

Unsupported Commands in Cisco IOS Release 12.1(14)AX

This appendix lists some of the command-line interface (CLI) commands that are displayed when you enter the question mark (?) at the Catalyst 3750 Metro switch prompt but are not supported in this release, either because they are not tested, or because of Catalyst 3750 Metro switch hardware limitations. This is not a complete list. The unsupported commands are listed by software feature and command mode.

Access Control Lists

Unsupported Privileged EXEC Commands

```
access-enable [host] [timeout minutes]
access-template [access-list-number | name] [dynamic-name] [source] [destination] [timeout minutes]
clear access-template [access-list-number | name] [dynamic-name] [source] [destination].
```

Unsupported Global Configuration Commands

```
access-list rate-limit acl-index {precedence | mask prec-mask}
access-list dynamic extended
```

ARP

Unsupported Global Configuration Commands

```
arp ip-address hardware-address smds
arp ip-address hardware-address srp-a
arp ip-address hardware-address srp-b
```

Unsupported Interface Configuration Commands

arp probe
ip probe proxy

Debug

Unsupported Privileged EXEC Commands

debug platform cli-redirection main
debug platform configuration
debug platform ipc
debug platform led stack

FallBack Bridging

Unsupported Privileged EXEC Commands

clear bridge [bridge-group] multicast [router-ports | groups | counts] [group-address] [interface-unit] [counts]
clear vlan statistics
show bridge [bridge-group] circuit-group [circuit-group] [src-mac-address] [dst-mac-address]
show bridge [bridge-group] multicast [router-ports | groups] [group-address]
show bridge vlan
show interfaces crb
show interfaces {ethernet | fastethernet} [interface | slot/port] irb
show subscriber-policy range

Unsupported Global Configuration Commands

bridge bridge-group acquire
bridge bridge-group address mac-address {forward | discard} [interface-id]
bridge bridge-group aging-time seconds
bridge bridge-group bitswap_l3_addresses
bridge bridge-group bridge ip
bridge bridge-group circuit-group circuit-group pause milliseconds
bridge bridge-group circuit-group circuit-group source-based

```

bridge cmf
bridge crb
bridge bridge-group domain domain-name
bridge irb
bridge bridge-group mac-address-table limit number
bridge bridge-group multicast-source
bridge bridge-group protocol dec
bridge bridge-group route protocol
bridge bridge-group subscriber policy policy
subscriber-policy policy [[no | default] packet [permit | deny]]

```

Unsupported Interface Configuration Commands

```

bridge-group bridge-group cbus-bridging
bridge-group bridge-group circuit-group circuit-number
bridge-group bridge-group input-address-list access-list-number
bridge-group bridge-group input-lat-service-deny group-list
bridge-group bridge-group input-lat-service-permit group-list
bridge-group bridge-group input-lsap-list access-list-number
bridge-group bridge-group input-pattern-list access-list-number
bridge-group bridge-group input-type-list access-list-number
bridge-group bridge-group lat-compression
bridge-group bridge-group output-address-list access-list-number
bridge-group bridge-group output-lat-service-deny group-list
bridge-group bridge-group output-lat-service-permit group-list
bridge-group bridge-group output-lsap-list access-list-number
bridge-group bridge-group output-pattern-list access-list-number
bridge-group bridge-group output-type-list access-list-number
bridge-group bridge-group sse
bridge-group bridge-group subscriber-loop-control
bridge-group bridge-group subscriber-trunk
bridge bridge-group lat-service-filtering
frame-relay map bridge dlci broadcast
interface bvi bridge-group
x25 map bridge x.121-address broadcast [options-keywords]

```

HSRP

Unsupported Global Configuration Commands

```
interface Async
interface BVI
interface Dialer
interface Group-Async
interface Lex
interface Multilink
interface Virtual-Template
interface Virtual-Tokenring
```

Unsupported Interface Configuration Commands

```
mtu
standby mac-refresh seconds
standby use-bia
```

IGMP Snooping

Unsupported Global Configuration Commands

```
ip igmp snooping report-suppression
ip igmp snooping source-only-learning
ip igmp snooping tcn
```

Interfaces

Unsupported Privileged EXEC Commands

```
show interfaces [interface-id | vlan vlan-id] [crb | fair-queue | irb | mac-accounting | precedence | irb
| random-detect | rate-limit | shape]
```

Unsupported Global Configuration Commands

```
interface tunnel
```

Unsupported Interface Configuration Commands

```
bandwidth {bandwidth-kbps | percent percent}
random-detect [dscp-based | precedence-based]
random-detect dscp dscp min-threshold max-threshold mark-prob-denominator
random-detect exponential-weighting-constant weight
random-detect precedence ip-precedence min-threshold max-threshold mark-prob-denominator
switchport broadcast level
switchport multicast level
switchport unicast level
```

Note

The **switchport broadcast**, **switchport multicast**, and **switchport unicast** commands have been replaced by the **storm-control {broadcast | multicast | unicast} level *level* [.*level*]** interface configuration command.

IP Multicast Routing

Unsupported Privileged EXEC Commands

clear ip rtp header-compression [*type number*]

The **debug ip packet** command displays packets received by the switch CPU. It does not display packets that are hardware-switched.

The **debug ip mcache** command affects packets received by the switch CPU. It does not display packets that are hardware-switched.

