CTRS Unset Commands

October 2011

This chapter contains Cisco TelePresence Recording Server (CTRS) **unset** commands:

unset network dns options

unset network dns options [timeout] [attempts] [rotate]

Syntax Description

timeout	Defaults the wait time before considering a Domain Name System (DNS) query to have failed.
attempts	Defaults the number of attempts to make before failing.
rotate	Defaults the method for selecting a name server; this affects how loads are distributed across name servers.

Command Modes   Admin

Command History

Release	Modifications
1.6	This command was first documented.

Usage Guidelines   Use this command to unset the Domain Name System (DNS) options. This command causes a temporary loss of network connections.

Examples

```
admin:unset network dns options timeout
         ***   W A R N I N G   ***
This will cause the system to temporarily lose network connectivity

         Do you want to continue ?

Enter "yes" to continue or any other key to abort
yes
executing...
```

unset network domain

Syntax Description   None

Command Modes   Admin

Command History

Release	Modifications
1.8	This command was first documented.

Usage Guidelines   This command unsets the domain name.

The system asks whether you want to continue to execute this command.

⚠

Caution   If you continue, the system will restart.

Examples   admin:**unset network domain**

Continue (y/n)?y

unset network domain
