The appropriate release note can be found here: Release Notes for Cisco UCS Manager</p>
Interoperability Information	<p>The interoperability matrix provides interoperability information for Cisco UCS components and configurations that have been tested and validated by Cisco, by Cisco partners, or both. Use it as a reference for supported hardware and software.</p> <p>The complete list of interoperability matrices can be found here: http://www.cisco.com/en/US/products/ps10477/prod_technical_reference_list.html</p> <p>The interactive <i>UCS Hardware and Software Interoperability Utility</i> lets you view the supported components and configurations for a selected server model and software release. The utility is available at the following URL: http://www.cisco.com/web/techdoc/ucs/interoperability/matrix/matrix.html</p> <p>Note The interoperability information for a particular release is dependent on third-party certification testing done after the release has been made public. Therefore, the interoperability information may not be available until several months after the release becomes publically available.</p>
