Cisco D9858 Advanced Receiver Transcoder Software Version 3.91 Release Note

Overview

Purpose

This document describes the changes included in the Cisco® D9858 Advanced Program Receiver with software version 3.91, since the previous version 3.50.

New Features

The following new features are included in software version 3.91:

- **PowerVu® Simulcrypt Support** – allows the D9858 transcoder to decrypt services that utilizes both PowerVu and 3rd party conditional access.

- **SSH Support** – access to the console can now be achieved using a secured SSH connection.

- **IP Port Control** – to support additional security, the D9858 now supports enabling or disabling of individual IP services through the web GUI.

Resolved Issues

The following enhancements and fault resolutions are included in version 3.91:

Tracking Number	Description
2434	Resolved an issue where the DVB® subtitle language POR was not properly saved to the unit after a powercycle.
2852	Resolved an issue where the unit reported no lock even when the RF was not the active input.
2893	Resolved an issue where the AFD conversion was lost during a video parameter update from the encoder.
2903	Resolved an issue where AFD code 1111 would produce the wrong aspect ratio conversion during a down-conversion.
3020	Resolved an issue where the AFD conversion was lost during a video parameter update from the encoder.
3065	The Imitext subtitle position was high compared to the Imitext subtitle position in the D9850 Program Receiver. The position has now been set to match the D9850 receiver.
3095	Resolved an issue where, in rare cases, with specific transports, the VBI did correctly output after a number of channel changes.
3105	Resolved an issue where the CDT PID was included when the DPM resync operation occurred, even though it was set to drop.
CSCzr07316	Resolved an issue where DVB subtitles from a Softni system was presented in black when yellow was expected.

For Information

Cisco provides its customers who have purchased support agreements with telephone support from anywhere in the world. If you require technical telephone assistance or product training support, or if you have any questions concerning the Cisco product, you may contact the appropriate Customer Support Center from those listed below. Charges may apply for customers without a current and applicable product support agreement.

Customers	Location	Phone Number
Programmers and Broadcasters	USA and Canada	Toll-Free: 1.888.949.4786 +1.770.236.4786 dmn_support@cisco.com
Telcos and Cable Service Providers	Cisco Services	Toll-Free: 1.800.722.2009 Local: 770.236.6900 (press 2 at the prompt) customer-service@cisco.com
All Customers	Europe	+32.56.445.155 or +32.56.445.197 saemea-support@cisco.com
All Customers	Asia	+852.2588.4746 saapac-support@cisco.com

Customers who call a Customer Support Center are asked specific questions in order to identify their needs. In this way, each call can be directed to the customer support representative most experienced with their Cisco product.
