

# Unsupported CLI Commands in Cisco IOS Release 12.1(19)EA1

---

This appendix lists some of the command-line interface (CLI) commands that appear when you enter the question mark (?) at the Catalyst 3550 switch prompt but are not supported in this release, either because they are not tested, or because of Catalyst 3550 hardware limitations. This is not a complete list. The unsupported commands are listed by software feature and command mode.

## Access Control Lists

### Unsupported Privileged EXEC Commands

```
access-enable [host] [timeout minutes]  
access-template [access-list-number | name] [dynamic-name] [source] [destination] [timeout minutes]  
clear access-template [access-list-number | name] [dynamic-name] [source] [destination].
```

## ARP Commands

### Unsupported Global Configuration Commands

```
arp ip-address hardware-address smds  
arp ip-address hardware-address srp-a  
arp ip-address hardware-address srp-b
```

### Unsupported Interface Configuration Commands

```
arp probe  
ip probe proxy
```

# FallBack Bridging

## Unsupported Privileged EXEC Commands

```

clear bridge [bridge-group] multicast [router-ports | groups | counts] [group-address] [interface-unit]
[counts]
clear vlan statistics
show bridge [bridge-group] circuit-group [circuit-group] [src-mac-address] [dst-mac-address]
show bridge [bridge-group] multicast [router-ports | groups] [group-address]
show bridge vlan
show interfaces crb
show interfaces {ethernet | fastethernet} [interface | slot/port] irb
show subscriber-policy range

```

## Unsupported Global Configuration Commands

```

bridge bridge-group bitswap_l3_addresses
bridge bridge-group bridge ip
bridge bridge-group circuit-group circuit-group pause milliseconds
bridge bridge-group circuit-group circuit-group source-based
bridge cmf
bridge crb
bridge bridge-group domain domain-name
bridge irb
bridge bridge-group mac-address-table limit number
bridge bridge-group multicast-source
bridge bridge-group route protocol
bridge bridge-group subscriber policy policy
subscriber-policy policy [[no | default] packet [permit | deny]]

```

## Unsupported Interface Configuration Commands

```

bridge-group bridge-group cbus-bridging
bridge-group bridge-group circuit-group circuit-number
bridge-group bridge-group input-address-list access-list-number
bridge-group bridge-group input-lat-service-deny group-list
bridge-group bridge-group input-lat-service-permit group-list
bridge-group bridge-group input-lsap-list access-list-number

```

```

bridge-group bridge-group input-pattern-list access-list-number
bridge-group bridge-group input-type-list access-list-number
bridge-group bridge-group lat-compression
bridge-group bridge-group output-address-list access-list-number
bridge-group bridge-group output-lat-service-deny group-list
bridge-group bridge-group output-lat-service-permit group-list
bridge-group bridge-group output-lsap-list access-list-number
bridge-group bridge-group output-pattern-list access-list-number
bridge-group bridge-group output-type-list access-list-number
bridge-group bridge-group sse
bridge-group bridge-group subscriber-loop-control
bridge-group bridge-group subscriber-trunk
bridge bridge-group lat-service-filtering
frame-relay map bridge dcli broadcast
interface bvi bridge-group
x25 map bridge x.121-address broadcast [options-keywords]

```

## HSRP

### Unsupported Global Configuration Commands

```

interface Async
interface BVI
interface Dialer
interface Group-Async
interface Lex
interface Multilink
interface Virtual-Template
interface Virtual-Tokenring

```

### Unsupported Interface Configuration Commands

```

mtu
standby mac-refresh seconds
standby use-bia

```

# Interface Configuration Commands

**interface tunnel**  
**switchport broadcast level**  
**switchport multicast level**  
**switchport unicast level**

**Note** These commands were replaced in Cisco IOS release 12.1(8)EA1 by the **storm-control {broadcast | multicast | unicast} level level [.level]** interface configuration command.

# IP Multicast Routing

## Unsupported Privileged EXEC Commands

**clear ip rtp header-compression [type number]**

The **debug ip packet** command displays packets received by the switch CPU. It does not display packets that are hardware-switched.

The **debug ip mcache** command affects packets received by the switch CPU. It does not display packets that are hardware-switched.

The **debug ip mpacket [detail] [access-list-number [group-name-or-address]** command affects only packets received by the switch CPU. Because most multicast packets are hardware-switched, use this command only when you know that the route will forward the packet to the CPU.

**debug ip pim atm**

**show frame-relay ip rtp header-compression [interface type number]**

The **show ip mcache** command displays entries in the cache for those packets that are sent to the switch CPU. Because most multicast packets are switched in hardware without CPU involvement, you can use this command, but multicast packet information is not displayed.

