

Unsupported CLI Commands in Release 12.1(9)EA1

This appendix lists some of the command-line interface (CLI) commands that are displayed when you enter the question mark (?) at the Catalyst 3550 switch prompt but are not supported in this release. The unsupported commands are listed by software feature and command mode.

Access Control Lists

Unsupported Privileged EXEC Commands

```
access-enable [host] [timeout minutes]
access-template [access-list-number | name] [dynamic-name] [source] [destination] [timeout minutes]
clear access-template [access-list-number | name] [dynamic-name] [source] [destination].
```

ARP Commands

Unsupported Global Configuration Commands

```
arp ip-address hardware-address smds
arp ip-address hardware-address srp-a
arp ip-address hardware-address srp-b
```

Unsupported Interface Configuration Commands

```
arp probe
ip probe proxy
```

FallBack Bridging

Unsupported Privileged EXEC Commands

```

clear bridge [bridge-group] multicast [router-ports | groups | counts] [group-address] [interface-unit]
[counts]
clear vlan statistics
show bridge [bridge-group] circuit-group [circuit-group] [src-mac-address] [dst-mac-address]
show bridge [bridge-group] multicast [router-ports | groups] [group-address]
show bridge vlan
show interfaces crb
show interfaces {ethernet | fastethernet} [interface | slot/port] irb
show subscriber-policy range

```

Unsupported Global Configuration Commands

```

bridge bridge-group bitswap_l3_addresses
bridge bridge-group bridge ip
bridge bridge-group circuit-group circuit-group pause milliseconds
bridge bridge-group circuit-group circuit-group source-based
bridge cmf
bridge crb
bridge bridge-group domain domain-name
bridge irb
bridge bridge-group mac-address-table limit number
bridge bridge-group multicast-source
bridge bridge-group route protocol
bridge bridge-group subscriber policy policy
subscriber-policy policy [[no | default] packet [permit | deny]]

```

Unsupported Interface Configuration Commands

```

bridge-group bridge-group cbus-bridging
bridge-group bridge-group circuit-group circuit-number
bridge-group bridge-group input-address-list access-list-number
bridge-group bridge-group input-lat-service-deny group-list
bridge-group bridge-group input-lat-service-permit group-list
bridge-group bridge-group input-lsap-list access-list-number

```

```
bridge-group bridge-group input-pattern-list access-list-number
bridge-group bridge-group input-type-list access-list-number
bridge-group bridge-group lat-compression
bridge-group bridge-group output-address-list access-list-number
bridge-group bridge-group output-lat-service-deny group-list
bridge-group bridge-group output-lat-service-permit group-list
bridge-group bridge-group output-lsap-list access-list-number
bridge-group bridge-group output-pattern-list access-list-number
bridge-group bridge-group output-type-list access-list-number
bridge-group bridge-group sse
bridge-group bridge-group subscriber-loop-control
bridge-group bridge-group subscriber-trunk
bridge bridge-group lat-service-filtering
frame-relay map bridge dlci broadcast
interface bvi bridge-group
x25 map bridge x.121-address broadcast [options-keywords]
```

HSRP

Unsupported Global Configuration Commands

```
interface Async
interface BVI
interface Dialer
interface Group-Async
interface Lex
interface Multilink
interface Virtual-Template
interface Virtual-Tokenring
```

Unsupported Interface Configuration Commands

```
mtu
standby mac-refresh seconds
standby use-bia
```

Interface Configuration Commands

switchport broadcast level
switchport multicast level
switchport unicast level

Note These commands were replaced in IOS release 12.1(8)EA1 by the **storm-control {broadcast | multicast | unicast} level level [.level]** interface configuration command.

IP Multicast Routing

Unsupported Privileged EXEC Commands

clear ip rtp header-compression [type number]

The **debug ip packet** command displays packets received by the switch CPU. It does not display packets that are hardware-switched.

The **debug ip mcache** command affects packets received by the switch CPU. It does not display packets that are hardware-switched.

The **debug ip mpacket [detail] [access-list-number [group-name-or-address]** command affects only packets received by the switch CPU. Because most multicast packets are hardware-switched, use this command only when you know that the route will forward the packet to the CPU.

debug ip pim atm

show frame-relay ip rtp header-compression [interface type number]

The **show ip mcache** command displays entries in the cache for those packets that are sent to the switch CPU. Because most multicast packets are switched in hardware without CPU involvement, you can use this command, but multicast packet information is not displayed.

The **show ip mpacket** commands are supported but are only useful for packets received at the switch CPU. If the route is hardware-switched, the command has no effect because the CPU does not receive the packet and cannot display it.

show ip pim vc [group-address | name] [type number]

show ip rtp header-compression [type number] [detail]

Unsupported Global Configuration Commands

ip pim accept-rp {address | auto-rp} [group-access-list-number]

ip pim message-interval seconds

Unsupported Interface Configuration Commands

```

frame-relay ip rtp header-compression [active | passive]
frame-relay map ip ip-address dclci [broadcast] compress
frame-relay map ip ip-address dclci rtp header-compression [active | passive]
ip igmp helper-address ip-address
ip multicast helper-map {group-address | broadcast} {broadcast-address | multicast-address}
extended-access-list-number
ip multicast rate-limit {in | out} [video | whiteboard] [group-list access-list] [source-list access-list] kbps
ip multicast use-functional
ip pim minimum-vc-rate pps
ip pim multipoint-signalling
ip pim nbma-mode
ip pim vc-count number
ip rtp compression-connections number
ip rtp header-compression [passive]

```

IP Unicast Routing

Unsupported Privileged EXEC or User EXEC Commands

```

clear ip accounting [checkpoint]
show cef [drop | not-cef-switched]
show ip vrf [{brief | detail | interfaces}] [vrf-name] [output-modifiers]
show ip accounting [checkpoint] [output-packets | access-violations]

```

Unsupported Global Configuration Commands

```

ip accounting-list ip-address wildcard
ip accounting-transits count
ip cef accounting [per-prefix] [non-recursive]
ip cef traffic-statistics [load-interval seconds] [update-rate seconds]]
ip flow-aggregation
ip flow-cache
ip flow-export
ip gratuituous-arps
ip local

```

```
ip reflexive-list
ip vrf
router bgp
router egp
router isis
router iso-igrp
router mobile
router odr
router static
```

Unsupported Interface Configuration Commands

```
ip accounting
ip load-sharing [per-packet]
ip mtu bytes
ip route-cache
ip verify
ip vrf
ip unnumbered type number
All ip security commands
```

Unsupported VPN Configuration Commands

All

Unsupported VRF Configuration Commands

All

Unsupported Route Map Commands

```
set automatic-tag
set ip destination ip-address mask
set ip next-hop ip-address [...ip-address]
set ip next-hop peer-address
set ip precedence value
set ip qos-group
set tag tag-value
```

MSDP

Unsupported Privileged EXEC Commands

```
show access-expression  
show exception  
show location  
show pm LINE  
show smf [interface-id]  
show subscriber-policy [policy-number]  
show template [template-name]
```

Unsupported Global Configuration Commands

ip msdp default-peer *ip-address* | *name* [*prefix-list list*] (Because BGP/MBGP is not supported, use the **ip msdp peer** command instead of this command.)

RADIUS

Unsupported Global Configuration Commands

```
aaa nas port extended  
radius-server attribute nas-port  
radius-server configure  
radius-server extended-portnames
```

Spanning Tree

Unsupported Global Configuration Commands

```
spanning-tree etherchannel guard misconfig
```

■ Spanning Tree
