

## F Commands

---

This chapter describes the Cisco NX-OS security commands that begin with F.

---

 feature (user role feature group)

# feature (user role feature group)

To configure a feature in a user role feature group, use the **feature** command. To delete a feature in a user role feature group, use the **no** form of this command.

**feature** *feature-name*

**no feature** *feature-name*

<b>Syntax Description</b>	<i>feature-name</i>	Switch feature name as listed in the <b>show role feature</b> command output.						
<b>Command Default</b>	None							
<b>Command Modes</b>	User role feature group configuration mode							
<b>Command History</b>	<table border="1"> <thead> <tr> <th><b>Release</b></th><th><b>Modification</b></th></tr> </thead> <tbody> <tr> <td>6.0(2)N1(1)</td><td>This command was introduced.</td></tr> </tbody> </table>	<b>Release</b>	<b>Modification</b>	6.0(2)N1(1)	This command was introduced.			
<b>Release</b>	<b>Modification</b>							
6.0(2)N1(1)	This command was introduced.							
<b>Usage Guidelines</b>	Use the <b>show role feature</b> command to list the valid feature names to use in this command.							
<b>Examples</b>	<p>This example shows how to add features to a user role feature group:</p> <pre>switch(config)# role feature-group name SecGroup switch(config-role-featuregrp)# feature aaa switch(config-role-featuregrp)# feature radius switch(config-role-featuregrp)# feature tacacs</pre> <p>This example shows how to remove a feature from a user role feature group:</p> <pre>switch(config)# role feature-group name MyGroup switch(config-role-featuregrp)# no feature callhome</pre>							
<b>Related Commands</b>	<table border="1"> <thead> <tr> <th><b>Command</b></th><th><b>Description</b></th></tr> </thead> <tbody> <tr> <td><b>role feature-group</b> <i>name</i></td><td>Creates or configures a user role feature group.</td></tr> <tr> <td><b>show role feature-group</b></td><td>Displays the user role feature groups.</td></tr> </tbody> </table>		<b>Command</b>	<b>Description</b>	<b>role feature-group</b> <i>name</i>	Creates or configures a user role feature group.	<b>show role feature-group</b>	Displays the user role feature groups.
<b>Command</b>	<b>Description</b>							
<b>role feature-group</b> <i>name</i>	Creates or configures a user role feature group.							
<b>show role feature-group</b>	Displays the user role feature groups.							

# feature dhcp

To enable the Dynamic Host Configuration Protocol (DHCP) snooping feature on the device, use the **feature dhcp** command. To disable the DHCP snooping feature and remove all configuration related to DHCP snooping, use the **no** form of this command.

**feature dhcp**

**no feature dhcp**

**Syntax Description** This command has no arguments or keywords.

**Command Default** Disabled

**Command Modes** Global configuration mode

Command History	Release	Modification
	6.0(2)N1(1)	This command was introduced.

**Usage Guidelines** The DHCP snooping feature is disabled by default. DHCP snooping can be enabled or disabled on VLANs.

If you have not enabled the DHCP snooping feature, commands related to DHCP snooping are unavailable.

Dynamic ARP inspection and IP Source Guard depend upon the DHCP snooping feature.

If you disable the DHCP snooping feature, the device discards all configuration related to DHCP snooping configuration, including the following features:

- DHCP snooping
- DHCP relay
- Dynamic ARP Inspection (DAI)
- IP Source Guard

If you want to turn off DHCP snooping and preserve configuration related to DHCP snooping, disable DHCP snooping globally with the **no ip dhcp snooping** command.

Access-control list (ACL) statistics are not supported if the DHCP snooping feature is enabled.

**Examples** This example shows how to enable DHCP snooping:

```
switch(config)# feature dhcp
switch(config)#
```

This example shows how to disable DHCP snooping:

feature dhcp

```
switch(config)# no feature dhcp
switch(config)#

```

#### Related Commands

Command	Description
<b>copy running-config startup-config</b>	Copies the running configuration to the startup configuration.
<b>ip dhcp snooping</b>	Globally enables DHCP snooping on the device.
<b>show running-config dhcp</b>	Displays DHCP snooping configuration, including IP Source Guard configuration.

# feature http-server

To enable HTTP or Hypertext Transfer Protocol Secure (HTTPS) on the switch, use the **feature http-server** command. To disable the HTTP or HTTPS server, use the **no** form of this command.

```
feature http-server
no feature http-server
```

**Syntax Description** This command has no arguments or keywords.

**Command Default** Disabled

**Command Modes** Global configuration mode

Command History	Release	Modification
	6.0(2)N1(1)	This command was introduced.

