[Obtaining Documentation and Submitting a Service Request, page 2](#)

# 1 Introduction

This document describes the Return To Factory (RTF) process for Return Material Authorization (RMA) requests for the Cisco D9859 Advanced Receiver Transcoder. The Return For Repair (RFR) process is not offered for the D9859 units.

## Audience

This document is intended for all service providers, customers, and channel partners/distributors who are required to replace the D9859 units using the RMA process.

# 2 D9859 RTF/AHR Return Procedure

The following describes the overall RMA process, including RTF and Advance Hardware Replacement (AHR), for the D9859 units:

- 
- Step 1** Open a case with Cisco Video Integrated Product Support (VIPS) at 1-855-605-8390.
- Step 2** If an RMA is required, VIPS determines whether it is an RTF or AHR.
- Step 3** If it is an RTF, you must return the failed unit to the Cisco Service Depot. Cisco will then ship a replacement unit to you after the failed unit is received. If it is an AHR, Cisco ships a replacement unit to you within 10 business days. Once you receive the replacement unit, depending on your environment or needs, do the following:
- If the replacement unit is controlled by the PowerVu Network Centre (PNC), contact the broadcaster to request Secret Serial Number (SSN) information from Cisco. Once Cisco provides the SSN information to the broadcaster, the broadcaster can authorize the unit.
  - If the replacement unit requires additional licenses to match the features of the old unit, contact the Global Licensing Organization (GLO) with the RMA number, Product Activation Key (PAK), or sales order number, and the D9859 tracking number (TID). You will receive an email from GLO with the new license(s). You can then load the license file to your D9859 replacement unit.

If you require licensing support, contact GLO at [licensing@cisco.com](mailto:licensing@cisco.com) or call the appropriate technical support phone number for your region at the following URL:  
[http://www.cisco.com/en/US/support/tsd\\_cisco\\_worldwide\\_contacts.html](http://www.cisco.com/en/US/support/tsd_cisco_worldwide_contacts.html).
