

## **W** Commands

This chapter describes the Cisco NX-OS quality of service (QoS) commands that begin with W.

## wrr-queue cos-map

To map assigned class of service (CoS) values to select one of the egress queues, use the **wrr-queue cos-map** command. To return the CoS map to the default setting, use the **no** form of this command.

wrr-queue cos-map queue-id cos1 ... cos8

no wrr-queue cos-map queue-id cos1 ... cos8

Syntax Description	queue-id	ID of the egress queue. The range is from 0 to 3.	
	<i>cos1 cos8</i>	CoS values that are mapped to select a queue. Enter up to eight CoS values. Separate each value with a space. The range is from 0 to 7.	
Command Default	The defaults are as	s follows:	
	• Receive queue 0 and transmit queue 0: CoS 0 and 1.		
	• Receive queue 1 and transmit queue 1: CoS 2 and 3.		
	• Receive queue 2 and transmit queue 2: CoS 4 and 5.		
	• Receive queue	e 3 and transmit queue 3: CoS 6 and 7.	
Command Modes	Global configuration mode		
Command History	Release	Modification	
	6.0(2)N1(1)	This command was introduced.	
Usage Guidelines			
Note	This command is a	applicable only to Layer 3 multicast traffic.	
		ommand to distribute traffic into different queues, where each queue is configured with round robin (WRR) parameters.	
	-	a maximum of four multicast queues for Layer 3 multicast traffic. We recommend that east one class of service (CoS) value for each multicast queue.	
Examples	This example shows how to map CoS values 0 and 1 to queue 1:		
	<pre>switch(config)# ' switch(config)#</pre>	wrr-queue cos-map 1 0 1	

<b>Related Commands</b>	Command	Description
	show wrr-queue	Displays the weighted round-robin (WRR) queue information.
	cos-map
