

## H Commands

---

This chapter describes the Cisco NX-OS FabricPath commands that begin with H.

# hop

To configure the hop limit for fabricpath OAM service packets in the Transparent Interconnection of Lots of Links (TRILL) protocol header, use the **hop** command in fabricpath OAM profile configuration mode. To revert the hop limit to the default value, use the **no** form of the command.

**hop** *val*

**no hop**

<b>Syntax Description</b>	<i>val</i>	Hop limit. The range is from 1 to 255. Default is 64.
---------------------------	------------	---

<b>Command Default</b>	The hop limit for fabricpath OAM service packtes is 64 hops.
------------------------	--

<b>Command Modes</b>	Fabricpath oam profile (config-fp-oam-profile)
----------------------	--

<b>Command History</b>	<b>Release</b>	<b>Modification</b>
	7.0(0)N1(1)	This command was introduced.

<b>Usage Guidelines</b>	Use the hop count specified in the FabricPath OAM packet header to determine the hop limit to address issues caused by infinite loops.
-------------------------	--

<b>Examples</b>	This example shows how to configure a FabricPath OAM service packet hop limit of 25:
<pre>switch# configure terminal Enter configuration commands, one per line. End with CNTL/Z. switch(config)# fabricpath oam profile 100 switch(config-fp-oam-profile)# hop 25</pre>	

<b>Related Commands</b>	<b>Command</b>	<b>Description</b>

# hostname dynamic (FabricPath)

To configure a dynamic hostname exchange for Intermediate-System-to-Intermediate System (IS-IS), use the **hostname dynamic** command. To return to the default setting, use the **no** form of this command.

**hostname dynamic**

**no hostname dynamic**

**Syntax Description** This command has no arguments or keywords.

**Command Default** ON

**Command Modes** FabricPath IS-IS configuration mode

Command History	Release	Modification
	5.2(1)N1(1)	This command was introduced.

**Usage Guidelines** This command requires an Enhanced Layer 2 license.

**Examples** This example shows how to configure a dynamic hostname exchange for IS-IS:

```
switch# configure terminal  
Enter configuration commands, one per line. End with CNTL/Z.  
switch(config)# fabricpath domain default  
switch(config-fabricpath-isis)# hostname dynamic  
switch(config-fabricpath-isis)#
```

Related Commands	Command	Description
	<b>show hostname</b>	Displays the system's hostname.

■ **hostname dynamic (FabricPath)**
