Audience and Use

The *Administration Guide for Cisco Unity Connection Serviceability* provides descriptions and procedures for configuring alarms, traces, clusters, and services through Cisco Unity Connection Serviceability. It is intended for administrators who configure, troubleshoot, and support a Cisco Unity Connection or a Cisco Unified Communications Manager Business Edition system. This guide requires knowledge of IP networking technology.

Tip

For Cisco Unity Connection, you must perform serviceability-related tasks in both Cisco Unified Serviceability and Cisco Unity Connection Serviceability; for example, you may need to start and stop services, view alarms, and configure traces in both applications to troubleshoot a problem.

Cisco Unified Serviceability supports the functionality described in the *Cisco Unified Serviceability Administration Guide*; for tasks that are specific to Cisco Unity Connection Serviceability, use this guide, the *Administration Guide for Cisco Unity Connection Serviceability*.

Documentation Conventions

Table 1 *Conventions in the Administration Guide for Cisco Unity Connection Serviceability*

Convention	Description
boldfaced text	Boldfaced text is used for: <ul style="list-style-type: none"> Key and button names. (Example: Select OK.) Information that you enter. (Example: Enter Administrator in the User Name box.)
< > (angle brackets)	Angle brackets are used around parameters for which you supply a value. (Example: In your browser, go to https://<Cisco Unity Connection server IP address>/cuadmin.)
- (hyphen)	Hyphens separate keys that must be pressed simultaneously. (Example: Press Ctrl-Alt-Delete .)
> (right angle bracket)	A right angle bracket is used to separate selections that you make in the navigation bar of Cisco Unity Connection Administration. (Example: In Cisco Unity Connection Administration, go to Contacts > System Contacts .)

The *Administration Guide for Cisco Unity Connection Serviceability* also uses the following conventions:

Note

Means reader take note. Notes contain helpful suggestions or references to material not covered in the document.

Caution

Means reader be careful. In this situation, you might do something that could result in equipment damage or loss of data.