The **show ip mpacket** commands are supported but are only useful for packets received at the switch CPU. If the route is hardware-switched, the command has no effect because the CPU does not receive the packet and cannot display it.

**show ip pim vc [group-address | name] [type number]**

**show ip rtp header-compression [type number] [detail]**

## Unsupported Global Configuration Commands

**ip pim accept-rp {address | auto-rp} [group-access-list-number]**

**ip pim message-interval seconds**

## Unsupported Interface Configuration Commands

```
frame-relay ip rtp header-compression [active | passive]
frame-relay map ip ip-address dclci [broadcast] compress
frame-relay map ip ip-address dclci rtp header-compression [active | passive]
ip igmp helper-address ip-address
ip multicast helper-map {group-address | broadcast} {broadcast-address | multicast-address}
extended-access-list-number
ip multicast rate-limit {in | out} [video | whiteboard] [group-list access-list] [source-list access-list] kbps
ip multicast use-functional
ip pim minimum-vc-rate pps
ip pim multipoint-signalling
ip pim nbma-mode
ip pim vc-count number
ip rtp compression-connections number
ip rtp header-compression [passive]
```

## IP Unicast Routing

### Unsupported Privileged EXEC or User EXEC Commands

```
clear ip accounting [checkpoint]
clear ip bgp address flap-statistics
clear ip bgp prefix-list
show cef [drop | not-cef-switched]
show ip accounting [checkpoint] [output-packets | access-violations]
show ip bgp dampened-paths
show ip bgp flap-statistics
show ip bgp inconsistent-as
show ip bgp regexp regular expression
```

## Unsupported Global Configuration Commands

**ip accounting-list** *ip-address wildcard*  
**ip accounting-transits** *count*  
**ip cef accounting** [**per-prefix**] [**non-recursive**]  
**ip cef traffic-statistics** [**load-interval seconds**] [**update-rate seconds**]]  
**ip flow-aggregation**  
**ip flow-cache**  
**ip flow-export**  
**ip gratuituous-arp**  
**ip local**  
**ip reflexive-list**  
**router egp**  
**router-isis**  
**router iso-igrp**  
**router mobile**  
**router odr**  
**router static**

## Unsupported Interface Configuration Commands

**ip accounting**  
**ip load-sharing** [**per-packet**]  
**ip mtu** *bytes*  
**ip route-cache**  
**ip verify**  
**ip unnumbered** *type number*  
All **ip security** commands

## Unsupported BGP Router Configuration Commands

**address-family vpng4**  
**default-information originate**  
**neighbor advertise-map**  
**neighbor allowas-in**  
**neighbor default-originate**

**neighbor description**  
**network backdoor**  
**table-map**

## Unsupported VPN Configuration Commands

All

**Note** The switch does support multi-VPN routing/forwarding (multi-VRF) commands shown in the command reference for this release.

## Unsupported Route Map Commands

**match length**  
**route-map *map-tag* deny**  
**set automatic-tag**  
**set dampening *half-life reuse suppress max-suppress-time***  
**set default interface**  
**set interface**  
**set ip default next-hop**  
**set ip destination *ip-address mask***  
**set ip df**  
**set ip precedence *value***  
**set ip qos-group**  
**set tag *tag-value***  
**set ip tos**

## MSDP

## Unsupported Privileged EXEC Commands

**show access-expression**  
**show exception**  
**show location**  
**show pm LINE**  
**show smf [*interface-id*]**  
**show subscriber-policy [*policy-number*]**  
**show template [*template-name*]**

**■ Network Address Translation (NAT) commands**

## Unsupported Global Configuration Commands

**ip msdp default-peer *ip-address | name* [prefix-list *list*]** (Because BGP/MBGP is not supported, use the **ip msdp peer** command instead of this command.)

## Network Address Translation (NAT) commands

### Unsupported User EXEC Commands

- clear ip nat translation**
- show ip nat statistics**
- show ip nat translations**

### Unsupported Global Configuration Commands

- ip nat inside destination**
- ip nat inside source**
- ip nat outside source**
- ip nat pool**

## Unsupported Interface Configuration Commands

- ip nat**

## RADIUS

### Unsupported Global Configuration Commands

- aaa nas port extended**
- radius-server attribute nas-port**
- radius-server configure**
- radius-server extended-portnames**

## SNMP

### Unsupported Global Configuration Commands

snmp-server enable informs  
snmp-server enable traps flash insertion  
snmp-server enable traps flash removal  
snmp-server ifindex persist

## Spanning Tree

### Unsupported Global Configuration Commands

spanning-tree etherchannel guard misconfig

## VLAN

### Unsupported User EXEC Commands

ifindex  
private-vlan

■ VLAN
