ranges 1-2
second generation 1-6	FCoE
consolidated links 1-9, 1-10	buffer allocation 1-8
benefits 1-10	enabling 1-2
consolidated vs dedicated links 1-9	enabling on VLAN 1 1-3
COS	host disruptions 1-2
default value and FCoE 1-12	interoperability 1-14
	no-drop class of service
D	and QoS configuration example 1-12 predefined QoS policies 1-11
Data Center Bridging eXchange (DCBX) 1-13	QoS configuration 1-11
DCB Ethernet links 1-9	single-hop topology 1-14
DCBX	FCoE fabric
negotiation failure 1-14	best practice 1-3
dedicated links 1-9, 1-10	configuring 1-3
benefits 1-10	FCoE ports
default mode	host-facing 1-3
on Cisco Nexus 5000 Series switch 1-15	FCoE VLAN
Domain IDs	and STP 1-3, 1-4
