=====
```

### version: 5.1.5

- improve speakerphone
- Phone will reply 200 OK to a NOTIFY/ping event inside a dialog
- Added Broadsoft shared call appearance bridging support

```
=====
Bug Fixes
=====
```

### version: 5.1.5

- If keep alive msg is not a valid \$SIP-METHOD macro and keep alive destination is \$PROXY, and REGISTER is enabled, the keep alive message should be sent to the last Register destination. But this didn't not work.
- Fixed this bug: If phone receives a NOTIFY with an unknown event, it might reboot
