

G Commands

This chapter describes the basic Cisco NX-OS system commands that begin with G.

gunzip

To uncompress a compressed file, use the **gunzip** command.

gunzip [filesystem:] [//server/] [directory] filename

Syntax Description	filesystem:	(Optional) Name of the file system. Valid values are bootflash , modflash , or volatile .
	server	(Optional) Name of the server. Valid values are ///, //module-1/, //sup-1/, //sup-active/, or //sup-local/. The double slash (//) is required.
	directory	(Optional) Name of a directory. The directory name is case sensitive.
	filename	Name of the file to uncompress. The filename is case sensitive.
Note		paces in the <i>filesystem://server/directory/filename</i> string. Individual elements of this ed by colons (:) and slashes (/).
Command Default	None	
Command Modes	EXEC mode	
Command History	Release	Modification
Command History	Release 6.0(2)N1(1)	Modification This command was introduced.
	6.0(2)N1(1)	
	6.0(2)N1(1) The compressed f	This command was introduced.
Usage Guidelines	6.0(2)N1(1) The compressed f The Cisco NX-OS	This command was introduced. ilename must have the .gz extension.
Command History Usage Guidelines Examples	6.0(2)N1(1) The compressed f The Cisco NX-OS	This command was introduced. ilename must have the .gz extension. Software uses Lempel-Ziv 1977 (LZ77) coding for compression.
Usage Guidelines	6.0(2)N1(1) The compressed f The Cisco NX-OS This example show	This command was introduced. ilename must have the .gz extension. Software uses Lempel-Ziv 1977 (LZ77) coding for compression.

Compresses a file.

gzip

gzip

To compress a file, use the **gzip** command.

gzip [filesystem:] [//server/] [directory] filename

Syntox Description		
Syntax Description	filesystem:	(Optional) Name of the file system. Valid values are bootflash , modflash , or volatile .
	server	(Optional) Name of the server. Valid values are ///, //module-1/, //sup-1/, //sup-active/, or //sup-local/. The double slash (//) is required.
	directory	(Optional) Name of a directory. The directory name is case sensitive.
	filename	Name of the file to compress. The filename is case sensitive.
Note		aces in the <i>filesystem://server/directory/filename</i> string. Individual elements of this
	string are separated	by colons (:) and slashes (/).
Command Default	None	
Command Modes	EXEC mode	
Command History	Release	Modification
Command History	Release 6.0(2)N1(1)	Modification This command was introduced.
	6.0(2)N1(1)	This command was introduced.
	6.0(2)N1(1) After you run this c added to its filenan	This command was introduced.
Usage Guidelines	6.0(2)N1(1) After you run this c added to its filenan The Cisco NX-OS	This command was introduced. command, the named file is replaced with a compressed file that has the .gz extension ne. software uses Lempel-Ziv 1977 (LZ77) coding for compression.
Command History Usage Guidelines Examples	6.0(2)N1(1) After you run this c added to its filenan The Cisco NX-OS	This command was introduced. command, the named file is replaced with a compressed file that has the .gz extension ne. software uses Lempel-Ziv 1977 (LZ77) coding for compression.
Usage Guidelines	6.0(2)N1(1) After you run this c added to its filenan The Cisco NX-OS This example show	This command was introduced. command, the named file is replaced with a compressed file that has the .gz extension ne. software uses Lempel-Ziv 1977 (LZ77) coding for compression.
