

P Commands

This chapter describes the Cisco NX-OS Fibre Channel, virtual Fibre Channel, and Fibre Channel over Ethernet (FCoE) commands that begin with P.

port-track force-shut

To force a shutdown of a tracked port, use the **port-track force-shut** command. To reenable the port tracking, use the **no** form of this command.

port-track force-shut

no port-track force-shut

Syntax Description This command has no arguments or keywords
--

Command Default None

Command Modes Interface configuration mode

Command History	Release	Modification
	5.0(2)N1(1)	This command was introduced.

Usage Guidelines Use the port-track force-shut command to keep the linked port down, even though the tracked port comes back up. You must explicitly bring the port up when required by using the no port-track force-shut command.

Examples This example shows how to force the shutdown of an interface and the interfaces that it is tracking: switch(config)# interface fc 2/2 switch(config-if)# no port-track force-shut

Related Commands	Command	Description
	feature port-track	Enables port tracking.
	show interface fc	Displays configuration and status information for a specified Fibre Channel interface.
	show interface san-port-channel	Displays configuration and status information for a specified SAN port channel interface.

port-track interface

To enable port tracking for specific interfaces, use the **port-track interface** command. To disable this feature, use the **no** form of this command.

port-track interface {fc slot/port | san-port-channel port} [vsan vsan-id]

no port-track interface {**fc** *slot/port* | **san-port-channel** *port*} [**vsan** *vsan-id*]

Syntax Description	fc slot/port	Specifies a Fibre Channel interface.	
	san-port-channel port	Specifies a SAN port channel interface. The range is from 1 to 128.	
	vsan vsan-id	(Optional) Specifies a VSAN ID. The range is from 1 to 4093.	
Command Default	None		
Command Modes	Interface configuration mode		
Command History	Release	Modification	
-	5.0(2)N1(1)	This command was introduced.	
Usage Guidelines	port comes back up, the	terface is tracking goes down, the interface also goes down. When the tracked linked interface also comes back up. Use the port-track force-shut command	
Usage Guidelines Examples	port comes back up, the to keep the linked interfa This example shows how switch(config)# inter	linked interface also comes back up. Use the port-track force-shut command ace down. v to enable port tracking for specific interfaces: face fc 2/3	
Examples	port comes back up, the to keep the linked interfa This example shows how switch(config)# inter: switch(config-if)# por	linked interface also comes back up. Use the port-track force-shut command ace down. v to enable port tracking for specific interfaces: face fc 2/3 rt-track interface san-port-channel 2	
	port comes back up, the to keep the linked interfa This example shows how switch(config) # interfa switch(config-if) # por	linked interface also comes back up. Use the port-track force-shut command ace down. w to enable port tracking for specific interfaces: face fc 2/3 rt-track interface san-port-channel 2 Description	
Examples	port comes back up, the to keep the linked interfa This example shows how switch(config)# inter switch(config-if)# por Command feature port-track	<pre>linked interface also comes back up. Use the port-track force-shut command ace down. v to enable port tracking for specific interfaces: face fc 2/3 rt-track interface san-port-channel 2 Description Enables port tracking.</pre>	
Examples	port comes back up, the to keep the linked interfa This example shows how switch(config)# inter switch(config-if)# por Command feature port-track port-track force-shut	<pre>linked interface also comes back up. Use the port-track force-shut command ace down. v to enable port tracking for specific interfaces: face fc 2/3 rt-track interface san-port-channel 2 Description Enables port tracking. Forcefully shuts an interface for port tracking.</pre>	
Examples	port comes back up, the to keep the linked interfa This example shows how switch(config)# inter switch(config-if)# por Command feature port-track	<pre>linked interface also comes back up. Use the port-track force-shut command ace down. v to enable port tracking for specific interfaces: face fc 2/3 rt-track interface san-port-channel 2 Description Enables port tracking.</pre>	

purge fcdomain fcid

To purge persistent FCIDs, use the **purge fcdomain fcid** command.

purge fcdomain fcid vsan vsan-id

Syntax Description	vsan vsan-id	Indicates that FCIDs are to be purged for a VSAN ID. The range is from 1 to 4093.	
command Default	None		
ommand Modes	EXEC mode		
command History	Release	Modification	
	5.0(2)N1(1)	This command was introduced.	
Examples	This example shows how to purge all dynamic, unused FCIDs in VSAN 4: switch# purge fcdomain fcid vsan 4		
	This example shows how to purge all dynamic, unused FCIDs in VSANs 4, 5, and 6: switch# purge fcdomain fcid vsan 4-6		
elated Commands	Command	Description	
	show fcdomain	Displays the Fibre Channel domain (fcdomain) information.