**Examples** This example shows how to enable the HTTP server on the switch and verify the status of the HTTP server:

```
switch(config)# feature http-server
switch(config)# exit
switch# show feature
Feature Name          Instance  State
-----
assoc_mgr             1         enabled
cimserver             1         disabled
dhcp-snooping          1         disabled
fabric-binding          1         disabled
fc-port-security        1         disabled
fcoe                  1         enabled
fcsp                  1         disabled
fex                   1         enabled
fport-channel-trunk     1         disabled
http-server            1         enabled
interface-vlan          1         enabled
lacp                  1         enabled
ldap                  1         disabled
lldp                  1         enabled
niv                   1         disabled
npiv                  1         disabled
npv                   1         disabled
otv                   1         disabled
port_track             1         disabled
private-vlan            1         enabled
privilege              1         enabled
sshServer              1         enabled
tacacs                 1         enabled
telnetServer            1         enabled
```

```
■ feature http-server
```

```
udld          1      enabled
vpc          1      enabled
vtp          1      enabled
switch# show http-server
http-server enabled
switch#
```

**Related Commands**

Command	Description
<b>copy running-config startup-config</b>	Copies the running configuration to the startup configuration.
<b>show feature</b>	Displays the features enabled or disabled on the switch.
<b>show http-server</b>	Displays the HTTP or HTTPS server configuration.

# feature port-security

To enable port security on Layer 2 interfaces, use the **feature port-security** command. To disable port security, use the **no** form of this command.

**feature port-security**

**no feature port-security**

---

<b>Syntax Description</b>	This command has no arguments or keywords.
---------------------------	--

---

<b>Command Default</b>	Disabled
------------------------	----------

---

<b>Command Modes</b>	Global configuration mode
----------------------	---------------------------

---

<b>Command History</b>	<b>Release</b>	<b>Modification</b>
	6.0(2)N1(1)	This command was introduced.

---

---

<b>Usage Guidelines</b>	Use the port security feature to secure a port by limiting and identifying the MAC addresses of the switches that are allowed to access the port.
-------------------------	---

You can enable port security on a virtual port channel (vPC) port only if the following occurs:

- Port security is enabled on both the vPC peers
- Port security is enabled on the vPC port on both the vPC peers.

This command does not require a license.

---

<b>Examples</b>	This example shows how to enable port security on the switch:
-----------------	---

```
switch# configure terminal
switch(config)# feature port-security
switch(config)#
```

This example shows how to disable port security on the switch:

```
switch# configure terminal
switch(config)# no feature port-security
switch(config)#
```

---

<b>Related Commands</b>	<b>Command</b>	<b>Description</b>
	<b>show feature</b>	Displays the features that are enabled or disabled on the switch.

---

**feature port-security**

Command	Description
<b>show port-security</b>	Displays the port security configuration information.
<b>switchport port-security</b>	Configures the switchport parameters to establish port security.

# feature privilege

To enable the cumulative privilege of roles for command authorization on RADIUS and TACACS+ servers, use the **feature privilege** command. To disable the cumulative privilege of roles, use the **no** form of this command.

**feature privilege**

**no feature privilege**

**Syntax Description** This command has no arguments or keywords.

**Command Default** Disabled

**Command Modes** Global configuration mode

Command History	Release	Modification
	6.0(2)N1(1)	This command was introduced.

**Usage Guidelines** When the **feature privilege** command is enabled, privilege roles inherit the permissions of lower level privilege roles.

**Examples** This example shows how to enable the cumulative privilege of roles:

```
switch(config)# feature privilege
switch(config)#
```

This example shows how to disable the cumulative privilege of roles:

```
switch(config)# no feature privilege
switch(config)#
```

Related Commands	Command	Description
	<b>enable</b>	Enables a user to move to a higher privilege level.
	<b>enable secret priv-lvl</b>	Enables a secret password for a specific privilege level.
	<b>show feature</b>	Displays the features enabled or disabled on the switch.
	<b>show privilege</b>	Displays the current privilege level, username, and status of cumulative privilege support.
	<b>username</b>	Enables a user to use privilege levels for authorization.

**feature tacacs+**

# feature tacacs+

To enable TACACS+, use the **feature tacacs+** command. To disable TACACS+, use the **no** form of this command.

**feature tacacs+**

**no feature tacacs+**

**Syntax Description** This command has no arguments or keywords.

**Command Default** Disabled

**Command Modes** Global configuration mode

Command History	Release	Modification
	6.0(2)N1(1)	This command was introduced.

**Usage Guidelines** You must use the **feature tacacs+** command before you configure TACACS+.

**Note** When you disable TACACS+, the Cisco NX-OS software removes the TACACS+ configuration.

**Examples** This example shows how to enable TACACS+:

```
switch(config)# feature tacacs+
```

This example shows how to disable TACACS+:

```
switch(config)# no feature tacacs+
```

Related Commands	Command	Description
	<b>show feature</b>	Displays whether or not TACACS+ is enabled on the switch.
	<b>show tacacs+</b>	Displays TACACS+ information.
