## About the Personal Call Transfer Rules Web Tool

Cisco Unity Connection can transfer and screen your incoming calls according to rules you set up in the Cisco Unity Personal Call Transfer Rules web tool.

Connection uses a personal call transfer rule to transfer particular calls to you according to caller identity, time of day, and your meeting schedule, or to transfer calls to voicemail or to another phone number. You can set rules to transfer calls to a phone number, a series of phone numbers, or to an e-mail-based paging address, or to send SMS messages to an SMS device. Additionally, you can set up rules to screen some or all of your incoming calls.

You can build very simple personal call transfer rules—for example, to transfer a call from a single phone number to voice mail—or create more complex rules by using the following components:

<b>Personal contacts list</b>	Connection uses your personal contacts list to route incoming calls, as well as to place outgoing calls when you are using voice commands.  <b>Note</b> You manage your personal contacts list in the Cisco Unity Assistant web tool.
<b>Caller groups</b>	You can organize callers into groups in order to apply one rule to multiple callers without having to recreate the rule multiple times. Caller groups can contain other Connection users, system contacts, and personal contacts.
<b>Personal destinations</b>	You can create a directory of contact phone numbers to which Connection can route incoming calls. (These destinations are in addition to notification devices.)
<b>Destination groups</b>	You can organize personal destinations and notification devices into groups so that Connection routes calls to each destination in the order listed until the phone is answered, the caller hangs up, or the last destination in the group is reached. You can specify the order of destinations in the group and the length of time that Connection waits for the phone to be picked up at each destination.

Once rules have been set up, you can enable them by phone or in the Personal Call Transfer Rules web tool.

## Accessing the Personal Call Transfer Rules Web Tool

This section contains two procedures:

- [To Access the Personal Call Transfer Rules Web Tool, page 2](#)
- [To Access Help for the Personal Call Transfer Rules Web Tool, page 2](#)

### To Access the Personal Call Transfer Rules Web Tool

- 
- Step 1** Go to the Cisco PCA logon page at <http://<Cisco Unity Connection server>/ciscopca>. (The URL is case sensitive.)

**Timesaver** Bookmark the Cisco PCA URL, so you do not have to enter the web address each time you want to access the Personal Call Transfer Rules web tool.

---

- Step 2** Enter your username and password.

- Step 3** If you cannot remember your Cisco PCA password, contact your Connection administrator for assistance.

- Step 4** Click **Log In**.

- Step 5** On the Cisco PCA Home page, click the **Personal Call Transfer Rules** link.

- Step 6** When you are finished, click **Log Out** in the top right corner of any Personal Call Transfer Rules page.
- 

### To Access Help for the Personal Call Transfer Rules Web Tool

- 
- Step 1** On any Personal Call Transfer Rules page, click the **Help** menu.

- Step 2** From the Help menu, click the applicable link:

<b>Contents</b>	Provides a list of topics in Help.
<b>Index</b>	Provides a Help index.
<b>This Page</b>	Provides the Help topic applicable to the page you are viewing.

For help on an icon, hover the mouse over the icon until a tooltip is displayed.
