

CHAPTER 6

Unset Commands

Revised: April 15, 2009, OL-19545-01

This chapter contains the following **unset** commands:

- [unset network](#)

unset network

unset network dns options [timeout] [attempts] [rotate]

Syntax Description

timeout	Sets the wait time before the system considers a DNS query as failed to the default.
attempts	Sets the number of DNS attempts to make before failing to the default.
rotate	Sets the method for selecting a name server to the default. This affects how loads are distributed across name servers.

Command Modes

Admin

Command privilege level: 1

Command History

Release	Modifications
1.2	This command was first documented.

Usage Guidelines

This command unsets DNS options.

The system asks whether you want to continue to execute this command.

Caution

If you continue, the system will temporarily lose network connectivity.

Examples

admin: **unset network dns options**