The **debug ip mpacket [detail] [access-list-number [group-name-or-address]** command affects only packets received by the switch CPU. Because most multicast packets are hardware-switched, use this command only when you know that the route will forward the packet to the CPU.

debug ip pim atm

show frame-relay ip rtp header-compression [*interface type number*]

The **show ip mcache** command displays entries in the cache for those packets that are sent to the switch CPU. Because most multicast packets are switched in hardware without CPU involvement, you can use this command, but multicast packet information is not displayed.

The **show ip mpacket** commands are supported but are only useful for packets received at the switch CPU. If the route is hardware-switched, the command has no effect because the CPU does not receive the packet and cannot display it.

show ip pim vc [*group-address | name*] [*type number*]

show ip rtp header-compression [*type number*] [**detail**]

Unsupported Global Configuration Commands

```
ip pim accept-rp {address | auto-rp} [group-access-list-number]
ip pim message-interval seconds
```

Unsupported Interface Configuration Commands

```
frame-relay ip rtp header-compression [active | passive]
frame-relay map ip ip-address dlci [broadcast] compress
frame-relay map ip ip-address dlci rtp header-compression [active | passive]
ip igmp helper-address ip-address
ip multicast helper-map {group-address | broadcast} {broadcast-address | multicast-address}
extended-access-list-number
ip multicast rate-limit {in | out} [video | whiteboard] [group-list access-list] [source-list access-list]
kbps
ip multicast ttl-threshold ttl-value (instead, use the ip multicast boundary access-list-number
interface configuration command)
ip multicast use-functional
ip pim minimum-vc-rate pps
ip pim multipoint-signalling
ip pim nbma-mode
ip pim vc-count number
ip rtp compression-connections number
ip rtp header-compression [passive]
```

IP Unicast Routing

Unsupported Privileged EXEC or User EXEC Commands

```
clear ip accounting [checkpoint]
clear ip bgp address flap-statistics
clear ip bgp prefix-list
show cef [drop | not-cef-switched]
show ip accounting [checkpoint] [output-packets | access-violations]
show ip bgp dampened-paths
show ip bgp inconsistent-as
show ip bgp regexp regular expression
show ip prefix-list regular expression
```

Unsupported Global Configuration Commands

ip accounting-list *ip-address wildcard*
ip as-path access-list
ip accounting-transits *count*
ip cef accounting [per-prefix] [non-recursive]
ip cef traffic-statistics [load-interval *seconds*] [**update-rate** *seconds*]]
ip flow-aggregation
ip flow-cache
ip flow-export
ip gratuitous-arps
ip local
ip prefix-list
ip reflexive-list
router egp
router isis
router iso-igrp
router mobile
router odr
router static

Unsupported Interface Configuration Commands

ip accounting
ip load-sharing [per-packet]
ip mtu *bytes*
ip route-cache
ip verify
ip unnumbered *type number*
All ip security commands

Unsupported BGP Router Configuration Commands

```
default-information originate
neighbor advertise-map
neighbor allowas-in
neighbor default-originate
neighbor description
network backdoor
table-map
```

Unsupported Route Map Commands

```
match route-type
set as-path {tag | prepend as-path-string}
set automatic-tag
set dampening half-life reuse suppress max-suppress-time
set default interface interface-id [interface-id....]
set interface interface-id [interface-id....]
set ip default next-hop ip-address [ip-address....]
set ip destination ip-address mask
set ip precedence value
set ip qos-group
set metric-type internal
set origin
set metric-type internal
set tag tag-value
```

Layer 2 Protocol Tunneling

Unsupported Interface Configuration Commands

```
l2protocol-tunnel [point-to-point [pagp | lacp | udld]]
```

Miscellaneous

Unsupported Global Configuration Commands

```
errdisable detect cause dhcp-rate-limit  
errdisable recovery cause dhcp-rate-limit  
errdisable recovery cause unicast flood
```

MPLS

All MPLS **traffic-eng** commands

MSDP

Unsupported Privileged EXEC Commands

```
show access-expression  
show exception  
show location  
show pm LINE  
show smf [interface-id]  
show subscriber-policy [policy-number]  
show template [template-name]
```

Unsupported Global Configuration Commands

ip msdp default-peer *ip-address | name* [**prefix-list** *list*] (Because BGP/MBGP is not supported, use the **ip msdp peer** command instead of this command.)

RADIUS

Unsupported Global Configuration Commands

```
aaa nas port extended  
radius-server attribute nas-port  
radius-server configure  
radius-server extended-portnames
```

SNMP

Unsupported Global Configuration Commands

`snmp-server enable informs`
`snmp-server enable traps flash insertion`
`snmp-server enable traps flash removal`

Spanning Tree

Unsupported Global Configuration Commands

`spanning-tree etherchannel guard misconfig`
`spanning-tree pathcost method {long | short}`

Unsupported Interface Configuration Commands

`spanning-tree stack-port`

Virtual Forwarding Infrastructure (VFI)

Unsupported Global Configuration Commands

`l2 vfi vfi-name manual`
All VFI configuration mode commands

Unsupported Privileged EXEC Commands

`debug vfi`
`show vfi`

VLAN

Unsupported `vlan-config` Commands

`private-vlan`

Unsupported Privileged EXEC Commands

`show running-config vlan`

Unsupported User EXEC Commands

`show vlan ifindex`

VTP

Unsupported Privileged EXEC Commands

`vtp {password password | pruning | version number} private-vlan`

Note

This command has been replaced by the `vtp` global configuration command.

■ VTP
