F Commands

This chapter describes the Cisco NX-OS virtual port channel (vPC) commands that begin with F.

feature vpc

To enable a virtual port channel (vPC), which allows links that are physically connected to two different Cisco Nexus 5000 Series devices to appear as a single port channel to a third device, use the **feature vpc** command. To disable vPC on the switch, use the **no** form of this command.

feature vpc

no feature vpc

Syntax Description   This command has no arguments or keywords.

Command Default   Disabled

Command Modes   Global configuration mode

Command History

Release	Modification
5.2(1)N1(1)	This command was introduced.

Usage Guidelines   In a vPC configuration, the third device can be a Cisco Nexus 2000 Series Fabric Extender, switch, server, or any other networking device.

Examples   This example shows how to enable vPC on the switch:

```
switch(config)# feature vpc
```

Related Commands
