

L Commands

This chapter describes the Cisco NX-OS Fibre Channel, virtual Fibre Channel, and Fibre Channel over Ethernet (FCoE) commands that begin with L.

lldp

To configure the Link Layer Discovery Protocol (LLDP) global options, use the **lldp** command. To remove the LLDP settings, use the **no** form of this command.

lldp {holdtime seconds | reinit seconds | timer seconds}

no lldp {holdtime | reinit | timer}

Syntax Description	holdtime seconds	Specifies the hold time (in seconds) to set the length of time that a device should save LLDP information received before discarding it.
		The range is from 10 to 255, and the default is 120 seconds.
	reinit seconds	Specifies the length of time (in seconds) to wait before performing LLDP initialization on any interface.
		The range is from 1 to 10 seconds, and the default is 2 seconds.
	timer seconds	Specifies the rate (in seconds) at which LLDP packets are sent.
		The range is from 5 to 254 seconds, and the default is 30 seconds.
Command Default	Holdtime: 120 seconds.	
	Reinit: 2 seconds. Timer: 30 seconds.

IIdp (interface)

To enable the reception, or transmission, of Link Layer Discovery Protocol (LLDP) packets on an interface, use the **lldp** command. To disable the reception or transmission of LLDP packets, use the **no** form of this command.

lldp {receive | transmit}

no lldp {receive | transmit}

Syntax Description	receive	Specifies that the interface receive LLDP packets.
	transmit	Specifies that the interface transmit LLDP packets.
ommand Default	None	
ommand Modes	Interface configurat	ion mode
command History	Release	Modification
	5.0(2)N1(1)	This command was introduced.
Examples	This example shows	s how to set an interface to transmit LLDP packets:
	<pre>switch(config)# interface ethernet 2/1 switch(config-if)# lldp transmit switch(config-if)#</pre>

Related Commands		•

logging abort

To discard the logging Cisco Fabric Services (CFS) distribution session in progress, use the **logging abort** command.

logging abort

Syntax Description	This command has n	no arguments or keywor	ds.
--------------------	--------------------	------------------------	-----

Command Default None

Command Modes Global configuration mode

Command History	Release	Modification
	5.0(2)N1(1)	This command was introduced.

Examples This example shows how to discard the logging CFS distribution session in progress: switch(config)# logging abort

Related Commands	Command	Description
	show logging	Displays logging information.

logging commit

To apply the pending configuration pertaining to the logging Cisco Fabric Services (CFS) distribution session in progress in the fabric, use the **logging commit** command.

logging commit

Syntax Description	This command has no arguments or keywords.	
Command Default	None	
Command Modes	Global configuration	mode
Command History	Release	Modification
	5.0(2)N1(1)	This command was introduced.
Examples	This example shows how to commit changes to the active logging configuration: switch(config)# logging commit	
Related Commands	Command	Description
	show logging	Displays logging information.

logging distribute

To enable Cisco Fabric Services (CFS) distribution for logging, use the **logging distribute** command. To disable this feature, use the **no** form of this command.

logging distribute

no logging distribute

Syntax Description	This command has no	arguments or keywords.
--------------------	---------------------	------------------------

Command Default Disabled

Command Modes Global configuration mode

Command History	Release	Modification
	5.0(2)N1(1)	This command was introduced.

Usage Guidelines Before distributing the Fibre Channel timer changes to the fabric, the temporary changes to the configuration must be committed to the active configuration using the **logging commit** command.

Examples This example shows how to change the distribute logging configuration changes: switch(config)# logging distribute

Related Commands	Command Description	
	logging commit	Commits the logging configuration changes to the active configuration.
	show logging	Displays logging information.
