

# Release Note – Cisco D9850 PowerVu Program Receiver Software Release Version 2.61

## Overview

### Introduction

This document describes the changes included in software release version 2.61 for the Cisco® D9850 PowerVu Program Receiver since the previous release version, 2.60.

## New Features

The following new features are included in this software release version, 2.61.

- **Live Event Control with DPR** – D9850 Program Receivers that support Digital Program Replacement (DPR) will now use DPR during LEC tuning. This allows the ASI output to maintain the source program's PMT and remap the PIDs of the newly tuned program to those of the source program.

## For Information

Cisco provides customers with telephone support from anywhere in the world. If you require technical telephone assistance or product training support, or if you have any questions concerning your Cisco product, you may contact the appropriate Customer Support Center from those listed below. Charges may apply for customers without a current and applicable product support agreement.
